Cancel culture addresses real harm...and sometimes causes more. It's time to think this through. "Cancel" or "call-out" culture is a source of much tension and debate in American society. The infamous "Harper's Letter," signed by public intellectuals of both the left and right, sought to settle the matter and only caused greater division. Originating as a way for marginalized and disempowered people to take down more powerful abusers, often with the help of social media, cancel culture is seen by some as having gone "too far." Adrienne maree brown, a respected cultural voice and a professional mediator, reframes the discussion for us,

in a way that points to possible ways beyond the impasse. Most critiques of cancel culture come from outside the milieus that produce it, sometimes from even from its targets. Brown explores the question from a Black, queer, and feminist viewpoint that gently asks, how well does this practice serve us? Does it prefigure the sort of world we want to live in? And, if it doesn't, how do we seek accountability and redress for harm in a way that reflects our values?

"Why do I have to read this?" What teacher doesn't dread this question? It usually comes from our most disengaged

students like the class clown or the student who struggles to read and write at grade-level. Sometimes we hear it from a student who cries of boredom or one who is angry or apathetic. When we don't know what else to try, it's easy to become frustrated and give up on these challenging learners. But take heart! Author Cris Tovani has spent her career figuring out how to entice challenging students back into the process of learning. In Why Do I Have to Read This? Cris Tovani shares her best secrets, lessons learned from big fails, and her most effective literacy and planning strategies that hook these hard to get learners. You will meet many of Cris's students inside this book. As she describes some of her favorites, you may even recognize a few of your own. You will laugh at her stories and take comfort in her easily adaptable strategies that help students remove their masks of disengagement. Cris shows teachers how to plan by anticipating students' needs. Her Curriculum You Anticipate structures of Topic, Task, Targets, Text, Tend to me, and Time will literally help you

Inside Why Do I Have to Read This? readers will find: literacy strategies for all content areas that support and engage a wide range of learners so they can read and write a variety of complex text reference charts packed with small bites of instructional shifts that coaches and teachers can use to quickly adjust instruction to re-engage students planning strategies that show teachers how to connect day-to-day instruction so that no day lives in isolation versatile thinksheets that are reproducible and adaptable to different grade levels, content areas, and disciplines Above all, Cris gives teachers energy to get back into the classroom and face students who wear masks of disengagement. She reminds us of the importance of connecting students to compelling topics, rich text, useful targets, and worthy tasks. She reminds us of the importance of tending to students' basic needs and helps us consider how to best structure instructional time. After reading this book, teachers will have new ways to connect with students in a deep, authentic way. Written in a humorous,

compassionate, and wise voice, Why Do I Have to Read This? will provide answers to the pressing questions we have when we try to teach and reach all of our students.

Teaching Readers (Not Reading)

This project is a multi-site, multi-year study designed to test the efficacy of a fully developed intervention, Collaborative Strategic Reading (CSR), with adolescent readers. In year 1, the research questions were: (1) "Does CSR improve reading comprehension for adolescent readers attending relatively low SES schools?"; and (2) "Does CSR improve reading comprehension for adolescent struggling readers attending relatively low SES schools?" This study was conducted in 6 middle schools in Texas and Colorado. Based on the current analysis, the authors conclude that there is a small, significant main effect of CSR on reading comprehension as measured by the Gates-MacGinitie assessment; but that this effect is not statistically significant for struggling readers. The authors believe that the findings from this study suggest that CSR is a feasible and effective practice that can be readily integrated into reading and language arts instruction with positive impact. They are encouraged about the potential effectiveness of this practice because the positive findings from this efficacy study resulted from treatment implementation conditions that are readily replicable. Making Connections teaches an extensive range of reading skills and strategies in order to prepare students for college reading. The current series takes students from a low-intermediate to a low-advanced level of academic reading skill proficiency. In December 2015

two new levels - high beginning and advanced - will be added to the series. The series contains a strong focus on vocabulary-building, including teaching words from the Academic Word List. It emphasizes critical thinking and increased reading speed. The series has a unique unit structure. At the outset of each unit, students are presented with and practice key reading and vocabulary-building skills. As students read the texts following these sections, they apply these skills by completing exercises in boxes in the margins of the readings, so that students literally have to apply the newly-learned skills 'while reading.'

Strategic Reading is a three-level series designed to develop reading, vocabulary-building, and critical-thinking skills. The Teacher's Manual provides an overview of the series and an explanation of the structure of each unit. It includes teaching tips, a complete answer key for each unit, and unit quizzes and answers. The Teacher's Manual also offers cultural notes and optional activities where appropriate.

Reading instruction is too often grounded in a narrowly defined "science of reading" that focuses exclusively on cognitive skills and strategies. Yet cognition is just one aspect of reading development. This book guides K – 8 educators to understand and address other scientifically supported factors that influence each student's literacy learning, including metacognition, motivation and engagement, social – emotional learning, self-efficacy, and more. Peter Afflerbach uses classroom vignettes to illustrate the broad-based nature of student readers' growth, and provides concrete suggestions for instruction and assessment. The book's utility is enhanced by end-of-chapter review questions and activities and a reproducible tool, the Healthy Readers Profile, which can be downloaded and printed in a convenient 8 1/2" x 11" size.

Thinkquiry Toolkit 1 is comprised of five sections: Overview of the Common Core State Standards for English Language Arts & Literacy and the related instructional shifts Selecting the Right Tools for Maximum Learning Laying the Foundation Before Reading/Learning Building New Knowledge During Reading/Learning, and Expanding and Deepening Understanding After Reading/Learning If teachers collaboratively use these practices, strategies, and routines; teach them to students; and use them regularly across content areas, students will develop confidence and competence as readers, writers, and learners.
