Artificer Apprentice Recruitment Test (Indian Navy)

Guide to Indian Navy Senior Secondary Recruit (SSR) & Artificer Apprentice (AA) Exam 2021-22

*Disarmament, Demobilization, and Reintegration (DDR) and Security Sector Reform (SSR) have emerged in recent years as promising though generally poorly understood mechanisms for consolidating stability and reasserting state sovereignty after conflict. Despite the considerable experience acquired by the international community, the critical interrelationship between DDR and SSR and the ability to use these mechanisms with consistent success remain less than optimally developed. The chapters in this book reflect a diversity of field experience and research in DDR and SSR, which suggest that these are complex and interrelated systems, with underlying political attributes. Successful application of DDR and SSR requires the setting aside of preconceived assumptions or formulas, and should be viewed flexibly to restore to the state the monopoly of force.*

The main argument is that improving migrants' rights and conceptual linkages between SSG/R and migration is best achieved, by decentring our gaze, namely going beyond the 'national' and 'state-centric' view that characterizes traditionally SSG/R and to consider the agency of both migrants and SSR actors. First from a migrants' perspective, it is key for SSR actors to go beyond traditional legal classifications and to consider the diversity of personal situations that involve refugees, stranded migrants and asylum seekers, which might endorse different roles at different times of their journeys and lives. Second, the transnational nature of migration calls for a transnationalization of SSG/R too. For too long the concept has mostly been applied within the national setting of SSR institutions and actors. Migration calls for a clear decentring that involves a transnational dimension and more work among transnational actors and policymakers to facilitate a norm transfer from the domestic to the interstate and international level. As such, the 'transnational' nature of migration and its governance needs to be 'domesticated' within the national context in order to change the mindset of

SSG/R actors and institutions. More importantly, the paper argues that poor SSG/R at home produces refugees and incentivizes migrants to leave their countries after being victims of violence by law enforcement and security services. During migrants' complex and fragmented journeys, good security sector governance is fundamental to address key challenges faced by these vulnerable groups. I also argue that a better understanding of migrants' and refugees' security needs is beneficial and central to the good governance of the security sector. After reviewing the key terms of migration and its drivers in section 2, section 3 reviews how SSG is part of the implementation of the GCM. SSR actors play a role in shaping migratory routes and refugees' incentives to leave, in explaining migrants' and refugees' resilience, in protecting migrants and refugees, and in providing security. Although it cautions against artificial classifications and the term of 'transit migration', section 4 reviews what the core challenges are in the countries of origin, transit and destination. Section 5 provides a detailed overview of the linkages between migration and each security actor: the military, police forces, intelligence services, border guards, interior ministries, private actors, criminal justice, parliaments, independent oversight bodies and civil society. Section 6 formulates some recommendations.

The present book has been specially published for the aspirants of Indian Navy - Sailors (SSR) Recruitment Exam. The book comprises, along with the latest study and practice material, Solved Model Papers which will prove extremely useful for readers to be well conversant with the exam pattern, the type of questions asked and their answers. In *The Third Battle*, by Owen Cote, a manuscript developed under the editorial leadership of Dr. Thomas B. Grasse, then Press editor, Dr. Cote argues that the U.S. Navy's innovative response to the Soviet submarine fleet during the Cold War represents the third great battle for control of the seas in the 20th century. Technology was always the key factor in the continuing seesaw

peacetime race between the two superpowers. Dr. Cote, Associate Director of the Security Studies Program at the Massachusetts Institute of Technology, provides a critical groundbreaking perspective on this battle—quite different from the two that preceded it. During the two world wars, the then new and revolutionary submarine threatened the ability of the major naval powers to gain decisive control of the sea. In peacetime, the Allied powers were unable, or perhaps ultimately basically reluctant, to prepare innovative and effective measures to counter submarine use. In war, they then faced unrestricted submarine warfare and the attending significant losses. Those antisubmarine measures that were eventually developed were short-lived because of the close technological arms race between the combatants. It was only with the development in the mid-1980s of truly quiet Soviet nuclear submarines that the U.S. Navy decisively confronted the antisubmarine warfare challenge. Cote details the events leading to that point and presents a critical study of technological innovation with clear implications for challenges in the 21st century.

The present book has been specially published for the aspirants of Indian Navy - Sailors (SSR & AA) Recruitment Exam. The book comprises, along with the latest study and practice material, a Solved Model Paper which will prove extremely useful for readers to be well-conversant with the exam pattern, the type of questions asked and their answers.
