All questions are sorted according to the sub chapters of the new STPM syllabus. Questions and sample answers with full workings are provided. Some of sample solutions included are collected from the forums online. Please be reminded that the sample solutions are not 100% following the real STPM marking scheme. 6.1 Vectors in two and three dimensions 6.2 Vector geometry

This is a selection of my " Letters to the Editor " that were published in two local dailies, The Star and New Straits Times (NST), over the period from Dec 2007 to August 2013. These letters relate my experiences in leading and managing schools and embody my thoughts and propositions for school improvement, enrichment as well as innovation. The letters are not presented in chronological order following their dates of publication. Instead, they are grouped according to specific sections of interest. Nevertheless, I am mindful of the fact that school matters often overlap and school issues cannot be tackled in discrete units. An integrated and holistic approach should be applied. And, thinking out of the box so as to bring about innovation and even " transformation " is very much advocated all through my letters. Schools are where national education policies are being piloted, modified and if appropriate, then implemented in full. Stake holders for the wellbeing, upgrading and progress of a school must of necessity include more than merely its students, parents, teachers and administrators. ix The Education Ministry, state and district education offices, other related ministries, the community, private sectors and certainly some non-government organizations (NGOs), all have important roles to play in ensuring the smooth and efficient running of our schools. I have looked within and outside of schools for causes and effects that have bearing on school matters. The letters included in the " Values " section in particular, bear out the familial and societal influence and impact on school life. It is hoped that this compilation can be a useful reference and resource materials for all planners, executors, learners and evaluators of our school improvement initiatives and programmes. August 2013 --- LIONG KAM CHONG

Information on the educational system of Malaysia and guidelines on the placement of Malaysian students in U.S. high schools and colleges are presented. After a brief introduction on the country and the educational system, attention is directed to preschool, primary, and secondary education. Included are reproductions of certificates of completions and grade reports from different schools, along with information on grading systems. Information is also provided on: pre-university education (higher school, university matriculation programs, and diploma programs); teacher training, including continuing education for school personnel, university education; other tertiary-level education; and nursing, occupational and physical therapy and other allied health programs. Profiles of national universities, polytechnics, and other institutions are included, as are reproductions of sample diplomas and related documents. Guidelines are provided to help admissions officers determine the admissibility and appropriate level of placement of Malaysian students in U.S. institutions. Appended are a glossary and list of acronyms, information on examination subjects for the country's college entrance tests, and lists of Malaysian independent Chinese secondary schools, institutes of agriculture, teacher training colleges, colleges and universities, and a list of occupations requiring vocational training. Actual Exam Papers STPM 2005-2010

*This book covers the narratives of three authors who have different educational backgrounds, academic experiences, and fields of study. It interrogates and discusses the topic of educational assessment in different education systems, which represent eastern and western cultures and political contexts. The book provides recommendations for developing teachers' assessment literacy in teacher education and professional development programs. It also serves as a springboard for futher inquiry into the subject.*

*This revised and updated edition of the Chronicle of Malaysia brings the full dramatic sweep of Malaysia's history up to date, taking the reader through the nation's first 50 years from the formation of Malaysia in 1963 all the way to 2013. It is packed with illustrated news stories covering hundreds of the nation's key social, political, cultural and sporting events. As a compendium of all aspects of Malaysian life, the book captures the mood of the day with a sense of vividness and immediacy. Concise, accessible articles—revised and rewritten to engage today's*

readers—are introduced by headlines and liberally illustrated with photographs and specially commissioned cartoons. The book is structured chronologically, with an average of eight pages devoted to each year beginning with a succinct summary of the year's key events. A host of themes are covered: not just the major political and economic events but also the human side of the Malaysian experience—sports, fashion, music, the arts, architecture, lifestyle, disasters, crime and the social scene. These combine to give readers the feel of each era of Malaysia's past and enables them to draw parallels with the present.

This book discusses multilingual postcolonial common law, focusing on Malaysia's efforts to shift the language of law from English to Malay, and weighing the pros and cons of planned language shift as a solution to language-based disadvantage before the law in jurisdictions where the majority of citizens lack proficiency in the traditional legal medium. Through analysis of legislation and policy documents, interviews with lawyers, law students and law lecturers, and observations of court proceedings and law lectures, the book reflects on what is entailed in changing the language of the law. It reviews the implications of societal bilingualism for postcolonial justice systems, and raises an important question for language planners to consider: if the language of the law is changed, what else about the law changes?

**Weaving outwards from a centripetal force of biographical stances, this book presents the collective perspectives of literacy researchers from Brunei, China, Hong Kong, Malaysia, Singapore, the Philippines and Taiwan. It represents the first all-Asian initiative to showcase the region's post-colonial, multilingual and multicultural narratives of literacy education. This book provides a much-needed platform that initiates important conversations about literacy as a sociocultural practice in a region that is both challenged and shaped by sociocultural influence unique to Asia's historical and geopolitical trajectory. Driven by the authors' lived experiences of becoming literate as well as their empirical research work in later years, each chapter brings decades of biographical narratives and collective empirical research findings to bear. Within the book are negotiations about literacy across and within home and school contexts; transactions of literature, text and reader; and considerations of the literacy policy-practice nexus. These trajectories, while divergent in their issues, come together as shared lived experience located in local contexts considered through global perspectives. As Asia looks set to become the 21st century's new economic and labour force, the need to understand the sociocultural milieu of this region cannot be understated. This book on literacy education in Asia contributes to the larger narrative.**

The continual rise of English as a global lingua franca has meant that English literature, both as a discipline and as a tool in ESL and EFL contexts, is being used in varied ways outside the inner circle of English. This edited collection provides an overview of English literature education in global times, bringing to international attention a rich understanding of the trends, issues and challenges specific to nations within the region. Comprising contributions from Australia, China, Hong Kong, India, Indonesia, Malaysia, Philippines, Singapore and Vietnam, the collection addresses the diversity of learners in different national, cultural and teaching contexts. In doing so, it provides insights into historical and contemporary literature education, foregrounds specific issues and challenges in policymaking and implementation, presents practical matters concerning the use of literature in the language classroom, innovative practices in literature education, and raises pressing and important questions about the purpose and importance of literature education in global times.
