code available from the author's website from which you can easily derive your own Java applets. An appendix that helps you make the transition from Java to ANSI C++ About The Book: This unique book teaches you the fundamental concepts of good computer programming while introducing you to one of the most powerful languages in use today- Java! Java is a powerful and complicated language-trying to learn all of Java while mastering the concepts of object-oriented programming can easily overwhelm you. But this book gives you an ideal balance between programming concepts and the details of Java.

## Get Free Special Edition Using Java 2 Enterprise Edition J2ee With Jsp Servlets Ejb 20 Jndi Jms Jdbc Corba Xml And Rmi

Rather than exhaustively cover the entire language, the author focuses on a subset of Java - a lean and practical core that is manageable, yet detailed enough to create powerful Java applets. This book is revised to include many of the graphical features of Java which had not yet been created in the first edition, additional coverage on the topics of graphical user interface, and event handling. It also introduces classes early to use the Java library so readers can immediately master the design of classes and the process of sub classing.

USING JAVA 2 ENTERPRISE EDITION(SPECIAL EDITION)(CD-ROM 1? ??)

Programming Jakarta Struts

*Special Edition Using Java 2 Platform is the complete programmer's tutorial/reference for Java 2 and related technologies. The book contains detailed descriptions of Sun's Java 2 standards, APIs, class libraries, and programming tools. Also includes coverage of Microsoft's Java SDK 2.0, -AFC, and RNI products, ActiveX, CORBA, Java IDL, Joe, JavaBeans, and Enterprise JavaBeans. Over 20,000 lines of documented Java code show programmers*

*the details of building sophisticated Java applications.*

*An epic fantasy adventure that will make you laugh and cry. You'll fall in love with some characters and hate the others. Elves, Giants, Druids, Dwarves and wraiths. What more could you desire?*

*Java 2 Enterprise Edition is a combination of Java-related technologies including Java Server Pages, Servlets, and Enterprise Java Beans. Working together these "pieces" make Java a viable solution for enterprise-scale applications. "SE Using J2EE" starts with a section covering the core J2EE components and how they fit into the overall application architecture. The book then builds off this foundation to explore the practical applications of J2EE including incorporating XML into J2EE, creating*

wireless Web applications, network programming with J2EE, managing security and encryption, object programming with Serialization and Reflection, and programming Java applets in the enterprise. Later chapters discuss alternative approaches to solving problems in J2EE applications including debugging, decompiling and disassembly. The book finishes with a useful reference section discussing each of the core J2EE APIs.

*Special Edition Using XSLT* starts with an overview explaining how XSLT fits into the bigger picture of the Extensible Stylesheet Language, and the differences between XSLT and XSL-FO. It then demonstrates practical examples of XSL transformations from XML to a variety of other useful formats including HTML, PDF, SVG and

Edition J2ee With Jsp Servlets Ejb 20 Jndi Jms  
Jdbc Corba Xml And Rmi

*you need to get started with WebLogic Workshop, including a quick Java primer and appendixes covering the essentials of XML, SOAP and WSDL. Learn the features of WebLogic Workshop and review hundreds of code examples, and explore the inner workings of this new tool. The book's CD-ROM contains all the source code and examples from the book, plus a 90-day trial version of BEA WebLogic Platform, which includes WebLogic Workshop. Foreword Web services have attracted much attention recently as the next "big thing" in computing technology. Vendors of all shapes and sizes have announced their support for Web services technologies, and every month a new Web services conference is popping up somewhere on the globe. With all*

*this hype and attention, sometimes it's difficult to really discover what Web services are, where they fit in your company, what the business case is, and how you can actually get started taking advantage of this technology. BEA has been working with customers to answer many of these questions, and provide solutions that enable companies to easily construct Web services that meet their needs today. Contrary to the common conception of Web services as a consumer-focused technology, Web services may have the greatest potential as a technology inside enterprises as a new way of tying disparate applications together using standards-based technologies. To make Web services really work in the enterprise, however, it's essential that they meet core*

*enterprise requirements: Web services applications have to exist in a constantly changing IT environment where different applications are built and modified by different people on different schedules. They must accommodate everything from modern J2EE-based applications, to legacy systems, to applications at business partners. They must be able to handle rich and complex information and transmit it between internal and external applications. They must easily interact with other applications to leverage existing investments. They must be robust, reliable, and they must perform. Perhaps most important of all, they have to be easy to build. For Web services to flourish within an organization, all developers will need to be able to build Web services that*

Get Free Special Edition Using Java 2 Enterprise Edition J2ee With Jsp Servlets Ejb 20 Jndi Jms Jdbc Corba Xml And Rmi

*meet these requirements. BEA WebLogic Workshop Kick Start introduces you to BEA's new WebLogic Workshop product, a development tool and runtime framework that makes it easy to build powerful Web services that take advantage of the robust, enterprise features of the WebLogic J2EE application server. WebLogic Workshop provides a graphical tool that makes it easy to visualize, develop, and test Web service applications and visual controls that dramatically simplify access to existing resources like databases, packaged applications, Enterprise Java Beans, and other Web services. The Workshop framework provides out-of-the-box support for building Web services that are loosely coupled so that the internal implementation details of*

*an application can be cleanly separated from the "public contract" that a Web service offers to other applications. This makes Workshop Web services flexible in the face of a constantly changing IT environment. Workshop also provides built-in support for asynchronous messaging so that Web service applications can carry on rich, two-way conversations with their clients and accommodate interaction with legacy systems and human users. Finally, Workshop supports easy manipulation of coarse-grained messages so that rich documents can be handled without resorting to tedious XML DOM programming. All of these capabilities can be accessed in a simple, declarative fashion that enables all developers not just J2EE experts to get started building*

The 15th Workshop on Languages and Compilers for

## Get Free Special Edition Using Java 2 Enterprise Edition J2ee With Jsp Servlets Ejb 20 Jndi Jms Jdbc Corba Xml And Rmi

Parallel Computing was held in July 2002 at the University of Maryland, College Park. It was jointly sponsored by the Department of Computer Science at University of Maryland and the University of Maryland Institute for Advanced Computer Studies (UMIACS). LC PC2002 brought together over 60 researchers from academic and research institutions from many countries. The program of 26 papers was selected from 32 submissions. Each paper was reviewed by at least three Program Committee members and sometimes by additional reviewers. Prior to the workshop, revised versions of accepted papers were informally published on the

## Get Free Special Edition Using Java 2 Enterprise Edition J2ee With Jsp Servlets Ejb 20 Jndi Jms Jdbc Corba Xml And Rmi

workshop's website and in a paper proceedings that was distributed at the meeting. This year, the workshop was organized into sessions of papers on related topics, and each session consisted of two to three 30-minute presentations. Based on feedback from the workshop, the papers were revised and submitted for inclusion in the formal proceedings published in this volume. Two papers were presented at the workshop but later withdrawn from the formal proceedings by their authors. We were very lucky to have Bill Carlson from the Department of Defense give the LCPC 2002 keynote speech on "UPC: A C Language for Shared Memory

## Get Free Special Edition Using Java 2 Enterprise Edition J2ee With Jsp Servlets Ejb 20 Jndi Jms Jdbc Corba Xml And Rmi

Parallel Programming.” Bill gave an excellent overview of the features and programming model of the UPC parallel programming language.

Java 2 by Example, Second Edition gives novice programmers in-depth coverage of both object-oriented programming and Java fundamentals. It starts with an overview of Java, including a survey of development tools beginners should use. The book explains the basics of the Java language, including operators, expressions, statements and more; and Object-Oriented Programming with classes and objects, inheritance, and dynamic methods. The author includes a chapter

## Get Free Special Edition Using Java 2 Enterprise Edition J2ee With Jsp Servlets Ejb 20 Jndi Jms Jdbc Corba Xml And Rmi

applying the concepts of OOP to object-oriented analysis and design methods. Later chapters demonstrate organizing data in collections and utilizing Java's built-in mathematical functions. Along the way, readers learn from hundreds of examples explaining every concept. Plus, each chapter ends with a series of review questions to ensure that readers are caught up - with answers provided in an appendix.

"XML in Flash" is an excellent introduction to creating state-of-the-art Flash applications with XML. XML is quickly becoming the most popular way to store and manage data. This allows developers to use a Flash

*Fundamental Classes Reference, Java AWT Reference, and Java in a Nutshell, 2nd Edition, included both on the CD-ROM and in a companion desktop edition. Java in a Nutshell, Deluxe Edition is an indispensable resource for anyone doing serious programming with Java 1.1. The Java Reference Library alone is also available by subscription on the World Wide Web. Please see <http://online-books.oreilly.com/books/javaref/> for details. The electronic text on the Web and on the CD is fully searchable and includes a complete index to all five volumes. It also includes the sample code found in the printed volumes. Exploring Java, 2nd Edition introduces*

*the basics of Java 1.1 and offers a clear, systematic overview of the language. It covers the essentials of hot topics like Beans and RMI, as well as writing applets and other applications, such as networking programs, content and protocol handlers, and security managers. The Java Language Reference, 2nd Edition is a complete reference that describes all aspects of the Java language, including syntax, object-oriented programming, exception handling, multithreaded programming, and differences between Java and C/C++. The second edition covers the new language features that have been added in Java 1.1, such as inner classes, class literals, and instance*

*initializers. The Java Fundamental Classes*

*Reference provides complete reference documentation on the core Java 1.1 classes that comprise the java.lang, java.io, java.net, java.util, java.text, java.math, java.lang.reflect, and java.util.zip packages. These classes provide general-purpose functionality that is fundamental to every Java application. The Java AWT Reference provides complete reference documentation on the Abstract Window Toolkit (AWT), a large collection of classes for building graphical user interfaces in Java. Java in a Nutshell, 2nd Edition, the bestselling book on Java and the one most often recommended on the Internet, is a complete*

*processing mechanisms Material on graphics primitives and rendering techniques Writing a security manager System requirements: The CD-ROM is readable on all Windows and UNIX platforms. Current implementations of the Java Virtual Machine for the Mac platform do not support the Java search applet in this CD-ROM. Mac users can purchase the World Wide Web version (see <http://online-books.oreilly.com/books/javaref/> for more information). A Web browser that supports HTML 3.2, Java, and JavaScript, such as Netscape 3.0 or Internet Explorer 3.0, is required.*
