business is not just for goliath corporations. An individual armed with the right information can get in on this enormous industry. It is big business these days - to the tune of an annual \$1.2 trillion in goods, according to the U.S. Department of Commerce. Billions of dollars in merchandise and goods are being exchanged each day in the global marketplace. These products are bought, sold, represented, and

distributed somewhere in the world on a daily basis. While basically any country can offer opportunities for import export trade, Canada, Mexico, Japan, and China have topped the trading chart for the past two decades. In the last few years, countries in the former Soviet Union and South America have become major players. Compared to other businesses, however, import export companies have a very low startup cost. You do not need

any special license or degree; what you need to succeed is the expert advice presented in this new, comprehensive manual. This is a business you run from home, and travel is mostly optional. This guide provides readers with an understanding of the basic concepts of international trade and will help you navigate the maze of international trade policies and regulations. This new book is a comprehensive
