**Artificial intelligence (AI) has grown in presence in asset management and has revolutionized the sector in many ways. It has improved portfolio management, trading, and risk management practices by increasing efficiency, accuracy, and compliance. In particular, AI techniques help construct portfolios based on more accurate risk and return forecasts and more complex constraints. Trading algorithms use AI to devise novel trading signals and execute trades with lower transaction costs. AI also improves risk modeling and forecasting by generating insights from new data sources. Finally, robo-advisors owe a large part of their success to AI techniques. Yet the use of AI can also create new risks and challenges, such as those resulting from model opacity, complexity, and reliance on data integrity.**

**Human Factors in the Nuclear Industry: A Systemic Approach to Safety presents the latest research and studies of human factors in the nuclear industry. It models and highlights scientific and technological foundations before providing practical examples of applications within the nuclear facility of human performance at an individual, group, organization, and system level. Editors Dr. Teperi and Dr. Gotcheva supply concrete models, tools and techniques based on research to provide the reader with knowledge of how to facilitate and support human performance in this dynamic and fast moving safety critical field. Models and case studies are provided to add practical benefits for the reader to apply to their own projects, including user friendly state-of-the-art equipment, fluent work processes for information flow, functional control room resource management, and scope for competence and learning in the work place. This book will benefit nuclear researchers, safety experts, human factors professionals and power plant operators, as well as those with an interest in human factors outside of the nuclear field. Provides a comprehensive framework for human factors, considering not only the individual, but also the team, organizational and industrial levels Presents tried and tested tools and techniques based on research from the nuclear industry Includes models, examples and case studies of user-friendly equipment, fluent work processes and functional control room resource management**

*Traditionally, innovation has been considered difficult to manage, as it occurs through contingent discoveries and inventions. For effective innovation management, it is necessary to determine what provides new value to customers*

*and achieve this new value efficiently, while solving the technical problems. This book explores how innovation management for industrial revitalization and activation are conducted in Japanese companies. 'Innovation' has diverse definitions, but the editors of this book have adopted the one proposed by J A Schumpeter. The features of innovation management in Japanese companies are considered systematically in the book. Positive analyses using questionnaires and innovation management strategy in individual industries and companies is also explored in detail.*

This text explains how Islamic banking works and what it offers as an alternative model of financial intermediation. Important questions addressed include: Why Islamic banking started and where it is going? Who are the main players at present and whom it will attract in future? What are its strengths and weaknesses? Will Islamic banks survive in highly competitive and globalized financial markets? What are their prospects and potentials? How does the relative performance and efficiency of Islamic banks compare to conventional banks?

Addressing the practicalities of clinical supervision, this informative book follows the course of the supervision process, illustrating each stage with an absorbing blend of information, opinion, academic theory, anecdotal material, serious comment and thought-provoking exercises. Emphasis is placed on the purpose and value of clinical supervision, but also on the potential pitfalls those involved may encounter, and how they can be avoided. A number of theories and models are discussed with reference to each stage of supervision, providing a thought-provoking basis for the practical issues raised. Written in a lively and engaging style, this book will enable both supervisors and supervisees to get the best they can from the supervisory experience.

*The financial system and its regulation have undergone exponential growth and dramatic reform over the last thirty years. This period has witnessed major developments in the nature and intensity of financial markets, as well as repeated cycles of regulatory reform and development, often linked to crisis conditions.*

*The recent financial crisis has led to unparalleled interest in financial regulation*

*from policymakers, economists, legal practitioners, and the academic community, and has prompted large-scale regulatory reform. The Oxford Handbook of Financial Regulation is the first comprehensive, authoritative, and state of the art account of the nature of financial regulation. Written by an international team of leading scholars in the field, it takes a contextual and comparative approach to examine scholarly, policy, and regulatory developments in the past three decades. The first three parts of the Handbook address the underpinning horizontal themes which arise in financial regulation: financial systems and regulation; the organization of financial system regulation, including regional examples from the EU and the US; and the delivery of outcomes and regulatory techniques. The final three Parts address the perennial objectives of financial regulation, widely regarded as the anchors of financial regulation internationally: financial stability, market efficiency, integrity, and transparency; and consumer protection. The Oxford Handbook of Financial Regulation is an invaluable resource for scholars and students of financial regulation, economists, policy-makers and regulators.*

*What is good CBT supervision? What makes an effective supervisor? How can qualified CBT therapists learn to become good CBT supervisors who work effectively with their supervisees?
