In A New Agenda for Higher Education, the authors endorse higher education's utility for enhancing the practical as well as intellectual dimensions of life by developing a third, different conception of educational purpose. Based on The Carnegie Foundation for the Advancement of Teaching seminar that brought together educators from six professional fields with faculty from the liberal arts and sciences, A New Agenda for Higher Education proposes an educational aim of "practical reason," focusing on the interdependence of liberal education and professional training.

Do you like 'Pretty Woman', with Julia Roberts and Richard Gere? Do you love 'Maid in Manhattan', starring Jennifer Lopez and Ralph Fiennes? And how about little orphan 'Annie'? Well, 'Pygmalion' is the play that paved the ways for these - and countless other - rags-to-riches films, plays, and books. In it, phonetics scientist professor Henry Higgins and linguist Colonel Pickering make a bet. The scientist wagers that he

can turn Cockney flower girl Eliza Doolittle into a woman with the poise and diction of a duchess. She is given new clothes, speech lessons - and subjected to merciless ridicule. Becoming Shaw's most famous play, 'Pygmalion' throws blinding light on the invidious habits and traditions at both levels of society. George Bernard Shaw (1856-1950) was a giant of the literary and political world at the end of the 19th century and deep into the 20th century. Best known as a playwright, he was also a famous critic, political activist and polemicist, stoking controversy to provoke debate. His first successful play was 'Arms and the Man', which was followed by classics including 'Man and Superman' and 'Pygmalion', which was turned into the musical 'My Fair Lady'. In 1925, he was awarded the Nobel Prize in Literature. His opinions still divide critics, but he is widely acknowledged as second only to William Shakespeare as a playwright.

For more than three decades Michael Apple has sought to uncover and articulate the connections among knowledge, teaching and power in education. Beginning with *Ideology and Curriculum* (1979), Apple moved to understand the relationship between and among the economy, political and cultural power in society on the one hand "and the ways in which education is thought about, organized and evaluated" on the other. This edited collection invites several of the world's leading education scholars to reflect on the relationships between education and power and the continued impact of Apple's scholarship. Like Apple's work itself, the essays will span a range of disciplines and inequalities; emancipatory educational practices; and the linkage between the economy and race, class and gender formation in relation to schools. From post-truth politics to “no-platforming” on university campuses, the English language has been both a potent weapon and a crucial battlefield for our divided politics. In this important and wide-ranging intervention, Thomas Docherty explores the politics of the English language, its implication in the dynamics of political power and the spaces it offers for dissent and resistance. From the authorised English of the King James Bible to the colonial project of University English Studies, this book develops a powerful history for contemporary debates about propaganda, free speech and truth-telling in our politics. Taking examples from the US, UK and beyond - from debates about the Second Amendment and free-speech on campus, to the Iraq War and the Grenfell Tower fire - this book is a powerful and polemical return to Orwell's observation that a degraded political language is intimately connected to an equally degraded political culture.

This casebook is part of a nationwide effort to capture and use practitioner knowledge to better prepare teachers for the reality of today's classrooms, given a student population vastly different from that of even a decade ago. Consciously designed to provoke engaging and demanding discussion, the cases presented here are candid, dramatic, highly readable accounts of teaching events or series of events. Set in three of the nation's most diverse cities -- San Francisco, Los Angeles, and Phoenix -- the cases offer problem-based snapshots of on-the-job

dilemmas. The teacher-authors discuss topics that generate heated interchange and run the risk of polarizing opinions and creating defensive assumptions, particularly those dealing with bias, race, and class. These issues, plus cultural behaviors and socioeconomic circumstances have important implications for classroom practices. By examining such issues, the editors hope that educators will see -- and act on -- the need for a greater variety of teaching styles, distribution of opportunities, and educational access for all students.

In this study, first published in 1982, the author draws on his considerable experience at all levels in the school system to provide a Marxist critique of that structure. He argues that the schooling process within contemporary corporate capitalism is inimical to education while true education in turn is inimical to capitalism. He argues further that teachers, who are participants in ongoing class struggle, should not be concerned primarily with education only when they perform the function of the collective labourer. This title will be of interest to those concerned with education and sociology.

This book explores embodiment in second language education, sociocultural theory and research. It focuses on process drama approach that engages learners' imagination, body and voice to create a felt-experience of the second language and culture. In two parts, it begins by examining the aesthetic and intercultural dimension of performative language teaching, the elements of drama in-action. The central part of the book examines issues related to play, emotions, classroom discourse and assessment when using language through process drama, in a sociocultural perspective. The third part is an analysis of the author's qualitative research which informs a subtle discussion on reflective practitioner methodology, learner engagement and teacher artistry. Each chapter includes a workshop, illustrating in practice what embodying language in action can look like when working with asylum seekers, adult learners with intellectual disabilities, pre-service teachers, international students and children involved in a Content and Language Integrated Learning (CLIL) programme. A unique combination of theory, research and reflective practice, this book provides valuable insights for teacher educators and researchers in the fields of performative and sociocultural language learning.

Seminar paper from the year 2003 in the subject English Language and Literature Studies - Literature, grade: 2,5 (B), University of Applied Sciences Bingen (English Philology), course: PS II Literature: The (R)Evolution of Feminist Writing, language: English, abstract: Even a hundred years after the word "education" would have been rarely mentioned in connection with "women". Heated discussions addressed questions such as how women should be educated, and what education would mean for them. Women's traditional and conventional tasks were generally seen in household

giving birth to many children, and to cater for the sexual needs of their husbands. This role model was based on the concept of the so-called model, in which the female sex did not exist at all, as people only thought of one human sex, the male sex. In contrast to modernity's view that men and women are "opposites", Thomas Laqueur proposed an early one-sex model in which women were seen as fundamentally the same as men, or imperfect or failed, versions of men. They were said to be inferior, weaker, and more passive than their male counterparts. The status of women could be compared to that of a slave, because women were totally – economically and physically – dependent on their fathers, and, later, on their husbands. Men saw the progressive development of women, and the female self-esteem, as a major risk for their own status and the stability of patriarchy, which had been established by men throughout the past centuries. "[...] They were afraid that their wives might, if their value was recognized, become unruly and claim to be the heads of the household [...]" Partly due to the fact that "by law everything a woman possessed became the property of her husband when she married, [which had] the effect [that women had] to hand over [their] property to some person yet unborn before her marriage", this system forced women to be subjected not only to their husbands, but to all male family members. Beginning with the period of Enlightenment in the late 18th century, the attitude towards the one-sex model gradually changed. More and more people tried to distinguish between man and woman by referring to anatomic differences. The two-sex model started to emerge and claim a foothold in people's minds, and the one-sex model was finally viewed as overcome. Yet, the declared differences between the two sexes did not make it successful. Hence, the one-sex model remained like a shadow looming over the gender issues. Nevertheless, the female sex gained power and began to claim their rights.

Pygmalion is a play by George Bernard Shaw, named after a Greek mythological character. It was first presented on stage to the public in 1912. Professor of phonetics Henry Higgins makes a bet that he can train a bedraggled Cockney flower girl, Eliza Doolittle, to pass for a duchess at an ambassador's garden party by teaching her to assume a veneer of gentility, the most important element of which, he believes, is impeccable speech. The play is a sharp lampoon of the rigid British class system of the day and a commentary on women's independence.
