A Study of the Origins of Middle
Arabic

**Once considered a question of
an international order based
on consolidated statehood
and homogeneous social**

communities within national borders, global order has become a question of alternative political articulations, resistance movements, and cultural diversity, among others. This book first critically analyzes

**the conditions for the
struggles of theorizing global
normative order in political
and IR theory. Second, to
make sense of the presence
of difference and possibility
for global normative order in
view of the simultaneous**

absence of first foundations, the study draws on post-foundational thinking based on the seminal work of German philosopher Martin Heidegger and Argentine political theorist Ernesto Laclau. Finally, the author

**develops a theoretical
framework for a hauntological
approach to global normative
order that provides an
alternative and theoretically
coherent explanation for the
emergence of global order.
This is of interest to scholars**

**as well as practitioners
(including activists)
concerned with global social
relations, global political
discourse, and the
construction of global identity
and normative order(s).
