Earthmovers in Scotland: Mining,
Quarries, Roads & Forestry

Timber Harvesting

Commerce Business Daily

**As Scottish Correspondent for
Earthmovers Magazine, David Wylie**

has enjoyed privileged access to the mines, quarries, road projects and forestry sites across Scotland. On his visits he has seen some of the biggest and arguably the best, earthmoving machinery in the world, in action. Earthmovers in Scotland brings together 32 of David's reports from these visits to tell the story of the highly skilled, experienced owners, drivers and managers that work with earthmoving equipment and explains why they select, maintain and operate these machines. The book features some of the largest earthmovers in the UK, such as Caterpillar's D11R bulldozer, Liebherr's massive 320 tonne R9350s and the mighty 520 tonne Q&K RH200 at Banks Mining Shotton surface mine in

Northumberland, a short hop over the Scottish border. It also takes a look at a 1.5 tonne mini digger, special trailers that can lift and transport 1800 tonne bridges into position, and covers Demag's H485 record breaking mining shovel amongst others. Taking pride of place in the book are over 400 stunning photographs, many of which have not been seen before and many of which feature machines that were the first of their kind. Each high quality photo has been carefully composed to capture each machine in all its power and brilliance with the spectacular Scottish scenery as a backdrop and 80 of the most important and detailed images are presented as double pages to help you get close to the action. This beautiful book

Massachusetts developed the world's first backhoe. This revolutionary invention that could dig and load by swinging side to side, was also the world's first all hydraulically actuated and controlled machine for digging. Vaino and Roy then formed Wain-Roy Corporation. Their grassroots contribution to the earth moving industry lead to the development of twenty-six major backhoe related break-through designs, including the tractor loader backhoe, which formed the worldwide multi-billion-dollar industry that we know today. The amazing story of Wain-Roy and the invention of the backhoe is one of inspiration, struggle, genius, success, theft and

failure. Credit for the backhoe is often given to other larger outfits who no-doubt fueled the rise of its widespread use. Few people alive still remember the greatest triumphs and failures of the true inventors and innovators of first backhoe and the first all-hydraulic digger. Authors Lee Horton and Dave Willens, two engineers from Central Massachusetts, wanted to capture this fascinating history before it was lost to time.

Phosphates and gold in Finland, copper in Sweden, limestone in Holland, coal in Wales and Spain - throughout Europe the raw materials for industry, construction and power are being excavated every day. Steven Vale looks at fourteen European countries to show the diversity of surface mining machinery and techniques. He describes the regions in which the mining is set, provides information about the industries they serve and portrays some of the characters involved. Steven's

fine photographs and detailed text then show the excavators, dozers, wheeled loaders and dump trucks, many of which are the largest in their classes. Some of these are veterans, others are the most modern available. He reveals why the mine managers selected particular brands, how they feel about their selection and whether they are likely to continue with the same choices in future. He also describes how the mines are facing up to the environmental challenges which increasingly affect them. Massive machines, with famous names - Liebherr, Caterpillar, Komatsu, Hitachi,
