

Std 11 Commerce Economics Maharashtra Board

The State of the World's Land and Water Resources for Food and Agriculture is FAO's first flagship publication on the global status of land and water resources. It is an 'advocacy' report, to be published every three to five years, and targeted at senior level decision makers in agriculture as well as in other sectors. SOLAW is aimed at sensitizing its target audience on the status of land resources at global and regional levels and FAO's viewpoint on appropriate recommendations for policy formulation. SOLAW focuses on these key dimensions of analysis: (i) quantity, quality of land and water resources, (ii) the rate of use and sustainable management of these resources in the context of relevant socio-economic driving factors and concerns, including food security and poverty, and climate change. This is the first time that a global, baseline status report on land and water resources has been made. It is based on several global spatial databases (e.g. land suitability for agriculture, land use and management, land and water degradation and depletion) for which FAO is the world-recognized data source. Topical and emerging issues on land and water are dealt with in an integrated rather than sectoral manner. The implications of the status and trends are used to advocate remedial interventions which are tailored to major farming systems within different geographic regions.

Kautilya, also known as Chanakya, is India's most illustrious political economist of all time. He regarded economic activity as the driving force behind the functioning of any political dispensation. In fact, he went to the extent of saying that revenue should take priority over the army because sustaining the army was possible out of a well-managed revenue system. Kautilya advocated limiting the taxation power of the State, having low rates of taxation, maintaining a gradual increase in taxation and most importantly devising a tax structure that ensured compliance. He strongly encouraged foreign trade, basing it on the premise that for a successful trade contract to be established, it had to be beneficial to all. He emphasised State control and investment in land, water and mining. Kautilya was a true statesman who bridged the gap between experience and vision. For Kautilya, good governance was paramount. He suggested built-in checks and balances in systems and procedures for the containment of malpractices. Many postulates of Kautilya's philosophy of political economy are applicable to contemporary times.

NCERT Textbooks play the most vital role in developing student's understanding and knowledge about a subject and the concepts or topics covered under a particular subject. Keeping the importance and significance of the NCERT Textbooks in mind, Arihant has come up with a unique book containing Questions-Answers of NCERT Textbook based questions. This book containing NCERT Textbook questions has been designed for the students studying in Class XI following the NCERT Textbook for Economics. The present book has been divided into two parts covering the syllabi of Economics for Class XI. Part A covers Poverty, Rural Development, Infrastructure, Human Capital Formation in India, Indian Economy (1950-1990), Environmental Development, etc whereas Part B covers Collection of Data, Organisation of Data, Presentation of Data, Correlation, Index Numbers, Measures of Dispersion, etc. This book has been designed for the overall development of the students in such a way that it will help students define the way how to write the answers of the textbook based questions. The book covers selected questions which will help the students understand the type of questions and answers to be expected in the Class XI Economics Examination. Also each chapter in the book begins with a summary to provide an effective understanding of the theme of the chapter and to make sure that the students will be able to answer all popular questions concerned to a particular chapter whether it is a Multiple Choice Question, Answer Type Question. The book has been designed systematically in the simplest manner for easy comprehension of the chapters and their themes. For the overall benefit of students, the book is written in such a way that it not only gives solutions to all the exercises but also gives detailed explanations which will help the students in learning the concepts and will enhance their understanding. As the book has been designed strictly according to the NCERT Textbook of Economics for Class XI and contains simplified text material in the form of class room notes and answers in simple language, it for sure will help the Class XI students in an effective way for Economics.

POET-SAINTS OF MAHARASHTRA: SELECTED POEMS Translations & Introductions Paul Smith From the 13th to the 17th century the state of Maharashtra in India gave birth to a number of Poet-Saints whose lives and poetry is loved today as much as it was when they lived their lives of selfless devotion and praise of the Divine Beloved. They composed their poems in sloka form in the correct form and meaning, with biographies and bibliographies. Janabai (1263-1350) was born to a couple from the lowest caste. She worked as a maidservant for the father of the saint she cared for throughout her life. Her poetry is replete with her love for God. Namdev (1270-1350) was born in Narasi-Bamani. Soon his family moved to Pandharpur where the temple of the saint (as a boy) is located. He spent most his life there. He composed 2500 abhangs in Marathi. Dnyaneshwar (1275-1296) emerged as one of the first original Poet-Saints to write in Marathi. He had 'knowledge' locked in Sanskrit to bring it into Marathi. At the age of 21 he entered into Sanjeevan Samadhi at Alandi. Mukta Bai (b.1279) was the younger sister of Dnyaneshwar but she wrote on her own right. She wrote forty-one abhangs. Eknath (1533-1599) was a saint, scholar and poet. He is seen as a bridge between Dnyaneshwar and Namdev and Tukaram and Ramdas. He was a prominent Poet-Saint during the Bhakti movement in India and is still greatly loved. Ramdas (1627-1682) was a Marathi Poet-Saint and a devotee of Lord Rama. Bahina Bai (1628-1682) was the wife of Tukaram. Apart from her unique autobiography in verse she composed abhangs that deal with various subjects. Pages 198. COMMENTS ON PAUL SMITH'S TRANSLATION OF HAFIZ'S 'I

joke... the English version of ALL the ghazals of Hafiz is a great feat and of paramount importance. I am astonished. " Dr. Mir Mohammad Taghavi (Dr. of Literature) Tehran. "Superb 1% Paul Smith." Ali Akbar Shapurzman, translator from English into Persian, knower of Hafiz's Divan off by heart. Paul Smith is a poet, author and translator of over 130 books of Urdu, Arabic, Urdu, Turkish, Pashtu and other languages... including Hafiz, Sadi, Nizami, Rumi, 'Attar, Sana'i, Jahan Khatun, Obeyd Zakani, Mu'in, Amir Khusrau, Nesimi, Kabir, Anvari, Ansari, Jalal Khayyam, Rudaki, Yunus Emre, Mahsati, Lalla Ded, Bulleh Shah, Ghalib, Iqbal and many others, as well as his own poetry, fiction, plays, biographies, children's books and a dozen screenplays.

Minerals are part of virtually every product we use. Common examples include copper used in electrical wiring and titanium used to make airplane frames and paint pigments. The Information Age has ushered in a number of new mineral uses in a number of products including cell phones (e.g., tantalum) and liquid crystal displays (e.g., indium). For some minerals, such as the platinum group metals used to make catalytic converters in cars, there is no substitute. If the supply of any given mineral were to become restricted, consumers and sectors of the U.S. economy could be significantly affected. Risks to minerals supplies can include a sudden increase in demand or the possibility that natural ores can be exhausted or become too difficult to extract. Minerals are more vulnerable to supply restrictions if they come from a limited number of mines, mining companies, or nations. Baseline information on minerals is currently collected at the federal level, but no established methodology has existed to identify potentially critical minerals. This book develops such a methodology and suggests an enhanced federal initiative to collect and analyze the additional data needed to support this type of tool.

Last Years Solved Papers (SSC Semi-English Medium): Maharashtra Board Class 10 for 2022 Examination

The book has been designed topic and subtopic-wise, keeping the students' needs in mind. The current edition has certain unique features: Each chapter starts with a To Do list. It gives a clear picture of the chapter and the way it has been addressed. Each chapter is divided into several sections corresponding to different components of the syllabus. Each chapter is splashed with HOTS. The book provides clarity of the basics. Focus Zones in each chapter present a crux of the concepts. Blocks in each chapter include matter of special significance. Power Points and Revision Window offer a concise summary of the subject matter. 'Exercise' is tuned to the pattern of examination. Answers to important questions focus on the technique of writing. The exercise includes: objective type questions (remembering, understanding based questions), divided into five sections: (a) multiple choice questions, (b) fill in the blanks, (c) true or false, (d) matching the correct statements, (e) 'very short answer' type questions reason-based questions HOTS & applications analysis & evaluation CBSE questions (with answers or reference to the text for answers) NCERT questions (with hints to answers) add-on questions (with hints or reference to the text for answers) Dos and Don'ts (at the end of each chapter) should serve as a safeguard against misinterpretation of the concepts. A 'Check Your Understanding' designed section at the end of the chapter. This raises the difficulty level, of course, but should serve as a useful material for the outstanding learners. Solved & Unsolved numericals are provided on the subject.

This book by Lionel Robbins first appeared in 1932 as an outstanding English-language statement of the Misesian view of economic method, namely that economics is a social science and not a set of propositions by means of deductive reasoning and not through the methods used in the natural sciences. The case is argued here with patience and attention to scholarly details. The current edition of this book, which is more available today, introduces confusions by departing from Austrian microeconomic theory. Thus does the Mises Institute celebrate the 75th anniversary of this reprint. "Reading Robbins," writes Samuel Bostaph of the University of Dallas, "is an excellent way of contrasting his explanation of the basic nature of economics with that of the Austrians as found in the work of Mises as an extension of Carl Mengers's foundations. Such a reading wonderfully clarifies one's understanding of the basic conception of economics as a science of human action rather than one of mere 'economizing.' "

This book arises out of Hannah Pitkin's doctoral dissertation and is considered by political scientists to be the gold standard in terms of a philosophical treatment of the subject. Pitkin covers the historical evolution of thinking about representation from the Greeks through the founding of the American republic highlighting diverse thinkers and politicians like Edmund Burke, Jeremy Bentham, and James Madison as well as more contemporary scholars like Robert Dahl and Charles Lindblom.

When the younger players in India's cricket team find out that advertising executive Zoya Singh Solanki was born at the very moment India won the World Cup back in 1983, they are intrigued. When having breakfast with her is followed by victories on the field, they are impressed. And when not eating with her results in defeat, they decide she's a lucky charm. The nation goes a step further. Amazed at the ragtag team's sudden spurt of victories, it declares her a Goddess. So when the eccentric IBCC president and his mesmeric, always-exquisitely-attired Swamiji invite Zoya to accompany the team to the tenth ICC World Cup, she has no choice but to agree. Pursued by international cricket boards on the one hand, wooed by Cola majors on the other, Zoya

struggles to stay grounded in the thick of the world cup action. And it doesn't help that she keeps clashing with the erratically brilliant new skipper who tells her flatly that he doesn't believe in luck...

Saraswati Health and Physical Education is a much acclaimed and popular series in Health and Physical Education. The series demonstrates a deep understanding of concepts related to the subject while providing students with all the pedagogical tools necessary for comprehension and application. The fully revised edition, with the latest developments in the field, in its colourful avatar will not only enhance the teaching-learning process but will also make it more enjoyable.

The book in its tenth edition has been thoroughly restructured and revised. All the chapters of the present edition have been re-written not only to incorporate changes in management but also to make presentation of subject-matter more lucid and crisp. Chapter 3 of the previous edition (Managers and Environment) has been replaced by Challenges and Opportunities in the present edition so that proper focus is put on these issues. Thus, the present edition is ideally suited to management students and practitioners, particularly those who have not gone through formal management education.
