Cyanotype is the most accessible and frequently used of all the alternative photographic processes. When utilized properly, it has the potential to rival other processes when it comes to detail and tonal range, but its Prussian blue color isn't always suitable for the final photograph. Throughout history, cyanotype prints have been toned not only with various—and at times hazardous—chemicals but also with more natural ingredients like tea and coffee. Since the cyanotype itself is non-toxic, Cyanotype Toning will champion an innovative process, developed by the range of possible colors and even beautiful black and whites. Even duotone or tricolor prints can be attained. The book consists of two parts. Part One is a step-by-step how-to section including all the information that a student at any level needs to achieve a successfully toned print. Easy-to-understand background information is provided on how and why the process works so that readers can venture on their own into the world of natural colors. The first part also has a detailed section on all the factors that can influence the outcome, like paper choice, vintage contemporary artists who have explored toning with botanicals and integrated the process into their creative practice. The book includes: A list of equipment and supplies needed. In depth information about useful plants and the specific properties that make them suitable for toning cyanotypes. Concise step-by-step instructions for printing cyanotypes successfully. A chart of more than 60 tested papers with recommendations on paper choice. Step-by-step generic instructions on toning with botanicals. Troubleshooting toning with botanicals. More detailed tricolor prints. A range of creative ideas on how to use the process in classrooms and with different age groups. A comprehensive list of more than 380 tested parts of plants and possible color outcomes. Using botanicals to tone cyanotypes broadens the color spectrum, enlarges creative possibilities and makes the cyanotype process even more versatile. The process is not cut and dried science but a limitless field for discovery and surprises. Cyanotype Toning provides accessible information and instructions for readers at all levels. It is comprehensive and detailed, and includes experiences and the works they have created using this innovative toning process.

Troubleshooting and Repair

WALNECK'S CLASSIC CYCLE TRADER, MARCH 2004

A motorcycle 's electrical system can be daunting to even the most adept home mechanic. And yet, the more complex these systems become—and the more important to a motorcycle 's function—the more useful, even critical, it will be to know something about them. That 's where this book comes in with a user-friendly guide to understanding, diagnosing, and fixing the electrical systems and components that make a bike run . . . or falter. Veteran technician Tracy Martin explains the principles behind motorcycle electrical systems and how they work. He details the various tools, such as multimeters and test lights, that can be used to evaluate and troubleshoot any vehicle's electrical problem. And in several hands-on projects, he takes readers on a guided tour of their vehicle 's electrical system, along the way giving clear, step-by-step instructions for diagnosing specific problems.

Haynes disassembles every subject vehicle and documents every step with thorough instructions and clear photos. Haynes repair manuals are used by the pros, but written for the do-it-yourselfer.

Musical Puzzles of Note

At the heart of the dramatic arts lies a single phenomenon: human social interaction. The crux of the practitioner's work involves knowing how interaction works: knowing what a pause does, or why a particular intonation contour changes a line from interrogative to accusative, or what goes into inferring something about a character. Social Interaction and Dramatic Performance uses case studies from dramatic performances and data from real-world interaction to present findings from interaction analytic research. Over ten chapters, Spencer Hazel illuminates the nuances that shape our everyday interactions, demonstrating how practitioners of the dramatic arts seek to develop and construct authentic representations of interaction. This book also explores the processes by which these representations of interaction are produced through interaction: between actors, between actor and director and between others in the creative team. The dramatic arts explore the social world through representations of people interacting with one another. This new coursebook offers insights into the intricate ways people have been shown to organize their interactions, their social affairs and their institutions, providing a toolkit for students and practitioners of the performing arts to follow, allowing them to understand and construct more authentic interactions in performance.

A "powerful and original" (The Times) historical saga that follows the quest for identity, redemption and home in the wake of World War II. One night in autumn 1944, a gunshot echoes through the alleyways of a small town in occupied Poland. An SS officer is shot dead by a young Polish Jew, Margarita Ejenstein. In retaliation, his commander orders the execution of thirty-seven Poles—one for every year of the dead man's life. First hidden by a sympathetic German couple, Margarita must then flee the brutal advance of the Soviet army with her newborn baby. So begins a thrilling panorama of intermingled destinies and events that reverberate from that single act of defiance. Kingdom of Twilight follows the lives of Jewish refugees and a German family resettled from Bukovina, as well as a former SS officer, chronicling the geographical and psychological dislocation generated by war. A quest for identity and truth takes them from refugee camps to Lübeck, Berlin, Tel Aviv, and New York, as they try to make sense of a changed world, and of their place in it. Hypnotically lyrical and intensely moving, Steven Ohly's epic novel is a finely nuanced yet shattering exploration of universal themes: love, hatred, doubt, survival, guilt, humanity, and redemption.

Authored by nationally recognized scholar and behavioral consultant Dr. John W. Maag, this book focuses primarily on students' observable behaviors and the environmental factors that affect their expression. As Maag points out, behavior management is probably one of the most misunderstood concepts in education. Written in a very accessible style, this book demystifies stereotypical beliefs and misconceptions regarding the use of reinforcement, punishment, and self-control. More than 100 proven intervention techniques, supplemented by a range of step-by-step guidelines, sample forms, charts, graphs, and illustrations that assist teachers in implementing the techniques. Although the techniques described in the book are based on a sound theoretical and empirical foundation, the author limits the use of technical jargon and infuses real-life examples and case studies that clarify and illuminate the presentation.
