The industrial revolution was the single most important development in human history over the past three centuries, and it continues to shape the contemporary world. With new methods and organizations for producing goods, industrialization altered where people live, how they play, and even how they define political issues. By exploring the ways the industrial revolution reshaped world history, this book offers a unique look into the international factors that started the industrial revolution and its global spread and impact. In the fourth edition, noted historian Peter N. Stearns continues his global analysis of the industrial revolution with new discussions of industrialization outside of the West, including the study of India, the Middle East, and China. In addition, an expanded conclusion contains an examination of the changing contexts of industrialization. The Industrial Revolution in World History is essential for students of world history and economics, as well as for those seeking to know more about the global implications of what is arguably the defining socioeconomic event of modern times.

*World Civilizations, AP® Edition encourages students to grasp concepts and patterns across a huge breadth of time and space and helps to facilitate global understandings and connections in the classroom. This text captures a truly global approach by discussing and comparing major societies and focusing on their interactions. World Civilizations, AP® Edition presents a clear factual framework while stimulating analysis about global contacts, regional patterns, and the whole process of change and continuity on a world stage. This text identifies six periods in world history. Each period is determined by three basic criteria: a geographical rebalancing among major civilizational areas, an increase in the intensity and extent of contact across civilizations (or, in the case of the earliest period, crossregional contact), and the emergence of new and roughly parallel developments in many major civilizations. Based on "comparative work and focuses on global processes," this text helps students see the history of the world as one based on multiple disciplines. - Publisher.*

*The ideal textbook for the AP® World History classroom, Ways of the World focuses on significant historical trends, themes, and developments in world history, while building AP® skills. Authors Robert Strayer and Eric Nelson provide a thoughtful and insightful commentary that helps students see the big picture, while modeling historical thinking. ***While world history materials date back to prehistoric times, the field itself is relatively young. Indeed, when the first edition of Peter Stearns's best-selling World History in Documents was published in 1998, world history was poised for explosive growth, with the College Board approving the AP world history curriculum in 2000, and the exam shortly thereafter. At the university level, survey world history courses are increasingly required for history majors, and graduate programs in world history are multiplying in the U.S. and overseas. World events have changed as rapidly as the field of world history itself, making the long-awaited second edition of World History in Documents especially timely. In addition to including a new preface, focusing on current trends in the field, Stearns has updated forty percent of the textbook, paying particular attention to global processes throughout history. The book also covers key events that have altered world history since the publication of the first edition, including terrorism, global consumerism, and environmental issues.***

The Financial Crisis Inquiry Report, published by the U.S. Government and the Financial Crisis Inquiry Commission in early 2011, is the official government report on the United States financial collapse and the review of major financial institutions that bankrupted and failed, or would have without help from the government. The commission and the report were implemented after Congress passed an act in 2009 to review and prevent fraudulent activity. The report details, among other things, the periods before, during, and after the crisis, what led up to it, and analyses of subprime mortgage lending, credit expansion and banking policies, the collapse of companies like Fannie Mae and Freddie Mac, and the federal bailouts of Lehman and AIG. It also discusses the aftermath of the fallout and our current state. This report should be of interest to anyone concerned about the financial situation in the U.S. and around the world. THE FINANCIAL CRISIS INQUIRY COMMISSION is an independent, bi-partisan, government-appointed panel of 10 people

that was created to "examine the causes, domestic and global, of the current financial and economic crisis in the United States." It was established as part of the Fraud Enforcement and Recovery Act of 2009. The commission consisted of private citizens with expertise in economics and finance, banking, housing, market regulation, and consumer protection. They examined and reported on "the collapse of major financial institutions that failed or would have failed if not for exceptional assistance from the government." News Dissector DANNY SCHECHTER is a journalist, blogger and filmmaker. He has been reporting on economic crises since the 1980's when he was with ABC News. His film In Debt We Trust warned of the economic meltdown in 2006. He has since written three books on the subject including Plunder: Investigating Our Economic Calamity (Cosimo Books, 2008), and The Crime Of Our Time: Why Wall Street Is Not Too Big to Jail (Disinfo Books, 2011), a companion to his latest film Plunder The Crime Of Our Time. In this new collection of essays on the Vietnam War, eminent scholars of the Second Indo-china conflict consider several key

factors that led to the defeat of the United States and its allies. The book adopts a candid and critical look at the United State's stance and policies in Vietnam, and refuses to condemn, excuse, or apologize for America's actions in the conflict. Rather, the contributors think widely and creatively about the varied reasons that may have accounted for the United State's failure to defeat the North Vietnamese Army, such as the role played by economics in America's defeat. Other fresh perspectives on the topic include American intelligence failure in Vietnam, the international dimensions of America's defeat in Vietnam, and the foreign policy of the Democratic Republic of Vietnam. None of the essays have been previously published, and all have been specifically commissioned for the book by its editor, Marc Jason Gilbert.

***In February 1861 Tsar Alexander II issued the statutes abolishing the institution of serfdom in Russia. The procedures set in motion by Alexander II undid the ties that bound together 22 million serfs and 100,000 noble estate owners, and changed the face of Russia. Rather than presenting abolition as an 'event' that happened in February 1861, The Abolition of Serfdom in Russia presents the reform as a process. It traces the origins of the abolition of serfdom back to reforms in related areas in 1762 and forward to the culmination of the process in 1907. Written in an engaging and accessible manner, the book shows how the reform process linked the old social, economic and political order of eighteenth-century Russia with the radical transformations of the late nineteenth and early twentieth centuries that culminated in revolution in 1917.***

*Western civilization and world history are often seen as different, or even mutually exclusive, routes into historical studies. This volume shows that they can be successfully linked, providing a tool to see each subject in the context of the other, identifying influences and connections. Western Civilization in World History takes up the recent debates about the merits of the well-established 'Western civ' approach versus the newer field of world history. Peter N. Stearns outlines key aspects of Western civilization - often assumed rather than analyzed - and reviews them in a global context. Completely updated to include with new chapters, this is second edition is a fascinating exploration of what happens to established ideas about men and women, and their roles, when different cultural systems come into contact.*

*economic and social well-being. U.S. expansionists assumed a mandate to civilize non-Western peoples by demanding submission to American technological prowess and design. As an integral part of America's national identity and sense of itself in the world, this civilizing mission provided the rationale to displace the Indians from much of our continent, to build an island empire in the Pacific and Caribbean, and to promote unilateral--at times military--interventionism throughout Asia. In our age of smart bombs and mobile warfare, technological aptitude remains preeminent in validating America's global mission. Michael Adas brilliantly pursues the history of this mission through America's foreign relations over nearly four centuries from North America to the Philippines, Vietnam, and the Persian Gulf. The belief that it is our right and destiny to remake foreign societies in our image has endured from the early decades of colonization to our current crusade to implant American-style democracy in the Muslim Middle East. Dominance by Design explores the critical ways in which technological superiority has undergirded the U.S.'s policies of unilateralism, preemption, and interventionism in foreign affairs and raised us from an impoverished frontier nation to a global power. Challenging the long-held assumptions and imperatives that sustain the civilizing mission, Adas gives us an essential guide to America's past and present role in the world as well as cautionary lessons for the future.*

In *Peace in World History*, Peter N. Stearns examines the ideas of peace that have existed throughout history, and how societies have sought to put them into practice. Beginning with the status of peace in early hunter-gatherer and agricultural societies, and continuing through the present day, the narrative gives students a clear view of the ways people across the world have understood and striven to achieve peace throughout history. Topics covered include: Comparison of the 'pax Romana' and 'pax Sinica' of Rome and China Concepts of peace in Buddhism, Christianity, and Islam, and their historical impact The place of peace in the periods of expanding
