work—something that sets your work apart from the barrage of images we are all inundated with on a daily basis. As Laurie and Kyle Klein prove in their new book, infrared capture may be that magic bullet. Infrared photographs have a mystical feel. Before the dawn of digital capture, infrared light waves, which are invisible to the naked eye, could only be captured using specialized films that required precise handling and a level of technical proficiency that most photographers lacked.

Today, infrared films are largely unavailable; digital infrared is the wave of the future, and most photographers have a retired digital camera (whether an older-model DSLR or an old point & shoot camera) on hand that they can permanently modify for digital-only capture. So, you're ready to jump in and try your hand at producing wildly different images. Where do you start? In this book, Laurie and Kyle Klein present a brief history of infrared, then move on to discuss all of the nitty-

gritty technical information you'll need to understand how those invisible wavelengths will be recorded in your camera and the steps you'll need to take to ensure the best-possible resulting photographs. The authors provide a plethora of sample images that show you how various materials—from skin, hair, and eyes to environmental subjects like the sky, trees, grasses, and clouds—will appear in your images. They also teach you how to previsualize the final image: You will

You will also learn how to effectively frame your subject(s) and scenes to draw the viewer's gaze into and through the frame in a predictable manner, and keep him or her visually engaged. With the basic theories of infrared capture and image design deftly handled, the authors discuss further artistic applications. You'll learn how to add selective color to your

This book examines the tangled responsibilities of states, companies, and individuals surrounding human rights in the digital age. Digital technologies have a huge impact — for better and

worse — on human lives; while they can clearly enhance some human rights, they also facilitate a wide range of violations. States are expected to implement efficient measures against powerful private companies, but, at the same time, they are drawn to technologies that extend their own control over citizens. Tech companies are increasingly asked to prevent violations committed online by their users, yet many of their business models depend on the accumulation and exploitation of users' personal data. While civil society has a crucial part to play in upholding human rights, it is also the case that individuals harm other individuals online. All three

stakeholders need to ensure that technology does not provoke the disintegration of human rights.

Bringing together experts from a range of disciplines, including law, international relations, and journalism, this book provides a detailed analysis of the impact of digital technologies on human rights, which will be of interest to academics, research students and professionals concerned by this issue.

In this fifth edition of *The Practical Zone System*, Chris Johnson updates his classic manual on Ansel Adams's landmark technique for the digital age. The simple visual language called Previsualization will help you to

"This book is as much about painting as it is about the digital world. But beyond both it's really about visual intelligence. What makes it a joy to read is the lovely match between Faure Walker's subject and his style of writing: apparently artless, just making itself up as it goes along, but actually always with a witty spring, and never slack." -- MATTHEW COLLINGS, artist, critic, author, and television host "As a painter himself, James Faure Walker opens up a provocative dialogue between painting and digital computing that is essential reading for all painters interested in new

technologies." -- IRVING

SANDLER, author, critic, and art historian "Faure Walker has a distinguished background as both a painter and digital artist. He is an early adopter of digital technology in this regard, so has lived the history of the ever-accelerating embrace of the digital. On top of this, he is a good storyteller and a clear writer who avoids the pitfalls of pretentious art-world jargon." -- LANE HALL, digital artist and professor "Using a wide stream of fresh water as a metaphor, Faure Walker depicts a flow of ideas, concepts, and solutions that result in digital art. All the core elements of an art-style-in-making are here: ties with mainstream and traditional

art, stages of technological progress, and reflections on the bright and varied personalities of digital artists. With a personal approach, Faure Walker presents vibrant, exciting, emotionally overpowering art works and describes them with empathy and imagination. This entertaining, sensitive, and observant book itself flows like a river." -- ANNA URSYN, digital artist and professor

"Something like this book is overdue. I am not aware of any comparable work. Lots of 'how to do,' but nothing raising so many interesting and critical questions." -- HANS DEHLINGER, digital artist and professor

"Here is the intimate narrative of a passionate yet

skeptical explorer who unflinchingly records his artistic discoveries and personal reflections. Faure Walker's decades of experience as a practicing painter, art critic, and educator shine through on every page. The book is an essential resource for anyone interested in digital visual culture." -- ANNE MORGAN SPALTER, digital artist, author, and visual computing researcher This book is about art, written from an artist's point of view. It also is about computers, written from the perspective of a painter who uses them. Painting the Digital River is James Faure Walker's personal odyssey from the traditional art scene to fresh horizons, from hand to digital

painting--and sometimes back again. It is a literate and witty attempt to make sense of the introduction of computer tools into the creation of art, to understand the issues and the fuss, to appreciate the people involved and the work they produce, to know the promise of the new media, as well as the risks. Following his own winding path, Faure Walker tells of learning to paint with the computer, of misunderstandings across the art and science divide, of software limitations, of conversations between the mainstream and digital art worlds, of emerging genres of digital painting, of the medieval digital, of a different role for drawing. As a painter and computer

enthusiast, the author recognizes the marvels of digital paint as well as anyone. But he also challenges the assumption that digital somehow means different. The questions he raises matter to artists of every background, style, and disposition, and the answers should reward anyone seeking insight into contemporary art.

Thom Rouse seems to have an unbridled artistic sensibility. In this book, he offers up for review sixty of his favorite fine-art images. Rouse takes photographers behind the scenes of his creative process, showing the starting point—always a portrait, captured by him—and then details the Photoshop tools and techniques he used and, sometimes, some

“accessory” images that he adds into the mix, to create a dramatically different work of art.

While the components and tone of each image vary from page to page, Rouse strictly maintains that his creative process is based on the idea that each work of art must, at its core, remain photographic. In other words, his fine-art works are enhanced, stylized portraits that transcend the limits typically self-imposed by portrait artists. His

The Terminator film series is an unlikely site of queer affiliation. The entire premise revolves around both heterosexual intercourse and the woman's pregnancy and giving birth. It is precisely the Terminator's indifference to both that signifies it as an unimaginably inhuman monstrosity. Indeed, the films' overarching

contention that humanity must be saved, rooted as it is in a particular story about pregnancy and birth that exclusively focuses on the heterosexual couple and the family, would appear to put it at odds with the political stances of contemporary queer theory. Yet, as this book argues, there is considerable queer interest in the Terminator mythos. The films provide a framework for interpreting shifting gender codes and the emergence of queer sexuality over the period of three decades. Significantly, the series emerges in the Reagan 80s, which marked a decisive break with the sexual fluidity of the 70s. As a franchise and on the individual basis of each film, The Terminator series combines both radical and reactionary elements. Each film reflects the struggles over gender and sexuality specific to its release. At the same time, the series foregrounds the intersection of technology

and gender that has become a definitive aspect of contemporary experience. A narrative organized around a conservative view of female sexuality and the family, the Terminator myth is nevertheless a richly suggestive narrative for queer theory and gender studies.

Explores how suburban space and the body are racialized in American film. This book is the first anthology to explore the connection between race and the suburbs in American cinema from the end of World War II to the present. It builds upon the explosion of interest in the suburbs in film, television, and fiction in the last fifteen years, concentrating exclusively on the relationship of race to the built environment. Suburb films began as a cycle in response to both America's changing urban geography and the re-segregation of its domestic spaces in the postwar era, which excluded African Americans, Asian Americans, and Latinx from the suburbs while buttressing whiteness. By defying traditional categories

and chronologies in cinema studies, the contributors explore the myriad ways suburban spaces and racialized bodies in film mediate each other. Race and the Suburbs in American Film is a stimulating resource for considering the manner in which race is foundational to architecture and urban geography, which is reflected, promoted, and challenged in cinematic representations. Merrill Schleier is Professor Emeritus of Art and Architectural History and Film Studies at the University of the Pacific. They are the author of Skyscraper Cinema: Architecture and Gender in American Film.

ABOUT THE AUTHORS Dorothea Beisser, born and raised in Windsbach, Germany, was drawn

to craftsmanship and creative work at a young age. She earned a tailoring apprenticeship diploma in high school and set off to discover the world at 19. She then returned to Nuremberg to earn a two-year master craftsman certificate in fashion and in 1974 took off on a new adventure to Paris, the “ Cité de la Mode ” . After studying French, she attended the “ Guerre Lavigne ” fashion school (it became the ESMOD International Fashion School) to expand her design and patternmaking skills. In 1976, she went to Nice to work for the clothing label “ Atmosphere ” and returned to Paris in 1979 to work with Frederik Strobel at his design office (they met during her

early years in Paris). She began working freelance in 1984 and opened her Paris workshop in 1988. Always ready for new challenges, she returned to Germany to teach at ESMOD International Fashion School 's new branch in Munich (opened in 1989) and Berlin (1994). Dorothea Beisser has achieved much during her career and is deeply thankful to her parents, her sister Eva and especially her sister Christiane, who has helped her in both words and deeds for the past 25 years. Vanessa Morin describes her work as progressive, mystic and recognizable. This German-born designer (1985) lived and worked in Paris for a few years before she

started designing under her own name. Before that she had a long career path – first exploring various artistic and creative fields before discovering a passion for fashion design. She studied fashion design and pattern making at the ESMOD International Fashion School in Munich where she graduated with the “ Prix Createur ” in 2007. She also received several other young designer awards in Spain, Beijing, Berlin and Norway and shortly (to no one ’ s surprise) joined the high-end, avant-garde fashion house Damir Doma. In 2012, after five years working with Doma, she returned to Munich to launch the VANESSAMORIN label that she

describes as “elaborated, progressive fashion for women with confidence, designed with a devotion to fine elements and precise details”. In 2013 she began teaching fashion design to final-year students at the Munich affiliate of her alma mater, ESMOD International Fashion School, and soon became the school’s artistic director. This book on fashion illustration, created with Dorothea Beisser, is her way to focus on the beautiful work of ESMOD Munich students and inspire future fashion students worldwide.

This report examines modern childhood, looking specifically at the intersection between emotional well-being and new technologies. It explores how parenting and friendships have changed in the digital age. It examines children as digital citizens, and how best to take advantage of online

opportunities while minimising the risks. The volume ends with a look at how to foster digital literacy and resilience, highlighting the role of partnerships, policy and protection.

Step-by-Step Digital Nude Photography considers all the advantages that digital photography and image-editing software have brought to photographing the nude. It discusses the whole process: from sourcing the right equipment, through finding a model

and a location, to the actual shooting and editing of the pictures, and finally the different media in which you can exhibit your work.

This book provides a fresh overview on the debate about the remarkable regression of gender equality in the Balkans and South Caucasus caused by the fall of socialism and by the revitalization of religion in Turkey. Contrary to the prevailing opinion of researchers who state continuous

male domination, the book presents strong arguments for an alternative outlook. By contrasting the realia of gender relations with the utopia of new femininities and new masculinities driven by digital visual communication, the book provokingly concludes with the arrival of two utopias: the Marlboro Man - still authoritative but lonely - conquering and refusing family obligations; and with the emergence of a new

femininity type - strong and beautiful. As such this book provides a great resource to anthropologists, demographers, sociologists, gender and media researchers and all those interested in feminist issues.

This how-to digital photography book, in a coffee table book format, focuses on image manipulation in Photoshop, the most popular and best-selling photo editing software. This book appeals to a

large audience: anyone interested in the new frontier of where digital technology and the art of erotic photography meet, photographers currently working with nude and/or erotic imagery who want to apply digital effects to their work, or for those who simply appreciate the art and want a book that showcases this form. Erotic and nude images have always occupied a special place in the realm of photography. These images are both controversial and ever-

popular, and the development of digital technologies has opened the doors to new possibilities within this art form. This book offers a thematic overview of this area and provides a showcase of some of the best talents currently working in the field, who were selected because their work is experimental, original, and visually arresting. These artists are interviewed and the text demonstrates how the images were created,

from the original shot of the nude model through to the finished erotic image via screenshots that reveal the stages through which the photographer achieved their vision.

This compelling new study considers contemporary painting's relationship with time and with events, ideas and paintings from the past. Following French philosopher Jean-François Lyotard's determination of painting as entailing a series of temporal sites, Painting, History and Meaning examines works that tendentiously engage with aspects and events derived from the past. A unique examination of the relationship that contemporary

painting has with history and historical material, Painting, History and Meaning is a timely response to, and discussion of, how contemporary painters and artists have addressed a significant area of concern for both practitioners and theorists in recent years. Craig Staff explores art that has encompassed strategies of excavation, anachronism and memorialization, examining key works by artists including Dana Schutz, Tomma Abts, Gerhard Richter, Marlene Dumas, Johannes Phokela and Taus Makhacheva. A scholarly examination of contemporary painting through an innovative interdisciplinary research methodology, this fascinating study illuminates the complex relationship between painting and history. Primary readership will be the fine art academic community, art and painting

practitioners, scholars and academics. Will appeal to second and third year undergraduate and postgraduate students of fine art and art history. Of interest to students of cultural studies, history, curatorial studies and continental philosophy, and to those in the visual arts wanting to develop their understanding of contemporary art.
