Health and Human Services, along with the Department of Veterans Affairs and the National Highway Traffic Safety Administration, asked the Institute of Medicine (IOM) to convene a committee of experts to develop national guidance for use by state and local public health officials and health-sector agencies and

Building on the work of phase one (which is described in IOM's 2009 letter report, **Guidance for Establishing Crisis**

Standards of Care for Use in Disaster Situations), the committee developed detailed templates enumerating the functions and tasks of the key stakeholder groups involved in crisis standards of care (CSC) planning, implementation, and public engagement- state and local governments, emergency

This report concludes that overall,

Corrections payments for hospital care services have risen \$59.4 million from FY1998-99 through 2002-03, and grew at an average rate of 21% per year, outpacing the nat. consumer price index average of 8% annual growth for hospital services during this same period. The reasons for this growth can be attributed to the combination

Access Free Tenet Healthsystem Medical Inc California

of more expensive health care and to Corrections & increased use of contracted hospital facilities. Analysis indicates that increases in its inpatient hospital payments are driven primarily by more expensive services, whereas increases in its outpatient hospital payments are driven by increases in both the price of services and number of

The award-winning book that inspired an Apple Original series from Apple TV+ • Pulitzer Prize winner Sheri Fink 's landmark investigation of patient deaths at a New Orleans hospital ravaged by Hurricane Katrina—and her suspenseful portrayal of the quest for truth and justice. In the

Access Free Tenet Healthsystem Medical Inc California

tradition of the best investigative journalism, physician and reporter Sheri Fink reconstructs 5 days at Memorial Medical Center and draws the reader into the lives of those who struggled mightily to survive and maintain life amid chaos. After Katrina struck and the floodwaters rose, the power failed, and the heat climbed, exhausted

caregivers chose to designate certain patients last for rescue. Months later, a doctor and two nurses were arrested and accused of injecting some of those patients with life-ending drugs. *Five Days at Memorial*, the culmination of six years of reporting, unspools the mystery of what happened in those days, bringing the reader into a

hospital fighting for its life and into a conversation about the most terrifying form of health care rationing. In a voice at once involving and fair, masterful and intimate, Fink exposes the hidden dilemmas of end-of-life care and reveals just how ill-prepared we are for the impact of large-scale disasters—and how we can do better.
