The 1975 publication of Robin Tolmach Lakoff's *Language and Woman's Place*, is widely recognized as having inaugurated feminist research on the relationship between language and gender, touching off a remarkable response among language scholars, feminists, and general readers. For the past thirty years, scholars of language and gender

have been debating and developing Lakoff's initial observations.

Arguing that language is fundamental to gender inequality, Lakoff pointed to two areas in which inequalities can be found: Language used about women, such as the asymmetries between seemingly parallel terms like master and mistress, and language used by women, which places women in a double bind between being appropriately feminine and being fully human.

Lakoff's central argument that "women's language" expresses powerlessness triggered a controversy that continues to this day. The revised and expanded edition presents the full text of the original first edition, along with an introduction and annotations by Lakoff in which she reflects on the text a quarter century later and expands on some of the most widely discussed issues it raises. "In his Course in General Linguistics, first published in 1916, Saussure postulated the existence of a general science of signs, or Semiology, of which linguistics would form only one part.

Semiology, therefore

aims to take in any system of signs, whatever their substance and limits; images, gestures, musical sounds, objects, and the complex associations of all these, which form the content of ritual, convention or public entertainment: these constitute, if not languages, at least systems of signification . . . The Elements here presented have as their sole aim the extraction from linguistics of analytical concepts

which we think a priori to be sufficiently general to start semiological research on its way. In assembling them, it is not presupposed that they will remain intact during the course of research; nor that semiology will always be forced to follow the linguistic model closely. We are merely suggesting and elucidating a terminology in the hope that it may enable an initial (albeit

provisional) order to be introduced into the heterogeneous mass of significant facts. In fact what we purport to do is furnish a principle of classification of the questions. These elements of semiology will therefore be grouped under four main headings borrowed from structural linguistics:

- I. Language and Speech;
- II. Signified and Signifier;
- III. Syntagm and System;
- IV. Denotation and

literature, philosophy, and the humanities, inspiring these students to ask questions of their disciplines that had previously been considered improper. Thirty years later, the immense influence of Derrida's work is still igniting controversy, thanks in part to Gayatri Spivak's translation, which captures the richness and complexity of the original. This corrected edition adds a new index of the critics and philosophers cited in the text and makes one of contemporary criticism's most indispensable works even more accessible and usable. Decades of research have demonstrated that the parent-child dyad and the environment of the

family" which includes all primary caregivers" are at the foundation of children's well- being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also

impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to

information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption

of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

The opportunities afforded by the Internet greatly overshadow the challenges. While not forgetting this, we can nevertheless still address some of the problems that arise. Hate speech online is one such problem. But what exactly is hate speech online, and how can we deal

with it effectively? As with freedom of expression, on- or offline, UNESCO defends the position that the free flow of information should always be the norm. Counter-speech is generally preferable to suppression of speech. And any response that limits speech needs to be very carefully weighed to ensure that this remains wholly exceptional, and that legitimate robust debate is not curtailed.

"O, my friends, there is no friend." The most influential of contemporary philosophers explores the idea of friendship and its political consequences, past and future. Until relatively recently, Jacques Derrida was seen by many as nothing more than the high priest of Deconstruction, by turns stimulating and fascinating, yet always somewhat disengaged from the central political questions of our time. Or so it seemed. Derrida's "political turn," marked especially by the appearance of Specters of Marx, has surprised some and delighted others. In The Politics of Friendship Derrida

renews and enriches this orientation through an examination of the political history of the idea of friendship pursued down the ages. Derrida's thoughts are haunted throughout the book by the strange and provocative address attributed to Aristotle, "my friends, there is no friend" and its inversions by later philosophers such as Montaigne, Kant, Nietzsche, Schmitt and Blanchot. The exploration allows Derrida to recall and restage the ways in which all the oppositional couples of Western philosophy and political thought—friendship and enmity, private and public

life—have become madly and dangerously unstable. At the same time he dissects genealogy itself, the familiar and male-centered notion of fraternity and the virile virtue whose authority has gone unquestioned in our culture of friendship and our models of democracy The future of the political, for Derrida, becomes the future of friends, the invention of a radically new friendship, of a deeper and more inclusive democracy. This remarkable book, his most profoundly important for many years, offers a challenging and inspiring vision of that future. Writing, Profession, and Altruism

First published in 1967, Writing and Difference, a collection of Jacques Derrida's essays written between 1959 and 1966, has become a landmark of contemporary French thought. In it we find Derrida at work on his systematic deconstruction of Western metaphysics. The book's first half, which includes the celebrated essay on Descartes and Foucault, shows the development of Derrida's method of deconstruction. In these

essays, Derrida demonstrates the traditional nature of some purportedly nontraditional currents of modern thought—one of his main targets being the way in which "structuralism" unwittingly repeats metaphysical concepts in its use of linguistic models. The second half of the book contains some of Derrida's most compelling analyses of why and how metaphysical thinking must exclude writing from its conception of language, finally showing metaphysics to be constituted by this exclusion. These essays on Artaud, Freud, Bataille, Hegel, and Lévi-Strauss have served as introductions to Derrida's notions of writing and différence—the untranslatable

formulation of a nonmetaphysical "concept" that does not exclude writing—for almost a generation of students of literature, philosophy, and psychoanalysis. Writing and Difference reveals the unacknowledged program that makes thought itself possible. In analyzing the contradictions inherent in this program, Derrida goes on to develop new ways of thinking, reading, and writing,—new ways based on the most complete and rigorous understanding of the old ways. Scholars and students from all disciplines will find Writing and Difference an excellent introduction to perhaps the most challenging of contemporary French

thinkers—challenging because

Current rhetorical and critical theory for the most part separates writing from consciousness and presumes relative truth to be the only possible expressive goal for rhetoric. These presumptions are reflected in our tradition of persuasive rhetoric, which values writing that successfully argues one person's belief at the expense of another's. Barbara Couture presents a case for a phenomenological rhetoric, one that values and respects consciousness and selfhood and that restores to rhetoric the possibility of seeking an all-

embracing truth through pacific and cooperative interaction. Couture discusses the premises on which current interpretive theory has supported relative truth as "the philosophical grounding for rhetoric, premises, she argues, that have led to constraints on our notion of truth that divorce it from human experience. She then shows how phenomenological philosophy might guide the theory and practice of rhetoric, reanimating its role in the human enterprise of seeking a shared truth. She proposes "profession "and "altruism "as two guiding metaphors for the phenomenological activity of "truth-seeking through interaction."

infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure,

positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. his own thinking. While Writing and Difference collects essays written over a 10 year period on diverse figures and topics, and Of Grammatology aims its deconstruction at "the age of Rousseau," Voice and Phenomenon shows deconstruction engaged with the most important philosophical movement of the last hundred years: phenomenology. Only in relation to phenomenology is it possible to measure the importance of deconstruction. Only in relation to Husserl's philosophy is it possible to understand the novelty of Derrida's thinking. Phenomenon therefore may be the best introduction to Derrida's thought in general. To adapt Derrida's comment on Husserl's Logical Investigations, it contains "the germinal structure" of Derrida's entire thought.

Lawlor's fresh translation of Voice and Phenomenon brings new life to Derrida's most seminal work.

This book formulates a new theory of subjectivity in the context of the claimed "death of the subject" in the post-modern and post-human age. The new theory is developed against the conception of the subject as a transcendental ego whose

constitutive roles, recognition, and representation lead to the objectivization and totalization of the world and denial of its inner infinity and heterogeneity.

Critically scrutinizing ideas from Bergson, James, Husserl, Heidegger, Derrida, Zen Buddhism, and Chinese Zhuangzi, and through an analysis of time and temporality, this book advances a number of new concepts, including "primal sensibility" and "pure experience," and proposes a porous structure of subjectivity with an ex-egological and ex-subjective zone that allows nothingness and absence to

ground presence. Such a theory of subjectivity provides the basis for an understanding of thinking as imagination and self-identity as narrative presentation in the intersubjective world.

to-read introduction to the fundamentals and complexities of speech communication. It provides a foundation for understanding the essential aspects of linguistics, acoustics and anatomy, and explores research and development into digital processing of speech and the use of computers for the generation of artificial speech and speech recognition. This interdisciplinary account will prove invaluable to students with little or no previous exposure to the study of language.
