selling text presents organic chemistry in a new edition that is up-to-date, beautifully written, visually striking, and pedagogically sound. Described by many of its users as "an eminently teachable text" McMurry sets the standard in the field. The writing

style has received almost universal acclaim from its users. McMurry introduces new concepts only as needed and immediately illustrates them with concrete examples. And wherever possible, he ties material together with brief reviews, overviews, and

The result is a text that helps students mentally organize the material; a text that helps them understand concepts (not just memorize facts); and a text that helps them make sense of the voluminous amount of material they encounter in the study
