Eat History offers fascinating new insights into the emerging field of gastronomic studies and its intersection with cultural history, and includes the writing of nine leading historians on topics ranging from vodka to patty cakes. Though primarily focused on Australia, the transnational nature of many of the essays widens the scope to include Russia and the British Empire, as well as Italy. With its engaging and entertaining tone, the volume will prove to be of interest not only to researchers and academics in the field, but to more general readers keen to discover how the consideration of food opens up whole new areas of history and points the way to fruitful future inquiry.

Been to a country show and wondered who are the people behind the vast spread? Ever thought about entering yourself? Here are 53 country shows, the cooks behind the scenes, and their prize-winning recipes. Dip in for fascinating insights into the lives of these cooks, and get busy in the kitchen with their dos and don'ts, and advice from the eagle-eyed judges. THE BLUE RIBBON COOKBOOK is a goldmine for anyone who loves to cook, and enjoy the rewards with friends and family.

“All-Electric” Narratives

1953: July-December

Mealtime Manual for the Aged and Handicapped

Based on 14 years of research and experiment with plastics and various non-traditional materials, this book supplies information to designers and interpreters on specialized techniques for use in costumes for theatre, film and TV. Also included are charts detailing the effects of dry cleaning and laundering on adhesives, coatings, colourings and metallisers, allowing the designer to make appropriate choices for specific needs and longevity. This reference delivers many exciting new choices to designers and craftspeople, with the bonus of improved safety, maintenance, comfort for the wearer and visual effects for the audience.

Stop-motion puppet animation is one of the most unusual and demanding art forms in the world. It uses a variety of skills, including design, sculpting, metal work, mold making and casting, taxidermy, filmmaking, storytelling and acting, and can be seen in the simplest commercial spots on television to more complex animated shorts and science fiction and fantasy feature films. This work explains research and design of puppets, and details the fabrication of stop-motion puppets around a metal armature skeleton using the build up and foam injection processes. The former technique uses pre-cut blocks of foam formed with a pair of scissors or other instrument into the shape desired and attaching them to the armature. In the latter technique, the character is sculpted in clay over the armature. This clay sculpture is then replaced with foam by using a plaster mold and injection gun techniques. Finishing techniques described include the making of hair, eyes, eyelids, teeth, horns, nails, and chitinous (insect-shell-like) surfaces. The manual also covers the process of creating replacement heads using rubber molds (such as RTV) and urethane castings. A glossary and bibliography complete the extensively illustrated work.

The Saturday Evening Post

Culinary Landmarks is a definitive history and bibliography of Canadian cookbooks from the beginning, when La cuisinière bourgeoise was published in Quebec City in 1825, to the mid-twentieth century. Over the course of more than ten years Elizabeth Driver researched every cookbook published within the borders of present-day Canada, whether a locally authored text or a Canadian edition of a foreign work. Every type of recipe collection is included, from trade publishers' bestsellers and advertising cookbooks, to home economics textbooks and fund-raisers from church women's groups. The entries for over 2,200 individual titles are arranged chronologically by their province or territory of publication, revealing cooking and dining customs in each part of the country over 125 years. Full bibliographical descriptions of first and subsequent editions are augmented by author biographies and corporate histories of the food producers and kitchen-equipment manufacturers, who often published the books. Driver's excellent general introduction sets out the evolution of the cookbook genre in Canada, while brief introductions for each province identify regional differences in developments and trends. Four indexes and a 'Chronology of Canadian Cookbook History' provide other points of access to the wealth of material in this impressive reference book.

Create culinary masterpieces with your KitchenAid stand mixer and its attachments. Fresh bread, towering layer cakes, bakery-worthy cookies, chewy bagels, homemade pasta and sausage"e"the possibilities are endless and delicious. 80 amazing recipes for recipes for every occasion, all made using your KitchenAid stand mixer. Chapters include: cookies, bar cookies, pies and tarts, cakes and cupcakes, desserts, yeast breads, quick breads and doughnuts, coffee cakes, and entres. Recipes use the classic attachments that come with the stand mixer: the flat beater, wire whip, and dough hook, along with several recipes that use popular attachments like the pasta roller and cutters, food grinder, and spiralizer. Includes classic recipes every home chef needs in their repertoire: Decadent Chocolate Layer Cake, Carrot Cake, Pumpkin Cheesecake, Buttermilk Old-Fashioned Doughnuts, Classic Cinnamon Buns, Fudgy Brownies, Pulled Pork, Eggs Benedict and so much more! Explore creative and delicious flavor combinations in Mexican Hot Chocolate Cookies, Focaccia with Squash and Olives, Parmesan-Herb Bagels and Mixed Berry Almond Cake. A two-page introduction covers stand mixer and attachment basics and provides instructions for creating perfectly whipped eggs whites and a recipe for sweetened whipped cream. Every recipe has a beautiful color photo

Time-Saving Appliances and Domesticity in American Literature, 1945[2020

All-electric Narratives is the first in-depth study of time-saving electrical appliances in American literature. It examines the literary depiction of refrigerators, vacuum cleaners, oven ranges, washing machines, dryers, dishwashers, toasters, blenders, standing and hand-held mixers, and microwave ovens between 1945, when the all-electric home came to be associated with the nation's hard-won victory, and 2020, as contemporary writers consider the enduring material and spiritual effects of these objects in the 21st century. The appropriation and subversion of the rhetoric of domestic electrification and time-saving comprises a crucial, but overlooked, element in 20th-century literary forms and genres including Beat literature, Black American literature, second-wave feminist fiction, science fiction, and postmodernist fiction. Through close-readings of dozens of literary texts alongside print and television ads from this period, Dini shows how U.S. writers have unearthed the paradoxes inherent to claims of appliances' capacity to give back time to their user, transport them into a technologically-progressive future, or return them to some pastoral past. In so doing, she reveals literary appliances' role in raising questions about gender norms and sexuality, racial exclusion and erasure, class anxieties, the ramifications of mechanization, the perils and possibilities of conformity, the limitations of patriotism, and the inevitable fallacy of utopian thinking-while both shaping and radically disrupting the literary forms in which they operated.

In print for over thirty years, The Printing Ink Manual, published on behalf of the Society of British Printing Ink Manufacturers, is the industry 'bible' for all printing ink technologists, manufacturers, packaging and publishing printers all over the world. Thoroughly revised and updated throughout, the new material present in this fifth edition reflects the substantial developments that have taken place in recent years, including: The dramatic expansion in the use of lithographic inks with particular attention to cold-set, head-set, sheet-set, sheet-fed and web offset and metal decorating inks. The use of flexographic inks in newspaper printing Ink-jet inks: a complete new chapter has been added The most recent theories of high-speed measurements in the rheology of inks The European Quality Assurance Standards ISO 9000 The latest legislation on health, safety and the environment. E/LISTE All chapters have been reviewed, updated and expanded wherever needed. Further important features include a listing of all the raw materials used regularly in the manufacture of printing inks, giving full information on their physical and chemical properties. Formulation technology is fully illustrated with practical examples and the significance of environmental issues and quality management is also covered in detail. Legislation, mainly European and from the United States, together with specifications set by world-wide end-users have established printing ink as a truly international product. Many of the chapters in The Printing Ink Manual have been written by authors working for international companies to ensure that the contents include the widest international practices and The Printing Ink Manual therefore represents an international reference source which is used throughout the world.
