The identification of

Where To

Synthesis Of
Evidence Paper

gaps from
systematic reviews
is essential to the
practice of
"evidence-based
research." Health
care research
should begin and
end with a
systematic review. A
comprehensive and
explicit
consideration of the

Where To Download

Synthesis Of
Evidence Paper

existing evidence is necessary for the identification and development of an unanswered and answerable question, for the design of a study most likely to answer that question, and for the interpretation of the results of the study.

Where To Download

Synthesis Of Evidence Paper

In a systematic review, the consideration of existing evidence often highlights important areas where deficiencies in information limit our ability to make decisions. We define a research gap as a topic or area for which

Where To Download Synthesis Of Evidence Paper

missing or inadequate information limits the ability of reviewers to reach a conclusion for a given question. A research gap may be further developed, such as through stakeholder engagement in prioritization, into

Where To Download

Synthesis Of Evidence Paper

research needs.

Research needs are those areas where the gaps in the evidence limit decision making by patients, clinicians, and policy makers.

A research gap may not be a research need if filling the gap would not be of use to stakeholders

Where To Download

Synthesis Of
Evidence Paper

that make decisions in health care. The clear and explicit identification of research gaps is a necessary step in developing a research agenda. Evidence reports produced by Evidence-based Practice Centers (EPCs) have always

Where To Download

Synthesis Of
Evidence Paper
included a future
research section.

However, in contrast to the explicit and transparent steps taken in the completion of a systematic review, there has not been a systematic process for the identification of research gaps. We

Where To Download Synthesis Of Evidence Paper

developed a framework to systematically identify research gaps from systematic reviews. This framework facilitates the classification of where the current evidence falls short and why the evidence falls short.

Where To Download

Synthesis Of Evidence Paper

The framework included two elements: (1) the characterization the gaps and (2) the identification and classification of the reason(s) for the research gap. The PICOS structure (Population, Intervention, Comparison,

Where To Download Synthesis Of Evidence Paper

Outcome and Setting) was used in this framework to describe questions or parts of questions inadequately addressed by the evidence synthesized in the systematic review. The issue of timing, sometimes included as PICOTS, was

Where To Download Synthesis Of Evidence Paper

considered separately for Intervention, Comparison, and Outcome. The PICOS elements were the only sort of framework we had identified in an audit of existing methods for the identification of gaps used by EPCs and other

Where To
Download
Synthesis Of
related
Evidence Paper
organizations (i.e.,
health technology
assessment
organizations). We
chose to use this
structure as it is one
familiar to EPCs,
and others, in
developing
questions. It is not
only important to
identify research

Where To Download

Synthesis Of
Evidence Paper

gaps but also to determine how the evidence falls short, in order to maximally inform researchers, policy makers, and funders on the types of questions that need to be addressed and the types of studies needed to address these questions.

Where To Download

Synthesis Of Evidence Paper

Thus, the second element of the framework was the classification of the reasons for the existence of a research gap. For each research gap, the reason(s) that most preclude conclusions from being made in the systematic review is

Where To Download

Synthesis Of
Evidence Paper
chosen by the
review team

completing the
framework. To
leverage work
already being
completed by review
teams, we mapped
the reasons for
research gaps to
concepts from
commonly used
evidence grading

Where To Download

systems. Our objective in this project was to complete two types of further evaluation: (1) application of the framework across a larger sample of existing systematic reviews in different topic areas, and (2) implementation of the framework by

Where To Download

Synthesis Of Evidence Paper

EPCs. These two objectives were used to evaluate the framework and instructions for usability and to evaluate the application of the framework by others, outside of our EPC, including as part of the process of

Where To Download

Synthesis Of
Evidence Paper

completing an EPC report. Our overall goal was to produce a revised framework with guidance that could be used by EPCs to explicitly identify research gaps from systematic reviews. This is the first book to offer a comprehensive

around applications of information and communications technologies (ICTs) to smallholder agriculture in developing countries, there are still many questions on the effectiveness of ICT-based approaches. This study assesses the effects of

videomediated agricultural extension service provision on farmers' knowledge and adoption of improved agricultural technologies and practices in Ethiopia. The study focuses on a program piloted by the Government of Ethiopia and Digital Green and poses

Where To Download

three questions. First, to what extent does video-mediated extension lead to increased uptake of improved agricultural technologies and practices by smallholder farmers? Second, is video-mediated extension targeted at both spouses of the

Where To Download

Synthesis Of Evidence Paper

household more effective than when only targeted at the (typically male) household head?

Third, how cost-effective is a video-mediated approach to extension provision?

The study explores these questions with a randomized controlled trial

Where To Download

Synthesis Of Evidence Paper

designed to evaluate the video-mediated approach as applied to three priority crops (teff, wheat, maize) and three technologies (row planting, precise seeding rates, and urea dressing). The trial was implemented in 347 kebeles (village clusters) during the

2017 meher (rainy) season in Ethiopia's four most agriculturally important regional states. Analysis of data from our surveys of 2,422 households and 896 extension agents indicates that the video-mediated approach is more effective than the

conventional approach in achieving several key outcomes.

Specifically, we find that videomediated extension reaches a wider audience than the conventional approach and leads to higher levels of agricultural knowledge and

uptake of technologies in those kebeles randomly assigned to the program. While our results do point to greater participation and greater knowledge of female spouses in kebeles where both male and female spouses were targeted by the

program, we do not find clear evidence that the more inclusive approach translated into higher uptake of the subject technologies and practices. Finally, we find that the video-mediated approach becomes less costly as the scale of operation increases.
