**Nostalgia isn't what it used to be. For many of us, modern memory is shaped less by a longing for the social customs and practices of the past or for family heirlooms handed down over generations and more by childhood encounters with ephemeral commercial goods and fleeting media moments in our age of fast capitalism. This phenomenon has given rise to communities of nostalgia whose members remain loyal to the toys, television, and music of their youth. They return to the theme parks and pastimes of their upbringing, hoping to reclaim that feeling of childhood wonder or teenage freedom. Consumed nostalgia took definite shape in the 1970s, spurred by an increase in the turnover of consumer goods, the commercialization of childhood, and the skillful marketing of nostalgia. Gary Cross immerses readers in this fascinating and often delightful history, unpacking the cultural dynamics that turn pop tunes into oldies and childhood toys into valuable commodities. He compares the limited appeal of heritage sites such as Colonial Williamsburg to the perpetually attractive power of a Disney theme park and reveals how consumed nostalgia shapes how we cope with accelerating change. Today nostalgia can be owned, collected, and easily accessed, making it less elusive and often more fun than in the past, but its commercialization has sometimes limited memory and complicated the positive goals of recollection. By unmasking the fascinating, idiosyncratic character of modern nostalgia, Cross helps us better understand the**

**During the mid-1990s, the O.J. Simpson murder trial dominated the media in the United States and were circulated throughout the world via global communications networks. The case became a spectacle of race, gender, class and violence, bringing in elements of domestic melodrama, crime drama and legal drama. According to this fascinating new book, the Simpson case was just one example of what the author calls 'media spectacle' - a form of media culture that puts contemporary dreams, nightmares, fantasies and values on display. Through the analysis of several such media spectacles - including Elvis, The X Files, Michael Jordan, and the Bill Clinton sex scandals - Doug Kellner draws out important insights into media, journalism, the public sphere and politics in an era of new technologies. In this excellent follow up to his best selling Media Culture, Kellner's fascinating new volume delivers an informative read for students of sociology, culture and media.**

The youth performing market is hotter than ever, enjoying an unprecedented number of successful television shows and movies, such as Hannah Montana and High School Musical. Kids and teens - and adults who can play young - are in demand and experiencing astonishing levels of celebrity and attention. Top talent manager Frederick Levy specialises in developing young talent and here offers a potent mix of authority and encouragement to steer today's performing youth to the careers of their dreams. The advice in this book can be applied to both stage and screen careers and covers the whole industry, as well as, Hollywood. From necessary tools (headshots) to the team of players (agents, managers) to auditions and booking a job, Levy details what to expect and teaches actors what they can do to manage and maintain a long-term career. For kids, special focus is given to labour laws, education options and how parents fit in as managers and vital members of the support team. Filled with anecdotes about working in the business, the book will both entertain readers and offer firm, practical advice not just from the author but from other actors, acting coaches, agents, casting directors and more.

***This book considers the evolution of medical education over the centuries, presents various theories and principles of learning (pedagogical and andragogical) and discusses different forms of medical curriculum and the strategies employed to develop them, citing examples from medical schools in developed and developing nations. Instructional methodologies and tools for assessment and evaluation are discussed at length and additional elements of modern medical teaching, such as writing skills, communication skills, evidence-based medicine, medical ethics, skill labs and webinars, are fully considered. In discussing these topics, the authors draw upon the personal experience that they have gained in learning, teaching and disseminating knowledge in many parts of the world over the past four decades. Medical Education in Modern Times will be of interest for medical students, doctors, teachers, nurses, paramedics and health and education planners.***

*This Intergovernmental Panel on Climate Change Special Report (IPCC-SRREN) assesses the potential role of renewable energy in the mitigation of climate change. It covers the six most important renewable energy sources - bioenergy, solar, geothermal, hydropower, ocean and wind energy - as well as their integration into present and future energy systems. It considers the environmental and social consequences associated with the deployment of these technologies, and presents strategies to overcome technical as well as non-technical obstacles to their application and diffusion. SRREN brings a broad spectrum of technology-specific experts together with scientists studying energy systems as a whole. Prepared following strict IPCC procedures, it presents an impartial assessment of the current state of knowledge: it is policy relevant but not policy prescriptive. SRREN is an invaluable assessment of the potential role of renewable energy for the mitigation of climate change for policymakers, the private sector, and academic researchers.*
