

Stone Age People Make It Work History

The first book on the origin of clothes shows why climate change was crucial - for the origin of agriculture too.

Developed by a team of authors who have spent many years making history accessible to a diverse range of readers, each chapter of MAKING EUROPE begins with clear learning objectives and timelines, and continues with an accessible narrative that uses focus questions throughout the text to help all readers understand historical concepts. The Check-In feature and the Test Yourself questions at the end of each chapter help you assess your understanding of the material. The text uses stories of ordinary people and their impact on history, and visually stunning images and maps that make learning history interesting. Available in the following split options: MAKING EUROPE, Second Edition Complete; Since 1300; Volume 1: To 1790; and Volume 2: Since 1550.

Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

STONE AGE, BONE AGE takes a young child on an imaginative adventure back in time - back to the stone age when people dressed in skins and hunted for woolly mammoths. Carried along by an engaging, lyrical text, we discover all about how stone age people lived, the tools they used and the food they ate,

how they dressed and where they slept. Finally, we visit a magic place, deep in a cave, where beautiful paintings flicker in the torchlight and wild dancing takes place... 'Stamp like stag Dance like a bear ' and celebrate 'Stone Age, Bone Age, What a clever age '. This book is truly unique, and an exceptional addition to the Wonderwise series from an award-winning author-illustrator team.

Learn all about the SAVAGE STONE AGE, with all the nasty bits left in. You probably thought that Stone Age people spent all their time standing stones up on one end and rubbing sticks together to make fires. Find out the horrible truth, like what they used instead of toilet paper, why a hole in the skull is good for headaches and how to make a Stone Age mummy. These bestselling titles are sure to be a huge hit with yet another generation of Terry Deary fans in this brand-new ebook format.

The Stone Age

Paleolithic Seafaring in the Mediterranean

Changes in Britain from the Stone Age to the Iron Age is a fascinating account of British history from a period that begins around 840,000 when hunter-gatherers were just beginning to use tools, up to 55BC when the Romans first arrived in Britain. The book describes how settlers began early forms of mining and farming, how they made their homes and how they began to trade with other countries.

Find out more about life at Skara Brae, the Great Orme Mine and the Lewes Hoard in this amazing history of early British life.

Two anthropologists explain their research into Stone Age tools and new theories about the role of toolmaking in human evolution

Now in its third edition, History 5-11 aims to make teaching about the past exciting and stimulating for both teachers and children. Focusing on the English National Curriculum for History (2013), and with an emphasis on the importance of learning about the past through the processes of historical enquiry, History 5-11 contains case studies, lesson planning guidance and methods to develop pupils' historical understanding. It offers creative and innovative ways to teach the subject of history, refreshing teachers' confidence in teaching the 2013 curriculum, and is illustrated by new case studies and research. This fully updated third edition includes:

- References to the 2013 National Curriculum, its aims and purposes, and its content and processes for Key Stages 1 & 2*
- Guidance on making local, national and global connections between societies over time*
- Planning for assessment and progression*
- New research and illustrative case studies*
- New sections on local history and links to oracy*
- Updates to all existing chapters*
- Reflection on practice and research: undergraduate, Masters level and PhD.*

This textbook is an invaluable resource to all trainee and practising primary teachers interested in teaching history in an accessible, dynamic and above all, enjoyable way.

A British scholar challenges the conventional view of the

Stone Age as minimally civilized, pointing out the many advances of its peoples, from their maps of the constellations to their innovations in boat building.

Prehistoric Japan

Stone Age, Bone Age

The first humans in Britain could walk to Europe over dry land and shared their space with mammoths and sabre toothed cats. Using stone tools and fire, humans gained the upper hand. Over thousands of years, they made homes, began farming crops and animals and learned to use metal. They laid the foundations of modern Britain. Made for the KS2 History curriculum, these eight titles are packed with amazing historical facts and inspiring images. These handy guides explore the distant past, surviving historical evidence and the impact of our ancestors on our lives today.

Readers can discover all the facts about the SAVAGE STONE AGE such as what they used instead of toilet paper, why a hole in the skull is good for headaches and how to make a Stone Age mummy. With a bold new look, these bestselling titles are sure to be a huge hit with yet another generation of Terry Deary fans. Revised by the author and illustrated throughout to make HORRIBLE HISTORIES more accessible to young readers.

This book examines daily life for children in Prehistoric Britain. Chapters focus on the Stone, Bronze and Iron ages, looking at family life, finding food, education, religion, art, culture and much more.

Making Europe: The Story of the West, Volume I to 1790

Team up with Dar, who lived around 15,000 years ago in the late Stone Age. Find out what it takes to survive in prehistoric times as he teaches you how to: ? trap animals ? make fire ? build shelters ? hunt a mammoth Do you have the skills and guts to be a Stone-Age hunter?

A fashion-forward guide to living well with crystals from the jewelry editor of British Vogue—including guidance and advice from designers, jewelers, and celebrity crystal fans.

The New Stone Age guides you through fifteen different types of stones, categorized by color, and teaches you how stylishly incorporate them into your wardrobe, home, and beyond. Assigning each crystal to a particular ailment of the modern age, whether it's self-doubt, travel anxiety, or restlessness, Carol Woolton explains how a simple crystal worn around your neck, tossed in your purse, or sitting next to your computer can help inspire you to make positive changes in your life. Woolton traces the history of crystals showing how the same quartz that was used as a form of protection in the handles of Egyptian daggers can also be hung near a bedside to help with burnout. Filled with insights, facts, and real-life stories from people who attribute dramatic personal improvements to their crystals, The New Stone Age is a fun and informative idea book for crystal

lovers everywhere.

Branding the present-day as The Neolithic Age was the most brilliant marketing ploy of our generation. Products from smartphones through electric cars to wind farms use increasing amounts of rare and semi-rare earth elements. Companies involved in mining, refining and production decided to come together and promote these elements as cornerstone of our civilisation. And it worked. The ploy's sole drawback was that it crystallised opposition to these corporate interests, opposition that has only grown bolder and more aggressive over time. When the largest of the companies gives an invaluable gift to a struggling museum, the museum becomes a lightning rod for this conflict, dangerously upending the lives of everyone involved.

This simple information book uncovers the history of Stone Age people and how they lived, from their clothing and houses to monuments such as Stonehenge which still survive today. Full of facts, colourful illustrations and photographs of historical artefacts such as baked pots, tools and jewellery. Ideal for beginner readers who prefer fact to fiction, and those studying the Stone Age at school. Internet links take readers to specially selected websites to find out more.

The Space Age Kid's Guide To The Stone Age Skill Of Flint Knapping Making Arrowheads Out Of Rock. For curious kids and young scientists alike ... who want to try it for themselves. Learn that ancient human craft of breaking stone to make tools and hunting weapons ... you can get the basics in just a few minutes. Mastery of the skills of flint knapping can take years. This is the information you need to get started. Welcome to flint knapping ... the ancient art and craft of breaking natural stone to produce tools and hunting weapons. The essential survival skill of untold generations of human beings around the globe. These are the same processes which people used for thousands of years, in all regions of the world, before the discovery of metals and the various ways to make metal tools. By trying out these skills, you will learn how to break rock so you really can make stone arrowheads yourself. First, we will look at examples of ancient stone artifacts, for

reference and for inspiration. Then, you will be introduced to the ancient and modern tools of flint knapping and resources for getting or making those tools. We will also discuss readily available and workable alternative tools which can be used to do the work for a new stone knapper. We will look at some different kinds of stone and rock which can be used for making arrowheads. You'll see stone breaking processes: first, percussion activities which are useful for making chips and blades. Then, pressure flaking techniques which are used to shape chips and blades of stone into a variety of planned arrow points. Some ancient technical secrets of the skill will be disclosed and illustrated, including specific ways to prepare the stone for pressure flaking, trimming the thin edges and using grind stones to abrade the edge so your flaking tool gets a good grip and does not slip off when you apply pressure at the edge. And we will talk about the attitude and intent which is needed to break stone ... to master it. It's all here in "The Space Age Kid's Guide To The Stone Age Skill Of Flint Knapping Making Arrowheads Out Of Rock." Now, let's get started. Order your copy today. Read it and study it for a few hours, enjoy the hobby and skill of flint knapping for many years.

achievement award.

Did any of the earliest humans have emotions and feelings
like us? Is there something from long-ago that makes us
so attracted to sugar? Why is it that up to 4% of our DNA
is from the species of Neanderthals? Do humans have an
innate urge for pair bonding? In the book, *Almost Like
Us: Peoples of the Stone Age* answers to provocative
questions about the Stone Age get a fresh look. *Almost
Like Us* describes the fascinating lives of early humans
and how the distant past underpins our current behavior.
Sifting through layers in the fossil records, the book

exposes the dawning of a humankind that faced and overcame difficult circumstances with a determination not so different from our own. This humanistic view of Stone Age peoples shines a revelatory light on some of our present-day conduct that has its roots in prehistory.

Written in an accessible narrative and without technical jargon, *Almost Like Us* is a stimulating and immensely enjoyable book that is not only filled with basic facts from conventional authorities, but also a kaleidoscope of outlooks not usually covered in standard textbooks. With the freedom of a dedicated enthusiast, author Ivy Hendy presents hypotheses and theories about which researchers have less room to speculate. Throughout the book the humanity and struggles of peoples of the Stone Age are explored along with times of unexpected humorous circumstances. *Almost Like Us: Peoples of the Stone Age* is the grand story of humankind at the edge of history. For a short video, go to: <https://youtu.be/YerK-6oGbas>

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

The reader's choices determine whether three friends will survive after being mysteriously transported back in time to the Neolithic Era, when humans were first learning to farm and harvest and to domesticate animals.
