This book examines the military histories of the regions beyond Western Europe in the pre-modern era. Existing works on global military history mainly focus on the western part of Eurasia after 1500 CE. As regards the ancient period, such works concentrate exclusively on Greece and Rome. So, ‘ global ’ military history is actually the triumphal story of the West from Classical Greece onwards. This volume focuses not only on the eastern part of Eurasia but also on South America, Africa and Australasia and seeks to explain the history and varied trajectories of warfare in non-Western regions in the pre-modern era. Further, it evaluates whether warfare in non-Western regions should be considered primitive or inferior when compared with Western warfare. The book notes that Western Europe became militarily significant only in the early modern era and argues that the military divergence that occurred during the early modern era is not unique – it had also occurred in the Bronze Age, the Classical era and in the medieval period. This was due to the dynamism and innovativeness of non-Western militaries and the interconnectedness that existed in parts of the Eurasian landmass. Further, those polities which were able to construct a balanced military force by synthesising diverse elements were not only able to survive but also became capable of projecting power across continents. This book will be of much interest to students of military history, strategic studies and world history.

*States has been at war or has invaded other countries almost every year since independence. In *The United States of War*, David Vine traces this pattern of bloody conflict from Columbus's 1494 arrival in Guantanamo Bay through the 250-year expansion of a global US empire. Drawing on historical and firsthand anthropological research in fourteen countries and territories, *The United States of War* demonstrates how US leaders across generations have locked the United States in a self-perpetuating system of permanent war by constructing the world's largest-ever collection of foreign military bases—a global matrix that has made offensive interventionist wars more likely. Beyond exposing the profit-making desires, political interests, racism, and toxic masculinity underlying the country's relationship to war and empire, *The United States of War* shows how the long history of U.S. military expansion shapes our daily lives, from today's multi-trillion-dollar wars to the pervasiveness of violence and militarism in everyday U.S. life. The book concludes by confronting the catastrophic toll of American wars—which have left millions dead, wounded, and displaced—while offering proposals for how we can end the fighting.*

from Bengal, and letters from the Pacific. Drawing on far-flung museum and archival collections, and addressing sources in six different languages, Materials of the Mind is an impressively innovative account of science in the nineteenth century as part of global history. It shows how the circulation of material culture underpinned the emergence of a new materialist philosophy of the mind, while also demonstrating how a global approach to history can help us reassess issues such as race, technology, and politics today.

Between the end of the Seven Years war in 1763, and the abolition of slavery within its Empire in 1833, Britain's maritime engagement with the wider world was transformed. The essays in this book explore different aspects of that transformation, and in so doing assess the significance and complexities of Britain's maritime world in this key period, which was characterized by the contradictory and competing forces of revolution and reaction, 'liberty' and imperialism, war and peace, enlightenment and enslavement. They were originally delivered as lectures in a series jointly sponsored by the Institute of Historical Research and by the Centre for Imperial and Maritime Studies at the National Maritime Museum.

An introduction to the study of the ways the church has evolved in its corporate life since its birth in the first century. Special attention is given to studying its changing relationship and interaction with the surrounding societies in which it has existed. The intended readership will be those training for ministry in English speaking churches, so the studyguide will concentrate on those aspects of this subject of most relevance to this group. This means there will be greater attention to developments in the West than in the East, especially in later centuries, and to topics such as the nature of ministry, the sacraments, places of worship, authority in the church and mission. These will be examined at each period of church history, in each chapter, to provide reference points of comparison throughout the book. Each chapter will also contain a specific case study, presenting extracts of some key documents with notes, commentary and questions for discussion, to allow readers to develop skills in historical research. General discussion questions and reading lists will be provided at the end of each chapter. The final chapter will provide guidance for the study of the history of the student's own church and community. Barron's Regents Quick Guide: Global History and Geography II Exam provides expert advice and essential tips and practice for students. Looking from the 11th century to the 20th century, Kuroda explores how money was used and how currencies evolved in transactions within local communities and in broader trade networks. The discussion covers Asia, Europe and Africa and highlights an impressive global interconnectedness in the pre-modern era as well as the modern age. Drawing on a remarkable range of primary and secondary sources, Kuroda reveals that cash transactions were not confined to dealings between people occupying different roles in the division of labour (for example shopkeepers and farmers), rather that peasants were in fact great users of cash, even in transactions between themselves. The book presents a new categorization framework for aligning exchange transactions with money usage choices. This fascinating monograph will be of great interest to advanced students and researchers of economic history, financial history, global history and monetary studies.

Indian tea, Andrew B. Liu challenges past economic histories premised on the technical “divergence” between the West and the Rest, arguing instead that seemingly traditional technologies and practices were central to modern capital accumulation across Asia. He shows how competitive pressures compelled Chinese merchants to adopt abstract, industrial conceptions of time, while colonial planters in India pushed for labor indenture laws to support factory-style tea plantations. Further, characterizations of China and India as premodern backwaters, he explains, were themselves the historical result of new notions of political economy adopted by Chinese and Indian nationalists, who discovered that these abstract ideas corresponded to concrete social changes in their local surroundings. Together, these stories point toward a more flexible and globally oriented conceptualization of the history of capitalism in China and India.

In 1845 a blight of unknown origin destroyed the potato crop in Ireland triggering a series of events that would change forever the course of Ireland's history. The British government called the famine an act of God. The Irish called it genocide. By any name the famine caused the death of over one million men, women, and children by starvation and disease. Another two million were forced to flee the country. With the famine as a backdrop, this is a story about two families as different as coarse wool and fine silk. Michael Ranahan, the son of a tenant farmer, dreams of breaking his bondage to the land and going to America. The passage money has been saved. He's made up his mind to go. And then-the blight strikes and Michael must put his dream on hold. The landlord, Lord Somerville, is a compassionate man who struggles to preserve a way of life without compromising his ideals. To add to his troubles, he has to deal with a recalcitrant daughter who chafes at being forced to live in a country of "bog runners." In *The Time Of Famine* is a story of survival. Britain's Maritime World, C.1760-c.1840

This book examines Meiji Japan (1868–1912) to demonstrate the complex interplay between Japanese nation-building and the country's engagement with global processes. "Meiji Japan" refers to an era (1868–1912) that—as experienced from within—had an undetermined duration and extent. The length of the emperor's reign was not preordained, and the country's territorial borders were not as well-defined or wide-reaching at the start of the period as at the close. Questions about who was represented by and who identified with the emerging nation-state remained in flux as Japan's modern political, economic, legal, and sociocultural parameters were being created. Basing their inquiries on the idea of Meiji Japan in global history, the authors examine Japan's rise on the modern world stage, focusing on the individuals—whether

government leaders, intellectual elites, indigenous communities, or colonial migrants—who both shaped and were shaped by this era of global connectivity. Localized challenges and supranational opportunities meant people were in motion, as territorial expansion redefined marginalized groups, and as diverse populations moved to and from colonized and foreign lands. This volume seeks to excavate how people back then positioned themselves in a specific time and place, just as people in the twenty-first century seek to give Meiji Japan meaning at the sesquicentennial commemoration of its start. The chapters in this book were originally published in the journal Japan Forum. Want to learn Art History the creative way? ÊIf my present reader happens to be a Boy Scout or a scout-master who wants the scouts to build a tower for exhibition purposes, he can do so by following the directions here given, but if there is real necessity for haste in the erection of this tower, of course we cannot build one as tall as we might where we have more time. With a small tower all the joints may be quickly lashed together with strong, heavy twine, rope, or even wire; and in the wilderness it will probably be necessary to bind the joints with pliable roots, or cordage made of bark or withes; but as this is not a book on woodcraft we

suppose that the reader has secured the proper material for fastening the joints of the frame of this signal-tower and he must now shoulder his axe and go to the woods in order to secure the necessary timber. First let him cut eight straight poles—that is, as straight as he can find them. These poles should be about four and one half inches in diameter at their base and sixteen and one half feet long. After all the branches are trimmed off the poles, cut four more sticks each nine feet long and two and a half or three inches in diameter at the base; when these are trimmed into shape one will need twenty six or seven more stout sticks each four and one half feet long for braces and flooring for the platform.

The manner in which people have been talking and writing about 'development' and the rules according to which they have done so have evolved over time. Development Discourse and Global History uses the archaeological and genealogical methods of Michel Foucault to trace the origins of development discourse back to late colonialism and notes the significant discontinuities that led to the establishment of a new discourse and its accompanying industry. This book goes on to describe the contestations, appropriations and transformations of the concept. It shows how some of the trends in development discourse since the crisis of the 1980s – the emphasis on participation and ownership, sustainable development and free markets – are incompatible with the original rules and thus lead to serious contradictions. The Eurocentric, authoritarian and depoliticizing elements in development discourse are uncovered, whilst still recognizing

its progressive appropriations. The author concludes by analysing the old and new features of development discourse which can be found in the debate on Sustainable Development Goals and discussing the contribution of discourse analysis to development studies. This book is aimed at researchers and students in development studies, global history and discourse analysis as well as an interdisciplinary audience from international relations, political science, sociology, geography, anthropology, language and literary studies.
