

T Le Dash User Guide

By the middle of the century, men were prompted to disdain the decadent and gaudy colors of the pre-Revolutionary period and wear unrelievedly black frock coats suitable to the manly and serious world of commerce. Their wives and daughters, on the other hand, adorned themselves in bright colors and often uncomfortable and impractical laces and petticoats, to signal the status of their family.

How do we begin to describe our love for our children? Pamela Richardson shows us with her passionate memoir of life with and without her estranged son, Dash. From age five Dash suffered Parental Alienation Syndrome at the hands of his father. Indoctrinated to believe his mother had abandoned him, after years of monitored phone calls and impeded access eight-year-old Dash decided he didn't want to be "forced" to visit her at all; later he told her he would never see her again if she took the case to court. But he didn't count on his indefatigable mother's fierce love. For eight more years Pamela battled Dash's father, the legal system, their psychologist, the school system, and Dash himself to try and protect her son - first from his father, then from himself. *A Kidnapped Mind* is a heartrending and mesmerizing story of a Canadian mother's exile from and reunion with her child, through grief and beyond, to peace.

Forget everything you thought you knew about politics. This is Minnesota. Step into the wacky world of Minnesota politics, as magazine editor Dashmagne Grant moves from reluctant hero to star of The Tonight Show, and then on to gubernatorial candidate and national celebrity. Along the way, he falls in love twice-only to lose both women-as fate hurtles him from Minnesota to Dallas, with stops in Hollywood and the Florida Keys. All of this wouldn't be so bad if not for the moderately insane people who surround Dash. There's the clueless Minnesota governor with three last names and a political platform based on Mass Confusion. A shady best friend with a talent for picking up radio signals by grinding his teeth. And then there's the sexy super model who adores him, and an eccentric Texas billionaire who wants to make him famous. Is it any wonder Grant's normally serene life has come to a screeching halt?

This book by the National Institutes of Health (Publication 06-4082) and the National Heart, Lung, and Blood Institute provides information and effective ways to work with your diet because what you choose to eat affects your chances of

developing high blood pressure, or hypertension (the medical term). Recent studies show that blood pressure can be lowered by following the Dietary Approaches to Stop Hypertension (DASH) eating plan-and by eating less salt, also called sodium. While each step alone lowers blood pressure, the combination of the eating plan and a reduced sodium intake gives the biggest benefit and may help prevent the development of high blood pressure. This book, based on the DASH research findings, tells how to follow the DASH eating plan and reduce the amount of sodium you consume. It offers tips on how to start and stay on the eating plan, as well as a week of menus and some recipes. The menus and recipes are given for two levels of daily sodium consumption-2,300 and 1,500 milligrams per day. Twenty-three hundred milligrams is the highest level considered acceptable by the National High Blood Pressure Education Program. It is also the highest amount recommended for healthy Americans by the 2005 "U.S. Dietary Guidelines for Americans." The 1,500 milligram level can lower blood pressure further and more recently is the amount recommended by the Institute of Medicine as an adequate intake level and one that most people should try to achieve. The lower your salt intake is, the lower your blood pressure. Studies have found that the DASH menus containing 2,300 milligrams of sodium can lower blood pressure and that an even lower level of sodium, 1,500 milligrams, can further reduce blood pressure. All the menus are lower in sodium than what adults in the United States currently eat-about 4,200 milligrams per day in men and 3,300 milligrams per day in women. Those with high blood pressure and prehypertension may benefit especially from following the DASH eating plan and reducing their sodium intake.
