Princess Lu knows that the throne of the Empire of the First Flame rightfully belongs to her. After all, she is the late Emperor's firstborn and has trained for the role all her life. And she can't forget made a promise to shapeshifter Nok, the boy she came to love, to win justice for his now powerless people. But even with an army at her side, Lu will need to face down a major obstacle: the current sitting Empress, her once beloved younger sister, Min. Princess Min used to live in Lu's shadow. But now she can control a powerful, ancient magic, and she's determined to use it to forge her own path and a strong future for the Empire, even if that means making enemies in court. But Min's magic isn't entirely under her control, and she must learn how to tame it before it consumes her . . . and the entire realm. Lu and Min are set for a confrontation that can't be stopped. But the Empire faces threats greater than their rivalry, and even if they choose to stand together, it could cost them both the throne-or their lives.

Momo Traders features extensive interviews with ten top day traders and swing traders who find stocks that move and capitalize on that momentum. They began where you are and now make a great living--some even becoming rich. They weren't given a leg up, they didn't start with millions, and they don't manage billion-dollar hedge funds. They battle the market day in and day out just like you--and win! Hear in their own words, how they got started, what strategies they employ, how they deal with losing streaks, what setups are most profitable, how they overcome blowups, what tools they use, how they enter trades, how they exit trades, how they manage risk, how they maintain success, and much, much more. From the swing-set builder trading with credit card advances to the penny-stock trader outwitting market makers to the accountant funding trading accounts with cash his employer gave him to pay for his MBA, these Momo Traders have figured out what it takes to beat the market. Foreword by Brett Steenbarger, Trading Psychologist and Author of The Daily Trading Coach. Interviews with Gregg Sciabica, Eric Wood, Derrick Leon, Phil Goedecker, Bao Nguyen, John Welsh, Tim Grittani, Tom O'Reilly, Nathan Michaud, Michele Koenig

This is the ninth in the 300 series of circuit design books, again contains a wide range of circuits, tips and design ideas. The book has been divided into sections, making it easy to find related subjects in a single category. The book not only details DIY electronic circuits for home construction but also inspiring ideas for projects you may want to design from the ground up. Because software in general and microcontroller programming techniques in particular have become key aspects of modern electronics, a number of items in this book deal with these subjects only. Like its predecessors in the 300 series, "308 Circuits" covers the following disciplines and interest fields of modern electronics: test and measurement, radio and television, power supplies and battery chargers, general interest, computers and microprocessors, circuit ideas and audio and hi-fi.

This paper reviews economic developments in Suriname during 1994–96. In 1995, there was a major turnaround in Suriname's economic and financial situation following the expansionary fiscal and monetary policies pursued in the first half of the 1990s and the political and economic disruptions of the 1980s. The marked improvement was owing to the restoration of financial discipline, a strengthening of international bauxite prices, and the unification and subsequent stabilization of the exchange rate. The inflation fell further to less than 1 percent in 1996.
