The account of a life spanning almost sixty years of work in the film industry in England, Hollywood, India, and throughout the world. Peter Hopkinson joined Denham Studios as a clapper loader at 16 and quickly became a camera assistant, working with directors like King Vidor and Michael Powell, and stars such as Marlene Dietrich and Robert Donat. In 1940 he joined the army and, working for the British Army Film and Photographic Unit, helped to film the Battle of Alamein, allied landings in Italy, partisan actions in Yugoslavia and Greece and the Japanese surrender in Siam (Thailand), among many other assignments. After the war he became a director-cameraman, mainly for the March of Time newsreels, continuing to film from war zones and trouble spots, but also creating documentaries (many of them award-winning) that analysed life in peacetime: politics, scientific advance, social upheaval in the developing world and changing lifestyles at home. In later life he was hired by UNESCO to pass on his mastery of documentary film-making to a new generation of international youth at the Film Institute of India. In this book Peter Hopkinson presents not just an account of his own amazing life and work but a lucid and comprehensive history of the moving image itself, the supreme popular art form of our time. Includes more than 100 photographs. 'A history of the moving image told from the perspective of somebody who has experienced many of the major developments in the industry at first hand.' Melvyn Bragg (Controller Arts, London Weekend Television) "A real contribution to the literature of film in the 20th century." Raymond Fielding (Dean and Professor School of Motion Picture Television and Recording Arts Florida State University)

The Fourth Matthew Bartholomew Chronicle

This project-oriented facilities design and material handling reference explores the techniques and procedures for developing an efficient facility layout, and introduces some of the state-of-the-art tools involved, such as computer simulation. A "how-to," systematic, and methodical approach leads readers through the collection, analysis and development of information to produce a quality functional plant layout. Lean manufacturing; work cells and group technology; time standards; the concepts behind calculating machine and personnel requirements, balancing assembly lines, and leveling workloads in manufacturing cells; automatic identification and data collection; and ergonomics. For facilities planners, plant layout, and industrial engineer professionals who are involved in facilities planning and design. How should we design our economic systems? Should we tax the rich at a higher rate than the poor? Should we have a minimum wage? Should the state provide healthcare for all? These and many related questions are the subject of distributive justice, and different theories of distributive justice provide different ways to think about and answer such questions. This book provides a thorough introduction to the main theories of distributive justice and reveals the underlying sources of our disagreements about economic policy. It argues that the universe of theories of distributive justice is surprisingly simple, yet complicated. It is simple in that the main theories of distributive justice are just four in number, and in that these theories each offer a distinct, well-defined theoretical approach to distributive justice; yet it is complicated in that the main theories disagree at several distinct, fundamental levels, and in that it is possible to spin innumerable new theories from the elements of the four main theories. Key Features: Covers the four major theories of distributive justice and their leading philosophers, elucidating the attractions and drawbacks of each: Friedrich A. von Hayek and right-liberalism; John Rawls and left-liberalism; Robert Nozick and libertarianism; Gerald A. Cohen and socialism. Explains why these four theories have come to dominate most philosophical discussions on distributive justice, highlighting the essential answer provided in each that is lacking in other theories. Written for any reader interested in the topic, with an annotated reading list at the end of each chapter and helpful glossary at the back of the book.

This book addresses sixteen different reform proposals that are urgently needed to correct the fault lines in the international tax system as it exists today, and which deprive both developing and developed countries of critical tax resources. It offers clear and concrete ideas on how the reforms can be achieved and why they are important for a more just and equitable global system to prevail. The key to reducing the tax gap and consequent human rights deficit in poor countries is global financial transparency. Such transparency is essential to curbing illicit financial flows that drain less developed countries of capital and tax revenues, and are an impediment to sustainable development. A major break-through for financial transparency is now within reach. The policy reforms outlined in this book not only advance tax justice but also protect human rights by curtailing illegal activity and making available more resources for development. While the reforms are realistic they require both political and an informed and engaged civil society that can put pressure on governments and policy makers to act.

An illuminating collection of work by members of the Religious Society of Friends. Covering nearly three centuries of religious development, this comprehensive anthology brings together writings from prominent Friends that illustrate the development of Quakerism, show the nature of Quaker spiritual life, discuss Quaker contributions to European and American civilization, and introduce the diverse community of Friends, some of whom are little remembered even among Quakers today. It gives a balanced overview of Quaker history, spanning the globe from its origins to missionary work, and explores daily life, beliefs, perspectives, movements within the community, and activism throughout the world. It is an exceptional contribution to contemporary understanding of religious thought. For more than seventy years, Penguin has been the leading publisher of classic literature in the English-speaking world. With more than 1,700 titles, Penguin Classics represents a global bookshelf of the best works throughout history and across genres and disciplines. Readers trust the series to provide authoritative texts enhanced by introductions and notes by distinguished scholars and contemporary authors, as well as up-to-date translations by award-winning translators.

This is the ninth in the 300 series of circuit design books, again contains a wide range of circuits, tips and design ideas. The book has been divided into sections, making it easy to find related subjects in a single category. The book not only details DIY electronic circuits for home construction but also inspiring ideas for projects you may want to design from the ground up. Because software in general and microcontroller programming techniques in particular have become key aspects of modern electronics, a number of items in this book deal with these subjects only. Like its predecessors in the 300 series, "308 Circuits" covers the following disciplines and interest fields of modern electronics: test and measurement, radio and television, power supplies and battery chargers, general interest, computers and microprocessors, circuit ideas and audio and hi-fi.

Here We Are in Paradise

From New York Times Bestseller Mimi Jean Pamfiloff comes SMART TASS, a new Romantic Comedy. He's the hot college quarterback all the girls want. She's the smart girl he loves to pick on. And now that they're all grown up, things are about to get geekin' ugly... My name is Tass. I'm smart, I'm driven, and I am determined not to let prankster Hunter Johnson continue raining on my parade. When we were little, he'd pull my hair and call me names. When we were teenagers, he'd throw food and tease me for being a flat-chested virgin. But now that we've ended up at the same college, he's out of his hot head if he thinks he can keep messing with my life. It's like he's fixated on me or something. Well, guess what, Mr. Amazefootball? I'm not that geeky little girl anymore and you do not screw with a smart woman. So what's my plan? It's definitely wild, and he's about to find out... This collection of stories, set in various locales of North Carolina create entire worlds and indelible moments as only the best short fiction does.
