

Talking With Serial Killers The Most Evil People In The World Tell Their Own Stories

Listening to Killers offers an inside look at twenty years' worth of murder files from Dr. James Garbarino, a leading expert psychological witness who listens to killers so that he can testify in court. The author offers detailed accounts of how killers travel a path that leads from childhood innocence to lethal violence in adolescence or adulthood. He places the emotional and moral damage of each individual killer within a larger scientific framework of social, psychological, anthropological, and biological research on human development. By linking individual cases to broad social and cultural issues and illustrating the social toxicity and unresolved trauma that drive some people to kill, Dr. Garbarino highlights the humanity we share with killers and the role of understanding and empathy in breaking the cycle of violence. Drawn from more than 150 hours of exclusive tape-recorded interviews with Bundy, this collection provides shocking insights into the killer's 11th-hour confessions before his death in a Florida electric chair. A unique, horrifying self portrait of one of the most savage sex killers in history.

It's common for killers to grab the front pages, with crimes so appalling that they exert a strange fascination on many people. But until this study, it has been rare to hear about what these people are like behind the headlines. Criminologist Christopher Berry-Dee goes behind bars to bring readers the last word from some of the worst criminals in the world. They speak of their violence and shocking deeds from within some of the hardest prisons on earth. These are the killers' stories, in their own words, providing an intimate look inside the people most readers encounter only in nightmares.

From the author of *Serial Killers: The Method and Madness of Monsters* comes an in-depth examination of sexual serial killers throughout human history, how they evolved, and why we are drawn to their horrifying crimes. Before the term was coined in 1981, there were no "serial killers." There were only "monsters"--killers society first understood as werewolves, vampires, ghouls and witches or, later, Hitchcockian psychos. In *Sons of Cain*--a book that fills the gap between dry academic studies and sensationalized true crime--investigative historian Peter Vronsky examines our understanding of serial killing from its prehistoric anthropological

evolutionary dimensions in the pre-civilization era (c. 15,000 BC) to today. Delving further back into human history and deeper into the human psyche than Serial Killers--Vronsky's 2004 book, which has been called the definitive history of serial murder--he focuses strictly on sexual serial killers: thrill killers who engage in murder, rape, torture, cannibalism and necrophilia, as opposed to for-profit serial killers, including hit men, or "political" serial killers, like terrorists or genocidal murderers. These sexual serial killers differ from all other serial killers in their motives and their foundations. They are uniquely human and--as popular culture has demonstrated--uniquely fascinating.

'I wrapped duct tape around her mouth and her nose and watched her suffocate to death . . . then I went back to work' - former Colonel David Russell Williams of the Royal Canadian Air Force, 2010 Sunday Times-bestselling author Christopher Berry-Dee is back with a companion volume that delves even deeper into the savage world of psychopaths and their hideous crimes. This time, however, he combines sections on killers whom he has known, interviewed or corresponded with, with studies of psychopathic serial killers from the past, including Peter Kürten, the 'Düsseldorf Monster', John Christie, responsible for the killings at 10 Rillington Place; and Neville Heath, a ladykiller in every sense of the word. The result is a chilling narrative that sets the forensic examination of killers and their crimes within the context of murder in the twentieth and twenty-first centuries, an examination of the evil mind set against the insoluble problem of identifying psychopaths who kill. This is not a book for the squeamish, but it is undeniably fascinating in its portrayal of just what one human being will do to others - while all too often moving among us unnoticed and unhindered. If their crimes seem as incomprehensible as they are horrific, it is undeniably true that the world's most savage killers may be much closer than we think . . .

Christopher Berry-Dee is back. In Talking With Serial Killers: World's Most Evil, the bestselling author delves deeper still into the gloomy underworld of killers and their crimes.

Bestselling writer and criminologist Christopher Berry-Dee turns his attention to a new kind of victim: the wives or partners of serial murderers who remained unaware of exactly who they had fallen for until after their other half's arrest or, in some cases, conviction, for multiple murders. Sonia Sutcliffe first discovered that her husband, Peter, was leading a secret existence as 'the Yorkshire Ripper' only when he was arrested. The wife of the 'Hillside Strangler' only learned of her husband's crimes when state police smashed down her door in search of him. On finding out the truth, these innocents often experience a strange kind of guilt for not having recognised the killer in their home, as well as having to face the grim reality of betrayal and deceit. Christopher Berry-Dee speaks directly to killers and their oblivious loved ones to get inside the minds of the men and women who fall for murderers.

Prison Conversations with Lonnie Franklin, America's Most Notorious Serial Killer

Lessons Learned from My Twenty Years as a Psychological Expert Witness in Murder Cases

'I have interviewed, face to face, some of the world's most heinous serial killers, spree killers and mass murderers. I have sat with them on death rows throughout the United States, where the stench of cheap disinfectant, human sweat and evil permeates every brick of the human warehouses that imprison those from the legion of the damned. I have listened to their sickening tales of murder most foul and their boasts of having caused such suffering... ' - from the author's introduction

During the mid-1980s, a brutal killing spree began in Los Angeles as several women were murdered, having been sexually assaulted and shot in the chest with the same .25 calibre gun. The man responsible was Lonnie David Franklin Jr. However, his identity wouldn't be revealed for more than 20 years, by which time he had become one of America's most prolific serial killers. At the time, Los Angeles was a city struggling under the weight of racial inequalities and a crack epidemic that was sweeping through its most deprived areas. The victims were black women, and often addicts and sex workers. Many in the communities of South Central felt that these factors all caused a lack of interest on the part of the LAPD in investigating the murders, allowing Franklin to carry on his killing spree undetected.

Attorney and author Anne K. Howard first contacted Howell while he was serving a fifteen-year sentence for one of his murders. He was about to be charged for the remaining six. A unique and disturbing friendship between the two began, comprised of written correspondence, face-to-face prison visits and recorded phone calls. Over the course of years, Howell shared his troubled history with Howard. When his case was finally over, he told her every intimate, grizzly detail of how he became Connecticut’s most prolific serial killer. Fifteen-year-old Tony Ciaglia had everything a teenager could want until he suffered a horrific head injury at summer camp. When he emerged from a coma, his right side was paralyzed, he had to relearn how to walk and talk, and he needed countless pills to control his emotions. Turns out that reading nothing but true crime isn't exactly conducive to modern dating—and one woman is going to have to learn how to give love a chance when she's used to suspecting the worst. PhD candidate Phoebe Walsh has always been obsessed with true crime. She's even analyzing the genre in her dissertation—if she can manage to finish writing it. It's hard to find the time while she spends the summer in Florida, cleaning out her childhood home, dealing with her obnoxiously good-natured younger brother, and grappling with the complicated feelings of mourning a father she hadn't had a relationship with for years. It doesn't help that she's low-key convinced that her new neighbor, Sam Dennings, is a serial killer (he may dress business casual by day, but at night he's clearly up to something). It's not long before Phoebe realizes that Sam might be something much scarier—a genuinely nice guy who can pierce her armor to reach her vulnerable heart. The man convicted of the vicious murders of five college students in Gainesville, Florida, discusses his motivations and actions in committing the crimes, reflects on what made him into a killer, and his struggle to come to terms with what he did.
