The arrival of the Reformation was the decisive impetus for literary development in Finland. The principle of Lutheranism was that the people had to get to hear and read the word of God in their own mother tongue. If there previously was no literary language, it had to be created. The first Finnish books were produced by Mikael Agricola. He was born an ordinary son of a farmer, but his dedication to his studies opened up the road to leading roles in the Finnish Church. He was able to bring a total of nine works in Finnish to print, which became the foundation of literary Finnish. This book describes the historical background of Mikael Agricola, his life, his personal networks, the Finnish works published by Agricola, research on Agricola and Agricola's role in contemporary Finnish culture. The most extensive chapter is a depiction of Agricola's Finnish. The book was written with a broad audience in mind, as a work of non-fiction for anyone interested in these subjects.

A Comprehensive Grammar

The Life and Times of William Barak, Last Chief of

the Yarra Yarra Tribe

This is an extensive manual of the Finnish language. It is an ideal source of information when you wish to learn about some specific features of Finnish, such as pronunciation, word formation, notational conventions, or verb forms, even with minimal or no previous understanding of the language. It is intended primarily for people who study, learn, or use Finnish as a foreign language. It is particularly useful to advanced language learners, translators, and linguists. The book covers · all the major features of Finnish grammar, including both standard written language, common spoken language, and features of major dialects · treatises of key specialties of Finnish such as idiomatic uses of locational case forms · in-depth look at some topics largely ignored in Finnish grammars, such as compositive forms of words and “passive” forms of verbs · punctuation rules and rules for writing numbers and special notations · issues in writing and processing Finnish-language texts in the modern world, with computers The book is also

useful to people with Finnish as their native or second language, because it gives them a different look at the language. The approach in the book partly deviates from the tradition of Finnish grammars, Finnish style guides, and teaching of Finnish at schools. It treats Finnish as a world to be explored, rather than something we know all too well, and it treats it like any other language, using international concepts and terms.

*****Winner of the William Hill Sports Book of the Year, 2020 - the inside story of the Russian doping programme by the man behind it all***** One of the Financial Times's 'Fifty people who shaped the decade' 'The biggest sports scandal the world has ever seen' In 2015, Russia's Anti-Doping Centre was suspended by the World Anti-Doping Agency (WADA) following revelations of an elaborate state-sponsored doping programme at the 2014 Sochi Winter Olympics. Involving a nearly undetectable steroid delivery system known as 'Duchesse cocktail', tampering and switching of urine samples, and a complex state-sanctioned cover-up, the

programme was masterminded by Grigory Rodchenkov. The Rodchenkov Affair tells the full, unadulterated story that was first glimpsed in Bryan Fogel's award-winning documentary and still continues to captivate and shock the world.

Charting the author's childhood growing up under the Iron Curtain, his first encounter with doping as a 22-year-old student athlete at Moscow State University, and his subsequent career working for the Soviet Olympic Committee, this breathtakingly candid journey reveals a rigged system of flawed individuals, brazen deceit and impossible moral choices.

Earth, in common use for architectural construction for thousands of years, has in the past thirty years attracted renewed attention as a healthy,

environment-friendly and economical building material. What needs to be considered in this context? The manual *Building with Earth*, which has been translated into many languages, describes the building technology of this material. The physical properties and characteristic values are explained in a hands-on manner: With proper moisture protection, earth buildings are very durable, and in particular the combination with wood or straw allows a wide spectrum of design options. Numerous built examples demonstrate the range of applications for this fully recyclable material.

The Sufis are as diverse as the countries in which they've flourished—from Morocco to India to China—and as varied as their distinctive forms of art, music, poetry, and dance. They are said to represent the mystical heart of Islam, yet the term Sufism is notoriously

difficult to define, as it means different things to different people both within and outside the tradition. With that fact in mind, Carl Ernst explores the broadest range of Sufi philosophies and practices to provide one of the most complete and comprehensive introductions to Sufism available in English. He traces the history of the movement from the earliest days of Islam to the present day, along the way examining its relationship to the larger world of Islam and its encounters with both fundamentalism and secularism in the modern world.

This book seeks to understand the obligations of the international community to promote and protect state and human security in situations of international humanitarian crises. In Iraq and Syria, as well as in neighbouring states, the rise of ISIL has raised serious state and human security challenges. This study explores the relationships between the Global-Regional Partnership, the United Nations and nine organizations in their attempt to deal with the challenges presented by ISIL. Each organization is analyzed in terms of how it has responded in the past and how it is now

responding to the ISIL threat based on three perspectives; resource capacities (military, political, economic, technological, normative); willingness and readiness; and impediments to capacity and abilities. The overall aim is to discern what capacities and abilities international organizations have to protect state and human security and prevent civilians from mass atrocities inflicted by ISIL forces. The study addresses the role of international organizations when the UNSC is unable or unwilling to uphold the most fundamental norms and values in the UN Charter. This approach acknowledges that within the international community there is an overall acceptance on security for a partnership between the UN and regional organizations, but that there is also a contested call for a renegotiated international contract on state and human security. This volume will be of much interest to students of international relations, human rights, peace and conflict studies, terrorism studies and International Relations. For a number of years, the healthy and

environment-friendly building material earth, in common use for thousands of years, has been enjoying increasing popularity, including in industrialized nations. In hot dry and temperate climate zones, earth offers numerous advantages over other materials. Its particular texture and composition also holds great aesthetic appeal. The author's presentation reflects the rich and varied experiences gained over thirty years of building earth structures all over the world. Numerous photographs of construction sites and drawings show the concrete execution of earth architecture.

A New York Times Bestseller "I'll be forever changed by Dr. Eger's story...The Choice is a reminder of what courage looks like in the worst of times and that we all have the ability

to pay attention to what we've lost, or to pay attention to what we still have.”—Oprah “Dr. Eger’s life reveals our capacity to transcend even the greatest of horrors and to use that suffering for the benefit of others. She has found true freedom and forgiveness and shows us how we can as well.” —Desmond Tutu, Nobel Peace Prize Laureate “Dr. Edith Eva Eger is my kind of hero. She survived unspeakable horrors and brutality; but rather than let her painful past destroy her, she chose to transform it into a powerful gift—one she uses to help others heal.” —Jeannette Walls, New York Times bestselling author of The Glass Castle Winner of the National Jewish Book Award and Christopher Award At the age of sixteen, Edith Eger was sent to Auschwitz. Hours after her parents were killed, Nazi officer Dr. Josef Mengele, forced Edie to dance for his amusement and her survival. Edie was pulled from a pile of corpses when the American troops liberated the camps in 1945. Edie spent decades struggling with flashbacks and survivor’s guilt, determined to stay silent and hide from the past. Thirty-five years after the war ended, she returned to Auschwitz and was finally able to fully heal and forgive the one person she’d been unable to forgive—herself.

Edie weaves her remarkable personal journey with the moving stories of those she has helped heal. She explores how we can be imprisoned in our own minds and shows us how to find the key to freedom. The Choice is a life-changing book that will provide hope and comfort to generations of readers.
