The Association of Chartered Certified Accountants (ACCA) is the global body for professional accountants. With over 100 years of providing world-class accounting and finance qualifications, the ACCA has significantly raised its international profile in recent years and now supports a BSc (Hons) in Applied Accounting and an MBA. BPP Learning Media is an ACCA Official Publisher. Paper P5 Advanced Performance Management is an optional paper at Professional level. It builds on the performance management techniques introduced in Paper F5. There is also a significant element of strategic thinking and thus P5 has links with paper P3 Business Analysis. The syllabus looks at external factors that affect the organisation's performance such as stakeholders. Internal factors are also considered including the design features of effective performance management information and monitoring systems. Ethics is introduced as a key ACCA topic. Finally, the syllabus considers the impact of current developments in management accounting and performance management on organisational performance. The P5 Revision Kit contains the pilot paper and subject-specific questions covering the syllabus, including many from past exams. The Kit is full of good advice and features to aid your question practice. Read the section on Passing P5 which is subject-specific guidance on tackling the exam. There are plenty of written questions to test your application and evaluation of knowledge at this level. The examiner likes to examine performance measures so there are several exam-standard numerical questions too. Also read the examiner's own comments on past questions as well as his own answers at the back of the Kit. BPP Learning Media is the publisher of choice for many ACCA students and tuition providers worldwide. Join them and plug into a world of expertise in ACCA exams.

The Ultimate Guide to Compact Cases

Examines why public administration's literature has failed to justify the profession's legitimacy as an instrument of governance. Michael Harmon employs the literary conceit of a Final Exam, first "written" in the early 1930s, in a critique of the field's answers to the legitimacy question. Because the assumptions that underwrite the question preclude the possibility of a coherent answer, the exam should be canceled and its question rewritten. Envisaging a public administration no longer hostage to the legitimacy question, Harmon explains how the study and practice of public administration might proceed from adolescence to maturity. Drawing chiefly from pragmatist philosophy, he argues that despite the universal rejection of the "politics/administration" dichotomy on factual grounds, the pseudo-problem of legitimacy nonetheless persists in the guise of four related conceptual dualisms: 1) values and facts, 2) thinking and doing, 3) ends and means, and 4) theory and practice. Collectively, these dualisms demand an impossible answer to the practical question of how we might live, and govern, together in a world of radical uncertainty and interdependence. Only by dissolving them can the legitimacy question (Woodrow Wilson's ghost) finally be banished, clearing away the theoretical debris that obscures a more vital and useful conception of governance.

In Strategic Management: Theory and Practice, Fourth Edition, John A. Parnell leads readers through detailed, accessible coverage of the strategic management field. Concise and easy to understand chapters address concepts sequentially, from external and internal analysis to strategy formulation, strategy execution, and strategic control. Rather than relegating case analysis to a chapter at the end of the book, Parnell aligns each chapter's key concepts with 25 case analysis steps. Current examples and high interest real-time cases, largely drawn from The Wall Street Journal and Financial Times, illustrate the key role of strategic management in the United States and around the world.
