programs. However, today there are also apps for practically any type of office work and business tasks that you can imagine. Many office tasks, which until recently could only be performed using a powerful PC or laptop, can today easily be done using an Android tablet or smartphone. There are several excellent Android apps for word processing and spreadsheet calculations so that these and many other types of office work easily can be done on handheld Android device. This has led to a new way of working, which is often called mobile computing. There are many excellent brands of Android tablets and smartphones on the market. Samsung is today seen as the leading

manufacturer of Android smartphones and tablets. In 2010, Samsung launched the Galaxy Tab 7.1 tablet. The Galaxy Tab 7.1 quickly became highly popular and a benchmark for other Android tablets. Later, more powerful and larger Galaxy tabs have been marketed, including the Galaxy Tab 7.7, 8.9, and 10.1. This book focuses on the Galaxy Tab 7.1. You will benefit most from the book if you have a Samsung Galaxy Tab 7.1. If you own another tablet or smartphone running on Android 2.2 (Froyo) or 2.3 (Gingerbread), you will also benefit from reading the book, as the different brands of Android 2.2./2.3 tablets and smartphones work much in the same

way. The Samsung Galaxy Tab 7.1 tablet is ideal for Android mobile office computing due to its excellent communication capabilities and size. It has highly effective and versatile built-in chipsets and tools for mobile (cellular) data communication, Wi-Fi network connections, and Bluetooth communication. In addition, its GPS antenna and tools make accurate location determination and navigation possible. It fits easily into any briefcase - and even into a large pocket, making it very easy carry around. The main challenge of mobile computing is possibly to get online in different situations - in a way that is inexpensive, secure, and effective. While both mobile (cellular) broadband and public Wi-

country and abroad. You get detailed instructions on how to use email apps effectively on your Android smartphone and tablet. Last, you are introduced to some of the most popular and valuable Android apps for office work and other business tasks. The Samsung Galaxy Tab 7.1 exists in two different models as regards mobile communication: a CDMA/EVDO model, primarily intended for the US market; and a GSM/UMTS model, primarily intended for the non-US market. The book describes both major models.

products. The formation of industrial clusters, such as export processing zones and special economic zones, has been the preferred mechanism for developing countries to boost their industrial development and export performance for the past several decades. Existing literature related to development economics cites numerous benefits of industrial clusters, and several countries have demonstrably reaped such benefits. The book goes beyond an evaluation of the development of traditional industrial clusters by promoting the idea of the formation of two-stage clusters. Moreover, it takes into consideration new innovation models, with ideas promoted that are

based on empirical evidence available through evaluations of Chinese and Taiwanese firms in the consumer electronics and automobile sectors. Finally, the book looks at company strategies in a new business environment dominated by the servitization of industrial products. It proposes that firms integrate manufacturing and services to a greater extent, and, to substantiate these arguments, presents empirical evidence from India, Taiwan, and Bangladesh. Furthermore, the study contends that innovation and knowledge acquisition strategies are influenced not only by the size of firms but that they also vary with market preferences.
