This is the academic Age of the Neoliberal Arts.

Campuses—as places characterized by democratic debate and controversy, wide ranges of opinion typical of vibrant public spheres, and service to the larger society—are everywhere being creatively destroyed in order to accord with market and military models befitting the academic-industrial complex. While it has become increasingly clear

that facilitating the sustainability movement is the great 21st century educational challenge at hand, this book asserts that it is both a dangerous and criminal development today that sustainability in higher education has come to be defined by the complex-friendly “ green campus ” initiatives of science, technology, engineering and management programs. By contrast, *Greening the Academy: Ecopedagogy Through the Liberal Arts* takes the standpoints of those working for environmental and ecological justice in order to critique the unsustainable disciplinary limitations within the humanities and social sciences, as well as provide tactical reconstructive openings toward an empowered liberal arts for sustainability. *Greening the Academy* thus hopes to speak back with a collective demand that sustainability education be defined as a critical and moral vocation comprised of the diverse types of humanistic study that will benefit the well-being of our emerging planetary community and its numerous common locales.

'Bretherick' is widely accepted as the reference work on reactive chemical hazards and is essential for all those working with chemicals. It attempts to include every chemical for which documented information on reactive hazards has been found. The text covers over 5000 elements and compounds and as many again of secondary entries involving two or more compounds. One of its most valuable features is the extensive cross referencing throughout both sections which links similar compounds or incidents not obviously related. The fifth edition has been completely updated and revised by the new Editor and contains documented information on hazards and appropriate references up to 1994, although the text still follows the format of previous editions. Volume 1 is devoted to specific information on the stability of the listed compounds, or the

reactivity of mixtures of two or more of them under various circumstances. Each compound is identified by an UPAC-based name, the CAS registry number, its empirical formula and structure. Each description of an incident or violent reaction gives reference to the original literature. Each chemical is classified on the basis of similarities in structure or reactivity, and these groups are listed alphabetically in Volume 2. The group entries contain a complete listing of all the compounds in Volume 1 assigned to that group to assist cross referral to similar compounds. Volume 2 also contains hazard topic entries arranged alphabetically, some with lists. Appendices include a fire related data table for higher risk chemicals, indexes of registry numbers and chemical names as well as reference abbreviations and a glossary.

An award-winning scientist offers his unorthodox approach to childrearing: “Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions” (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you’re like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley’s sassy kids show him the limits of his profession. *Parentology* teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You’ll be laughing and learning at the same time.

Praise for the first edition: This book is on the cutting edge—it shows us the vast potential of EMDR in healing culturally based traumas that persist today and the traumas that are endemic to our cultural histories. The topics targeted could not be timelier . . . Few works have the scope, breadth, and depth of information and practical tools provided to extend cultural

competence that we see in [this book]. —Sandra S. Lee and Kimberly Molfetto (2017). *Cultural Competence, Cultural Trauma, and Social Justice With EMDR* [Review of *Cultural Competence and Healing Culturally Based Trauma With EMDR Therapy: Innovative Strategies and Protocols*].

PsycCRITIQUES, 62(43). Now in its second edition, this groundbreaking text continues to offer guiding direction on the frontiers of culturally informed EMDR therapy and the treatment of culturally based trauma and adversity. Over twenty-five authors combine to address a diverse range of current and emerging topics. Ten new second edition chapters include a call for broader recognition of culturally based trauma and adversity within the trauma field, the core human need for connection and belonging, and strategies for clinician self-reflection in developing a culturally competent clinical practice that is multicultural inclusive, actively anti-oppressive, and grounded in cultural humility. Other new chapters offer considerations in working with Black, American Indian, Asian-American, and Latinx clients; immigration challenges; and social class identity. Overall, this book provides graspable conceptual frameworks, useful language and terminology, in-depth knowledge about specific cultural populations, clinical examples, practical intervention protocols and strategies, research citations, and additional references. Innovative Strategies and Protocols

Ecopedagogy Through the Liberal Arts

PRAXIS II Elementary Education

This book presents the latest research on understanding language teacher identity and development for both novice and experienced researchers and educators, and introduces non-experts in language teacher education to key topics in teacher identity research. It covers a wide range of backgrounds, themes, and subjects pertaining to language teacher identity and development. Some of these include the effects of apprenticeship in doctoral training on novice teacher identity; the impacts of mid-career redundancy on the professional identities of teachers;

challenges faced by teachers in the construction of their professional identities; the emerging professional identity of pre-service teachers; teacher identity development of beginning teachers; the role of emotions in the professional identities of non-native English speaking teachers; the negotiation of professional identities by female academics. Advances and Current Trends in Language Teacher Identity Research will appeal to academics in ELT/TESOL/applied linguistics. It will also be useful to those who are non-experts in language teacher education, yet still need to know about theories and recent advances in the area due to varying reasons including their affiliation to a teacher training institute; needs to participate in projects on language teacher education; and teaching a course for pre-service and in-service language teachers.

What does it take to be a good school principal? No two principals work in exactly the same way, but research shows that effective principals do focus on a core set of factors that are critical to fostering success for all students. In Qualities of Effective Principals, James H. Stronge, Holly B. Richard, and Nancy Catano delineate these factors and show principals how to successfully balance the needs and priorities

of their school and continuously develop and refine their leadership skills. Throughout the book, the authors provide readers with helpful tools and extensive research that will help them to

- *Develop a blueprint for sustained school leadership**
- *Create an effective school climate for learning**
- *Select, support, and retain high-quality teachers and staff**
- *Assess instructional high quality**
- *Build a foundation for organizational management**
- *Create, maintain, and strengthen community relationships**
- *Make contributions to the professional educational community**
- *Define their critical role in student achievement**

This book also includes practical skills checklists, quality indicators and red flags for effective leadership, and an extensive annotated bibliography. Qualities of Effective Principals is an excellent resource for both experienced and new principals committed to developing and leading strong schools that help all students succeed.

Qualities of Effective Principals

Accessible yet theoretically rich, this landmark text introduces key concepts and issues in critical discourse analysis and situates these within the field of educational research. The book invites readers to consider the theories and methods of three major traditions in critical discourse studies — discourse analysis, critical discourse analysis, and multimodal discourse analysis -- through the empirical work of leading scholars in the field. Beyond providing a useful overview, it

contextualizes CDA in a wide range of learning environments and identifies how CDA can shed new insights on learning and social change. Detailed analytic procedures are included to demystify the process of conducting CDA, to invite conversations about issues of trustworthiness of interpretations and their value to educational contexts, and to encourage researchers to build on the scholarship in critical discourse studies. This edition features a new structure; a touchstone chapter in each section by a recognized expert (Gee, Fairclough, Kress); and a stronger international focus on both theories and methods. NEW!
