**Children in today's world are inundated with information about who to be, what to do and how to live. But what if there was a way to teach children how to manage priorities, focus on goals and be a positive influence on the world around them? The Leader in Meis that programme. It's based on a hugely successful initiative carried out at the A.B. Combs Elementary School in North Carolina. To hear the parents of A. B Combs talk about the school is to be amazed. In 1999, the school debuted a programme that taught The 7 Habits of Highly Effective Peopletto a pilot group of students. The parents reported an incredible change in their children, who blossomed under the programme. By the end of the following year the average end-of-grade scores had leapt from 84 to 94. This book will launch the message onto a much larger platform. Stephen R. Covey takes the 7 Habits, that have already changed the lives of millions of people, and shows how children can use them as they develop. Those habits -- be proactive, begin with the end in mind, put first things first, think win-win, seek to understand and then to be understood, synergize, and sharpen the saw -- are critical skills to learn at a young age and bring incredible results, proving that it's never too early to teach someone how to live well.**

**She wants faith, hope, and love. She wants help and healing. She wants to hear and be heard, to see and be seen. She wants things set right. She wants to know what is true—not partly true, or sometimes true, or almost true. She wants to see Truth itself, face-to-face. But here, now, these things are all cloudy. Hope is tinged with hurt. Faith is shaded by doubt. Lesser, broken things masquerade as love. How does she find something permanent when the world around her is always changing, when not even she can stay the same? And if she finds it, how does she hold on? She Reads Truth tells the stories of two women who discovered, through very different lives and circumstances, that only God and His Word remain unchanged as the world around them shifted and slipped away. Infused with biblical application and Scripture, this book is not just about two characters in two stories, but about one Hero and one Story. Every image points to the bigger picture—that God and His Word are true. Not because of anything we do, but because of who He is. Not once, not occasionally, but right now and all the time. Sometimes it takes everything moving to notice the thing that doesn't move. Sometimes it takes telling two very different stories to notice how the Truth was exactly the same in both of them. For anyone searching for a solid foundation to cling to, She Reads Truth is a rich and honest Bible-filled journey to finally find permanent in a world that's passing away.**

**Newsrooms-and campus newsrooms are no exception-are chaotic, fast-paced, and lively. That's why we love them. But reporting news is an important business, and everyone involved in that business needs some guidance and structure. Covering Your Campus provides the advice, rules, guidelines, and encouragement that every campus newspaper staff needs, without talking down to students or telling them what to do. The reporters and editors of campus newspapers aren't yet professional journalists, but courts have determined that student journalists share the rights and responsibilities of professionals, just as much as campus newspapers are genuine community publications. Laying down the foundation for a healthy publication, Covering Your Campus further helps guide students toward making their newspapers and websites even more indispensable to their campus community life. Its aim, which it shares with the student journalists it addresses, is to make the news, opinions, and entertainment offered in student publications reliable and highly esteemed.**

Textbooks are symbols of centuries-old education. They're often outdated as soon as they hit students' desks. Acting "by the textbook" implies compliance and a lack of creativity. It's time to ditch those textbooks--and those textbook assumptions about learning In Ditch That Textbook, teacher and blogger Matt Miller encourages educators to throw out meaningless, pedestrian teaching and learning practices. He empowers them to evolve and improve on old, standard, teaching methods. Ditch That Textbook is a support system, toolbox, and manifesto to help educators free their teaching and revolutionize their classrooms.

A concise, handy guidebook for teaching correct MLA-style citation to middle and high school researchers.

Based on the premise that students can learn a great deal by reading a newspaper, this book was created by preservice instructors to teach upper elementary students (grades 3-5) newspaper concepts, journalism, and how to write newspaper articles. It shows how to use newspaper concepts to help students integrate knowledge from multiple disciplines as they write about current events and the lives of others in an unbiased and accurate way. Based on the Newspaper in Education program—a cooperative venture between newspaper publishers and schools that offers newspaper activities to teach reading and content skills and strategies—the book takes the concept further and incorporates a focus on writing. The result of these lessons is an actual newspaper that students can publish for their classroom or school. Following an Introduction, the book's seven chapters are as follows: (1) Background Information for Teachers; (2) Teaching Journalism Basics; (3) Interviewing, Writing Quotes, and Using Figurative Language; (4) Elements and Organizational Structure of News Stories; (5) Writing Different Types of Newspaper Stories; (6) The Final Steps: Revision, Editing, Layout, and Publication; and (7) Student Evaluation of Concept Units. Contains 12 references. Appendices provide student worksheets, two sample articles, a layout and design sheet, a glossary of newspaper terms, a stylebook, and a listing of additional resources. (SR)

Learn what it means to be a journalist in this fun, fast-paced new middle grade series about a club of kid reporters by an award-winning author. Nellie Murrow -- the daughter of two (former) newspaper reporters -- was named after one of the fiercest journalists who ever lived. When she moves to sleepy Bear Creek, Maine, rumors of vandalism and attacks at the only park in town are keeping her saddled to the house. Some townspeople say the attacks are gang recruitments. Others blame a vagrant spotted on the hiking trails around town. But when Nellie thinks like a reporter, none of those explanations make sense. Something is happening at the park, but what? All of the fake online news and rumors are clouding the truth. Nellie wants to break the story -- and break free from the front yard -- but she can't do it alone. She needs a whole club if she's going to start the Cub Report, the town's first independent newspaper. Creating a newspaper from scratch is going to be tough; but for Nellie, making friends is even harder. Starred Kirkus Review

A Practical Guide to Improve Instruction

**Why you need a writing revolution in your classroom and how to lead it The Writing Revolution (TWR) provides a clear method of instruction that you can use no matter what subject or grade level you teach. The model, also known as The Hochman Method, has demonstrated, over and over, that it can turn weak writers into strong communicators by focusing on specific techniques that match their needs and by providing them with targeted feedback. Insurmountable as the challenges faced by many students may seem, The Writing Revolution can make a dramatic difference. And the method does more than improve writing skills. It also helps: Boost reading comprehension Improve organizational and study skills Enhance speaking abilities Develop analytical capabilities The Writing Revolution is as much a method of teaching content as it is a method of teaching writing. There's no separate writing block and no separate writing curriculum. Instead, teachers of all subjects adapt the TWR strategies and activities to their current curriculum and weave them into their content instruction. But perhaps what's most revolutionary about the TWR method is that it takes the mystery out of learning to write well. It breaks the writing process down into manageable chunks and then has students practice the chunks they need, repeatedly, while also learning content.**

This book shows how principles of self-regulated learning are being implemented in secondary classrooms. The 14 chapters are theoretically driven and supported by empirical research and address all common high school content areas. The book comprises 29 lesson plans in English language arts, natural and physical sciences, social studies, mathematics, foreign language, art, music, health, and physical education. Additionally, the chapters address students with special needs, technology, and gifted students. This book is a practical and comprehensive resource for secondary teachers and researchers committed to supporting adolescents in the development of academic self-regulation. Each chapter is jointly written by teachers who provide a wealth of materials, including lesson plans, and researchers who situate these lesson plans and academic self-regulation goals within the larger work on self-regulation. The topics covered are far broader than any other book I have seen in terms of developing academic self-regulation, covering over a dozen content areas: mathematics, social studies, the sciences, and the arts. Teachers and scholars alike will find this book a must read. Karen Harris, EdD, Arizona State University A practical and magnificent blend of educational research and application.
