Healthcare providers, consumers, researchers and policy makers are inundated with unmanageable amounts of information, including evidence from healthcare research. It has become impossible for all to have the time and resources to find, appraise and interpret this evidence and incorporate it into healthcare decisions. Cochrane Reviews respond to this challenge by identifying, appraising and synthesizing research-based evidence and presenting it in a standardized format, published in The Cochrane Library (www.thecochranelibrary.com). The Cochrane Handbook for Systematic Reviews of Interventions contains methodological guidance for the preparation and maintenance of Cochrane intervention reviews. Written in a clear and accessible format, it is the essential manual for all those preparing, maintaining and reading Cochrane reviews. Many of the principles and methods described here are appropriate for systematic reviews applied to other types of research and to systematic reviews of interventions undertaken by others. It is hoped therefore that this book will be invaluable to all those who want to understand the role of systematic reviews, critically appraise published reviews or perform reviews themselves.

This book reflects on the way in which war and police/policing intersect in contemporary Western-led interventions in the global South. The volume combines empirically oriented work with ground-breaking theoretical insights and aims to collect, for the first time, thoughts on how war and policing converge, amalgamate, diffuse and dissolve in the context both of actual international intervention and in understandings thereof. The book uses the caption WAR:POLICE to highlight the distinctiveness of this volume in presenting a variety of approaches that share a concern for the assemblage of war-police as a whole. The volume thus serves to bring together critical perspectives on liberal interventionism where the logics of war and police/policing blur and bleed into a complex assemblage of WAR:POLICE. Contributions to this volume offer an understanding of police as a technique of ordering and collectively take issue with accounts of the character of contemporary war that argue that war is simply reduced to policing. In contrast, the contributions show how - both historically and conceptually - the two are 'always already' connected. Contributions to this volume come from a variety of disciplines including international relations, war studies, geography, anthropology, and law but share a critical/poststructuralist approach to the study of international intervention, war and policing. This volume will be useful to students and scholars who have an interest in social theories on intervention, war, security, and the making of international order.

New York Times bestselling author Lysa TerKeurst unveils her heart amid shattering circumstances and shows readers how to live assured when life doesn't turn out like they expected. What do you do when God's timing seems questionable, His lack of intervention hurtful, and His promises doubtful? Life often looks so very different than we hoped or expected. Some events may simply catch us off guard for a moment, but others shatter us completely. We feel disappointed and disillusioned, and we quietly start to wonder about the reality of God's goodness. Lysa TerKeurst understands this deeply. But she's also discovered that our disappointments can be the divine appointments our souls need to radically encounter God. In *It's Not Supposed to Be This Way*, Lysa invites us into her own journey of faith and, with grit, vulnerability, and honest humor, helps us to: Stop being pulled into the anxiety of disappointment by discovering how to better process unmet expectations and other painful situations. Train ourselves to recognize the three strategies of the enemy so we can stand strong and persevere through unsettling relationships and uncertain outcomes. Discover the secret of being steadfast and not panicking when God actually does give us more than we can handle. Shift our suspicion that God is cruel or unfair to the biblical assurance that God is protecting and preparing us. Know how to encourage a friend and help her navigate hard realities with real help from God's truth.

*Unknowingly, too many of us operate from an inward mindset—a narrow-minded focus on self-centered goals and objectives. When faced with personal ineffectiveness or lagging organizational performance, most of us instinctively look for quick-fix behavioral band-aids, not recognizing the underlying mindset at the heart of our most persistent challenges. Through true stories and simple yet profound guidance and tools, *The Outward Mindset* enables individuals and organizations to make the one change that most dramatically improves performance, sparks collaboration, and accelerates innovation—a shift to an outward mindset.*

"In this book, structured literacy is conceptualized as an umbrella term encompassing a variety of intervention methods, instructional approaches, and commercial programs. In addition to focusing on SL approaches to intervention, this book is organized around common poor reader profiles that have been identified in research. The chapters in this volume are written by experts who are well known as researchers but who are also highly skilled at writing for practitioners. Chapters were written with a strong foundation of research that is summarized, but with a concentration on translating research into practice, including case studies, sample intervention activities, and lesson plans. Each chapter includes application activities at the end to check for and extend readers' understanding"--

*In *Understanding and Managing Parental Alienation: A Guide to Assessment and Intervention*, Janet Haines, Mandy Matthewson and Marcus Turnbull offer a comprehensive analysis of contemporary understanding of parental alienation. Grounded in recent scientific advances, this is the first book of its kind providing resources on how to identify parental alienation and a guide to evidence-based intervention. Parental alienation is a process in which one parent manipulates their child to negatively perceive and reject the other parent. Recognising this phenomenon and knowing when to intervene is often the biggest challenge faced by practitioners and this book provides a guide to this process. Divided into six parts, it examines what parental alienation is and how it is caused, how it affects each family member as a mental health concern and form of violence, and how to assess, identify and intervene successfully from a legal and therapy standpoint. Taking on a gender-neutral approach, the book is filled with contemporary case examples from male and female perspectives, cutting-edge research, practitioner-client dialogues, and practitioners' reflections to show the difficult realities of parental alienation. Practical and accessible, this is an essential resource for mental health professionals working with families experiencing parental alienation, as well as postgraduate students of clinical psychology, counselling, family therapy, social work, and child and family psychology. This book will also be of immense interest to family lawyers and mediators due to its multidisciplinary approach.*

These days, it seems that everyone has a strong opinion about how to teach young children to read. Some may brush off the current tension as nothing more than one more round of "the reading wars." Others may avoid the clash altogether due to the uncivilized discourse that sometimes results. Certainly, sorting the signal from the noise is no easy task. In this leading-edge book, authors Jan Burkins and Kari Yates address this tension as a critical opportunity to look closely at the research, reevaluate current practices, and embrace new possibilities for an even stronger enactment of balanced literacy. From phonological processing to brain research to orthographic mapping to self-teaching hypothesis, Shifting the Balance cuts through the rhetoric (and the sciencey science) to offer readers a practical guide to decision-making about beginning reading instruction. The authors honor the balanced literacy perspective while highlighting common practices to reconsider and revise--all through a lens of what's best for the students sitting in front of us. Across six shifts, each chapter identifies a common instructional practice to reconsider explores various misunderstandings that establish and keep that practice in play shares scientific research to support its reconsideration proposes an instructional shift to apply a new perspective, and details several high-leverage instructional routines to support implementation of that shift. By pinpointing gaps and overlaps--as well as common misunderstandings and missed opportunities between the competing lines of thought--Jan and Kari offer busy educators direction and clarification for integrating science and balance into their daily instruction, while keeping meaningful experiences with text a priority.
