On October 5, 2011, the news of the death of technology innovator Steve Jobs rocked the world. The failing health of the Apple cofounder and Pixar CEO was no secret. Jobs had given up his role as Apple's CEO just a few months prior because of his struggle with pancreatic cancer. But his death still drew a huge reaction. From Apple employees and fans to political and business leaders, people honored Jobs's passing by reflecting on his prolific life that greatly influenced the way technology is used. In 1976, Jobs founded Apple Computer with Steve Wozniak. As the leaders of Apple, they developed concepts—such as navigating by using a mouse to click screen icons—that shaped the way we use and interact with computers. Jobs's forward-thinking engineering also influenced pop culture, bringing us a music revolution with the iPod, the ultimate communication device with the iPhone, and some of the first computer-animated films through Pixar. Called by some "the da Vinci of our time," Jobs used his innovation and vision to help advance technology like no other. He lived his life following a simple premise: "The only way to be truly satisfied is to do what you believe is great work. And the only way to do great work is to love what you do."

The Extraordinary Life of Steve Jobs

Steve Jobs- Success and Survival Lessons

Steve Jobs is best known for being a co-founder of Apple Inc. Before Apple Inc., he was a brilliant designer and inventor who approached business with an unexpected savvy and joy of discovery. Jobs created gadgets that transformed today’s digital era and leaves behind the legacy of a true visionary.

An examination of one of the greatest success stories of the digital age looks at the success Steve Jobs has had with Pixar and his rejuvenation of Apple through the introduction of the iMac and iPod.

Steve Jobs was an American entrepreneur, businessman, inventor, and industrial designer. Jobs was the chairman, and the chief executive officer (CEO), and a co-founder of Apple Inc.; CEO and majority shareholder of Pixar; a member of The Walt Disney Company's board of directors following its acquisition of Pixar; and founder, chairman, and CEO of NeXT. Jobs and Apple co-founder Steve Wozniak are widely recognized as pioneers of the microcomputer revolution of the 1970s and 1980s. He was born in San Francisco to parents who had to put him up for adoption at birth; he was raised in the San Francisco Bay Area during the 1960s. Jobs then attended Reed College in 1972 before dropping out, and decided to travel through India in 1974 seeking enlightenment and studying Zen Buddhism. Jobs's declassified FBI report stated that Jobs had used marijuana (the formerly illegal drug in California), and LSD while he was in college. Jobs once told a reporter that taking LSD was "one of the two or three most important things" he did in his life. Jobs and Wozniak co-founded Apple in 1976 to sell Wozniak's Apple I personal computer. The visionaries gained fame and wealth a year later for the Apple II, one of the first highly successful mass-produced personal computers. In 1979, after a tour of PARC, Jobs saw the commercial potential of the Xerox Alto, which was mouse-driven and had a graphical user interface (GUI). This led to development of the unsuccessful Apple Lisa in 1983, followed by the breakthrough Macintosh in 1984. In addition to being the first mass-produced computer with a GUI, the Macintosh introduced the sudden rise of the desktop publishing industry in 1985 with the addition of the Apple LaserWriter, the first laser printer to feature vector graphics. Following a long power struggle, Jobs was forced out of Apple in 1985. After leaving Apple, Jobs took a few of its members with him to found NeXT, a computer platform development company that specialized in state-of-the-art computers for higher-education and business markets. In addition, Jobs helped to initiate the development of the visual effects industry when he funded the spinout of the computer graphics division of George Lucas's Lucasfilm in 1986. The new company, Pixar, would eventually produce the first fully computer-animated film, Toy Story-an event made possible in part because of Jobs's financial support. In 1997, Apple merged with NeXT. Within a few months of the merger, Jobs became CEO of his former company; he revived Apple at the verge of bankruptcy. Beginning in 1997 with the "Think different" advertising campaign, Jobs worked closely with designer Jonathan Ive to develop a line of products that would have larger cultural ramifications: the iMac, iTunes and iTunes Store, Apple Store, iPod, iPhone, App Store, and the iPad. In 2001, the original Mac OS was replaced with a completely new Mac OS X, based on NeXT's NeXTSTEP platform, giving the OS a modern Unix-based foundation for the first time. Jobs was diagnosed with a pancreatic neuroendocrine tumor in 2003 and died on October 5, 2011, of respiratory arrest related to the pancreatic tumor.

Walter Isaacson's "enthralling" (The New Yorker) worldwide bestselling biography of Apple cofounder Steve Jobs. Based on more than forty interviews with Steve Jobs conducted over two years, as well as interviews with more than 100 family members, friends, adversaries, competitors, and colleagues, Walter Isaacson's portrait touched millions of readers. At a time when America is seeking ways to sustain its innovative edge, Jobs stands as the ultimate icon of inventiveness and applied imagination. He knew that the best way to create value in the twenty-first century was to connect creativity with technology. He built a company where leaps of the imagination were combined with remarkable feats of engineering. Although Jobs cooperated with the author, he asked for no control over what was written. He put nothing off-limits. He encouraged the people he knew to speak honestly. He himself spoke candidly about the people he worked with and competed against. His friends, foes, and colleagues offer an unvarnished view of the passions, perfectionism, obsessions, artistry, devilry, and compulsion for control that shaped his approach to business and the innovative products that resulted. His tale is instructive and cautionary, filled with lessons about innovation, character, leadership, and values. Steve Jobs is the inspiration for the movie of the same name starring Michael Fassbender, Kate Winslet, Seth Rogen, and Jeff Daniels, directed by Danny Boyle with a screenplay by Aaron Sorkin.
