The man with the white face entered the carriage at Rugby. He moved slowly in spite of the urgency of his porter, and even while he was still on the platform I noted how ill he seemed. He dropped into the corner over against me with a sigh, made an incomplete attempt to arrange his travelling shawl, and became motionless, with his eyes staring vacantly. Presently he was moved by a sense of my observation, looked up at me, and put out a spiritless hand for his newspaper. Then he glanced again in my direction. I feigned to read. I feared I had unwittingly embarrassed him, and in a moment I was surprised to find him speaking. "I beg your pardon?" said I. "That book," he repeated, pointing a lean finger, "is about dreams." "Obviously," I answered, for it was Fortnum-Roscoe's Dream States, and the title was on the cover. He hung silent for a space as if he sought words. "Yes," he said, at last, "but they tell you nothing." I did not catch his meaning for a second. "They don't know," he added. I looked a

little more attentively at his face. "There are dreams,"he said, "and dreams."

Conversation analysis, discourse analysis and the study of rhetoric are combining to form a powerful interdisciplinary field of social scientific inquiry. Robin Wooffitt, in a systematic analysis of how people describe their paranormal encounters as factual experiences, introduces this field to the student and reader unfamiliar with its methods and theoretical constructs. Powerful cultural scepticism about the paranormal ensures that such experiences not only provide an implicit challenge to common-sense understanding of the world, but also undermine the pronouncements of the scientific orthodoxy. Wooffitt focuses on the ways in which accounts are organized in order to warrant the speaker's claim that the experiences actually happened and were not, say, the product of misperception, wish fulfilment or psychological aberration. He also

examines the design of descriptive sequences through which speakers portray themselves as 'normal', 'rational' people; and contributes to the study of identity construction in discursive practices. Wooffitt has illustrated and simplified complex theoretical arguments in conversation and discourse analysis with relevant empirical materials, and he usefully clarifies points of convergence and divergence between these analytic traditions.
