**FORTIFIED** uses God's restoration of the city of Jerusalem as a metaphor for how He restores us. In **FORTIFIED** you will learn: the three enemies that attack the city of your life the four places they attack and how God will set you free. This is a simple, powerful tool that you can use for yourself and as you go to help others walk in God's promised freedom.

**Correctional Boot Camps: Military Basic Training or a Model for Corrections?** provides the most up-to-date assessment of the major perspectives and issues related to the current state of boot camps. The book goes beyond cursory examinations of the effectiveness of boot camps, presenting an in-depth view of a greater variety of issues. **Correctional Boot Camps** examines empirical evidence on boot camps drawn from diverse sources including male, female, juvenile, and adult programs from across the nation.

**IN 12 YEARS, MICHELLE LYONS WITNESSED NEARLY 300 EXECUTIONS.** First as a reporter and then as a spokesperson for the Texas Department of Criminal Justice, Michelle was a frequent visitor to Huntsville's Walls Unit, where she recorded and relayed the final moments of death row inmates' lives before they were put to death by the state. Michelle was in the death chamber as some of the United States' most notorious criminals, including serial killers, child murderers and rapists, spoke their last words on earth, while a cocktail of lethal drugs surged through their veins. Michelle supported the death penalty, before misgivings began to set in as the executions mounted. During her time in the prison system, and together with her dear friend and colleague, Larry Fitzgerald, she came to know and like some of the condemned men and women she saw die. She began to query the arbitrary nature of the death penalty and ask the question: do executions make victims of all of us? An incredibly powerful and unique look at the complex story of capital punishment, as told by those whose lives have been shaped by it, **Death Row: The Final Minutes** is an important take on crime and punishment at a fascinating point in America's political history.

Mass incarceration. In recent years it's become clear that the size of America's prison population is unsustainable -- and isn't needed to protect public safety. In this remarkable bipartisan collaboration, the country's most prominent public figures and experts join together to propose ideas for change. In these original essays, many authors speak out for the first time on the issue. The vast majority agree that reducing our incarcerated population is a priority. Marking a clear political shift on crime and punishment in America, these sentiments are a far cry from politicians racing to be the most punitive in the 1980s and 1990s. Mass incarceration threatens American democracy. Hiding in plain sight, it drives economic inequality, racial injustice, and poverty. How do we achieve change? From using federal funding to bolster police best practices to allowing for the release of low-level offenders while they wait for trial, from eliminating prison for low-level drug crimes to increasing drug and mental health treatment, the ideas in this book pave a way forward. **Solutions** promises to further the intellectual and political momentum to reform our justice system.

A guide to leading an ethical, happy, and spiritual life beyond religion and cultivating key human values, from a beloved world religious leader. Ten years ago, in the best-selling *Ethics for a New Millennium*, His Holiness the Dalai Lama first proposed an approach to ethics based on universal rather than religious principles. With *Beyond Religion*, he returns to the conversation at his most outspoken, elaborating and deepening his vision for the nonreligious way—a path to lead an ethical, happy, and spiritual life. Transcending the religion wars, he outlines a system of ethics for our shared world, one that makes a stirring appeal for a deep appreciation of our common humanity, offering us all a road map for improving human life on individual, community, and global levels. “ Best Religious Books of 2011 ” Huffington Post “ A book that brings people together on the firm grounds of shared values, reminding us why the Dalai Lama is still one of the most important religious figures in the world. ” — “ Cogent and fresh...This ethical vision is needed as we face the global challenges of technological progress, peace, environmental destruction, greed, science, and educating future generations. ” —*Spirituality & Practice*

Private prisons have become an integral part of the penal system in the United States, the United Kingdom, and Australia. There already are over 100 such prisons in these countries, and with the number of prisoners continuing to increase rapidly, the trend toward privatization seems irreversible. In this context, Richard Harding addresses the following issues: the contributions, positive or negative, that private prisons make to providing custody for offenders; whether or not private prisons stimulate improvement within the public prison system; and the difficulties with the regulation and accountability of private prisons. This book sets out to explore the contribution of private prisons to custodial practices, standards, and objectives. Many experts believe that, properly regulated and fully accountable, private prisons could lead to improvement within the public prison system, which has long been degenerate and demoralized. Harding sees the total prison system as a single entity, with two components: public and private. He relies upon extensive fieldwork and draws upon published literature as well as in-house documentation, discussions with public and private authorities, and a range of government documents. Key issues covered in *Private Prisons and Public Accountability* are: overcrowding, program delivery, prisoners' rights, quality of staff, and financial control. This volume will be a significant addition to the criminal justice literature, but it will also appeal to sociologists, policymakers, and scholars interested in the privatization of various institutions in our society.

An analysis of the U.S. prison system through real-life stories, and a look at the complex work of community-based social justice projects. Through the stories of prisoners and their families, including her own family's experiences, Maya Schenwar shows how the institution that locks up 2.3 million Americans and decimates poor communities of color is shredding the ties that, if nurtured, could foster real collective safety. As she vividly depicts here, incarceration takes away the very things that might enable people to build better lives. But looking toward a future beyond imprisonment, Schenwar profiles community-based initiatives that successfully deal with problems—both individual harm and larger social wrongs—through connection rather than isolation, moving toward a safer, freer future for all of us. "Maya Schenwar's stories about prisoners, their families (including her own), and the thoroughly broken punishment system are rescued from any pessimism such narratives might inspire by the author's brilliant juxtaposition of abolitionist imaginaries and radical political practices." —Angela Y. Davis, author of *Are Prisons Obsolete?* "Locked Down, Locked Out paints a searing portrait of the real-life human toll of mass incarceration, both on prisoners and on their families, and—equally compellingly—provides hope that collectively we can create a more humane world freed of prisons. Read this deeply personal and political call to end the shameful inhumanity of our prison nation." —Dorothy Roberts, author of *Shattered Bonds* and *Killing the Black Body* "This book has the power to transform hearts and minds, opening us to new ways of imagining what justice can mean for individuals, families, communities, and our nation as a whole. Maya Schenwar's personal, openhearted sharing of her own family's story, together with many other stories and real-world experiments with transformative justice, makes this book compelling, highly persuasive, and difficult to put down. I turned the last page feeling nothing less than inspired." —Michelle Alexander, author of *The New Jim Crow*

"Tells the story of a traumatic life spent witnessing hundreds of people being executed in Texas' most infamous prison." —Daily Beast "I can't remember his name or his crime. What I remember is the nothingness. No family members, no friends, no comfort. Maybe he didn't want them to come, maybe they didn't care, maybe he didn't have any in the first place. It was just a prison official and two reporters, including me, looking through the glass at this man strapped fast to the gurney, needles in both arms, staring hard at the ceiling. When the warden stepped forward and asked if he wanted to make a last statement, the man barely shook his head, said nothing and started blinking. That's when I saw it: a single tear at the corner of his right eye. A tear he desperately wanted to blink away, a tear he didn't want us to see. It pooled there for a moment before running down his cheek. The warden gave his signal, the chemicals started flowing, the man coughed, sputtered and exhaled. A doctor entered the room, pronounced the man dead and pulled a sheet over his head." —Michelle Lyons, from the Prologue Michelle Lyons witnessed nearly 300 executions at the Texas State penitentiary. This "haunting, dark and hard to put down" behind-the-scenes look at those final moments of life relates shocking true stories of the inmate, his/her family members, prison officials, the death-row chaplain and the victim's loved ones—all of whom come together in the death chamber (Houston Chronicle).

Unsparring and important. . . . An informative, clearheaded and sobering book.—Jonathan Yardley, *Washington Post* (1999 Critic's Choice) Inner-city black America is often stereotyped as a place of random violence, but in fact, violence in the inner city is regulated through an informal but well-known code of the street. This unwritten set of rules—based largely on an individual's ability to command respect—is a powerful and pervasive form of etiquette, governing the way in which people learn to negotiate public spaces. Elijah Anderson's incisive book delineates the code and examines it as a response to the lack of jobs that pay a living wage, to the stigma of race, to rampant drug use, to alienation and lack of hope.

*Punishment for Sale* is the definitive modern history of private prisons, told through social, economic and political frames. The authors explore the origin of the ideas of modern privatization, the establishment of private prisons, and the efforts to keep expanding in the face of problems and bad publicity. The book provides a balanced telling of the story of private prisons and the resistance they engendered within the context of criminology, and it is intended for supplemental use in undergraduate and graduate courses in criminology, social problems, and race & ethnicity.

*A series of essays examines future trends in various areas of criminal justice, including juvenile justice, sex offenses, proactive policing, probation, planning in 'sunbelt' States, and the insanity defense. The opening essay evaluates values affecting the American criminal justice system, considers the impact of future value issues, and recommends an approach for establishing justice as a perceived value in American society and particularly the criminal justice system, while the second essay draws lessons for the future of American justice from the experiences of ancient Corinth, Sparta and Athens. Issues requiring proactive criminal justice planning in the sunbelt States are identified and discussed in the third essay, followed by a paper that predicts decriminalization of sex laws relating to prostitution, homosexual acts, adultery, and fornication and a retention of laws protecting children, proscribing forced violent sex, and prohibiting sex acts that are a serious public nuisance. Another essay portrays future policing as being proactive with an orientation toward helping structure communities and guide citizen behavior so as to prevent crime. An argument for the professionalization of police advocates academic and training experience that stimulates the learner to self-examination and provides a sound practicum experience that links classroom and professional experience. A discussion of probation considers issues in organizational development and issues relating to roles in the organization, organizational procedures, relationships in the organization, and organizational structure. A scenario for the future of the juvenile justice system views it as becoming obsolete as Supreme Court due process mandates make it an unnecessary replica of adult criminal justice processing. The concluding essay presents the current status of the insanity defense and suggests an alternative approach: the doctrine of diminished or partial responsibility. References and footnotes accompany each essay.*

Summary of Enactments

Lead ordinary people in accomplishing the extraordinary! How do you get others to follow you to places they've never been before? How do you get others, by free will and through free choice, to move forward together on a common purpose? Just how do you get others to want to do things that matter and make a difference? In *The Five Practices of Exemplary Leadership*, Jim Kouzes and Barry Posner, authors of *The Leadership Challenge* and *Credibility*, uncover the fundamental practices that have enabled leaders to get extraordinary things done by studying the times when leaders performed at their personal best. The Five Practices of Exemplary Leadership are: Challenging the Process Inspiring a Shared Vision Enabling Others to Act Modeling the Way Encouraging the Heart Learn how Kouzes and Posner have translated these five practices into behavioral statements so that managers and non-managers in public and private organizations can assess their skills and use the feedback of others to improve their own leadership abilities. Also includes the Ten Commandments of Leadership.

Criminological and penological scholarship has in recent years explored how and why institutions and systems of punishment change – and how and why these changes differ in different contexts. Important though these analyses are, this book focuses not so much on the changing nature of institutions and systems, but rather the changing nature of penal practice and practitioners Bringing together leading researchers from around the world, this collection unites studies that aim to describe and critically analyse penal practice with studies that investigate its effectiveness and prescribe its future development. Reversing penology's usual preoccupation with the prison, the book focuses mainly on penal practice in the community (i.e. on probation, parole, offender supervision and 'community corrections'). The first part of the book focuses on understanding practice and practitioners, exploring how changing social, cultural, political, and organisational contexts influence practice, and how training, development, professional socialisation and other factors influence practitioners. The second part is concerned with how practitioners can be best supported to develop the skills and approaches that seem most likely to generate positive impacts. It contains accounts of new practice models and approaches, as well as reports of research projects seeking both to discover and to encourage effective practices. This book explores internationally significant and cutting-edge theoretical and empirical work on the cultures, practices, roles and impacts of frontline practitioners in delivering penal sanctions. As such, it will be of interest to researchers in criminology, social work and social policy as well as correctional policy makers and those involved in community supervision.

In *More God, Less Crime* renowned criminologist Byron R. Johnson proves that religion can be a powerful antidote to crime. The book describes how faith communities, congregations, and faith-based organizations are essential in forming partnerships necessary to provide the human and spiritual capital to effectively address crime, offender rehabilitation, and the substantial aftercare problems facing former prisoners. There is scattered research literature on religion and crime but until now, there has never been one publication that systematically and rigorously analyzes what we know from this largely overlooked body of research in a lay-friendly format. The data shows that when compared to current strategies, faith-based approaches to crime prevention bring added value in targeting those factors known to cause crime: poverty, lack of education, and unemployment. In an age of limited fiscal resources, Americans can't afford a criminal justice system that turns its nose up at volunteer efforts that could not only work better than the abysmal status quo, but also save billions of dollars at the same time. This book provides readers with practical insights and recommendations for a faith-based response that could do just that.

*Hypercrime develops a new theoretical approach toward current reformulations in criminal behaviours, in particular the phenomenon of cybercrime. Emphasizing a spatialized conception of deviance, one that clarifies the continuities between crime in the traditional, physical context and developing spaces of interaction such as a 'cyberspace', this book analyzes criminal behaviours in terms of the destructions, degradations or incursions to a hierarchy of regions that define our social world. Each chapter outlines violations to the boundaries of each of these spaces - from those defined by our bodies or our property, to the more subtle borders of the local and global spaces we inhabit. By treating cybercrime as but one instance of various possible criminal virtualities, the book develops a general theoretical framework, as equally applicable to the, as yet unrealized, technologies of criminal behaviour of the next century, as it is to those which relate to contemporary computer networks. Cybercrime is thereby conceptualized as one of a variety of geometries of harm, merely the latest of many that have extended opportunities for illicit gain in the physical world. Hypercrime offers a radical critique of the narrow conceptions of cybercrime offered by current justice systems and challenges the governing presumptions about the nature of the threat posed by it. Runner-up for the British Society of Criminology Book Prize (2008).*
