A collection of abstract poetry that traverses history, religion, the seven deadly sins, and the collective unconscious.

Whether the reader is, has been, or will become a middle school teacher, or a middle school student or parent, this book provides a close look at life in middle school: How challenges emerge and obstacles are overcome, as well as how one student turned his life and his school around. Many middle school students don't see the dangers of not working to their potential.

Involuntarily encouraged by social promotion and other factors, they may not reach a turning point until, in some cases, it is too late. In *Turning Point*, authors Paul Rallion and Chuck Wong present the reality of many middle school students, some of whom believe that all they have to do is sit pretty in class. Yet, there are other students who show tremendous academic growth. What makes them do well? What's their turning point?

Playing While White argues that whiteness matters in sports culture, both on and off the field. Offering critical analysis of athletic stars such as Johnny Manziel, Marshall Henderson, Jordan Spieth, Lance Armstrong, Josh Hamilton, as well as the predominantly white cultures of NASCAR and extreme sports, David Leonard identifies how whiteness is central to the commodification of athletes and the sports they play. Leonard demonstrates that sporting cultures are a key site in the trafficking of racial ideas, narratives, and ideologies. He identifies how white athletes are frequently characterized as intelligent leaders who are presumed innocent of the kinds of transgressions black athletes are often pathologized for. With an analysis of the racial dynamics of sports traditions as varied as football, cycling, hockey, baseball, tennis, snowboarding, and soccer, as well as the reception and media portrayals of specific white athletes, Leonard examines how and why whiteness matters within sports and what that tells us about race in the twenty-first century United States.

Critical Thinking TACTICS for Nurses: Achieving the IOM Competencies is a reader-friendly guide to performing, learning and evaluating critical thinking in all aspects of nursing care. Award-winning authors M. Gaie Rubenfeld and Barbara K. Scheffer draw on their research and expertise in teaching and practice to blend critical thinking components with the Institute of Medicine's (IOM) five core competencies: patient-centered care, interdisciplinary team work, evidence-based practice, informatics, and quality improvement. Issues addressed include critical thinking language and awareness enhancement, the impact of critical thinking on quality care, mentoring the critical thinking of staff and students and designing performance criteria for critical thinking. New to this edition: Significant updates and additional current references to all 5 IOM chapters. **New Chapter 10 - Assessing Critical Thinking. New Chapter 11 - Thinking Realities of Yesterday, Today, and Tomorrow. New "stories" from practicing nurses and others.**

Education is your foundation. If you want to sing, you must educate yourself on how to sing well. If you want to rap, it takes more than a pen and a pad, and a few rounds of freestyle in back of the school. If you want to really be a successful athlete, you must learn the science of the sport, know it as though you breathe it. Whatever it is you want to do, you must educate yourself on how to do it. You must learn, and you must plan. If you do not plan, you will fail.

This is the first hands-on guide to the entire process of designing and manufacturing open source hardware. Drawing on extensive personal experience with DIY, maker, and hardware hacking projects, industry-leading contributors share proven approaches to design, remixing, fabrication, manufacturing, troubleshooting, licensing, documentation, and running an open source hardware business. Part I covers the emergence and evolution of open source hardware, what open source hardware licenses mean, and the growing role of standards in making hardware more open. Part II offers contributors' expert advice on key tasks, ranging from creating derivatives to using source files. Part III turns to production, showing how to manufacture at multiple scales—from personal to commercial. Appendixes provide valuable checklists for design, manufacture, security, and documentation. And to foster even more hands-on learning and experimentation, the low-cost Blinky Buildings open source hardware kit is used as an example throughout. Learn how to Get involved in the open source hardware community—its history and values Develop designs you can successfully prototype and manufacture Walk step by step through making derivatives from existing projects Build open source 3D printers, and remix 3D printable objects Create open source wearables Work with diverse source files, from electronics to other physical materials Fabricate your own designs Move from prototype to commercial manufacturing, and troubleshoot problems Choose a business model and build a profitable open source hardware company Avoid pitfalls associated with trademarks, copyrights, patents, and licensing Write documentation other hardware hackers can use Use open source hardware in education, helping students learn without boundaries

Critical Thinking TACTICS for Nurses: Achieving IOM Competencies, Third Edition is a user-friendly and practical manual focusing on the day-to-day realities of doing, learning, and evaluating critical thinking in nursing. With clear examples of both the parts and the whole of this complex process, each chapter includes action learning activities to promote critical thinking: Tracking, Assessing, and Cultivating Thinking to Improve Competency-based Strategies or TACTICS. Issues addressed include critical thinking language and awareness enhancement, the impact of critical thinking on quality care, mentoring the critical thinking of staff and students, and designing performance criteria for critical thinking. Based on the authors' research in both defining and assessing critical thinking in nursing, this text also draws from their years of refining critical thinking teaching and learning methods.

This book is for those Louisiana slaves (and all the American slaves) whose labor was forced without regard to their humanity, even further, with unrestrained disrespect for their existence. This book is a tribute to the indigenous (originated in or native to the region) Black people of Northeast Louisiana, those folk who were reared in the rural areas, villages, and small towns; who worked on the farms and plantations; sharecropped; cleared all the land; tended all the livestock; planted and harvested all the crops; cooked for, babysat, and cleaned the homes of White folk; and endured the hardships of it all. This is a tribute to those laborers and professionals who strived for better lives for themselves and their families; the people who remained in Monroe, those who migrated to Monroe to make it a fine place to call home, and those who returned to the warmth of Monroe to live; and also, to those who left the area and moved on to other parts of the United States and world. I want to thank them all for trusting me with their stories.

All foods are good. That is the message of this commonsense book that helps parents speak to their kids about food and nutrition. It is a message that is long overdue, especially when you consider that 81 percent of ten-year-olds are afraid of being fat -- half are already dieting -- and twelve million American children are obese. There is a disease gripping our nation.

Out of Food offers a cure. This practical guide is filled with hands-on tools and in-depth advice for putting a stop to unhealthy eating habits before they begin. In *Take the Fight Out of Food* parents will learn how to:

- Understand their own "food legacy" and how it affects their children
- Keep their children connected to food in a positive way
- Talk to their kids about food
- Identify the signs of disordered eating
- Recognize the different types of eaters

with the six types of eaters -- including the Picky Eater, the Grazer, and the Beige Food Eater With guidance, inspiration, and encouragement, this invaluable book helps parents to teach their children to eat for life in a positive and healthy family environment.

A West Virginia Homecoming

During Thanksgiving vacation of her freshman year at Swarthmore College (1977), Elizabeth, at her mother's insistence, attended a "stress-reduction" session with a biofeedback technician on staff at a Manhattan psychologist's office. During that first visit, this man filled her ears with prophetic visions of a glorious future--the inheritance of those fortunate few who might choose to accompany him. His confidence and charisma entranced her, and she soon recruited two of her college roommates. When the psychologist fired his assistant two years later, Elizabeth and her mother followed. Over the next decade, this man, a malevolent genius and master of manipulating metaphysical concepts to benefit a self-serving agenda, organized a small, dedicated band of followers. "The Group" evolved into an incestuous family--a cult. Their brainwashed minds became fused with a distinctive, New Age doctrine. A coterie of spiritual "Navy Seals", they scrambled in terror, training to survive the inevitable cataclysm--one man's divine vision of Armageddon. Subsequent to a momentous event in August 1994, with the guru as high priest, "The Black Dog Religion" was born.

Elizabeth sank into a pit of despair, darker than she ever could have imagined was possible. From the adolescent gullibility which seduced her astray, to the enlightenment which led her to freedom, you will travel an incredible journey. For anyone who has ever been trapped by a person who would not let them go, within this book lies a message of hope.

From veteran teacher and acclaimed author Joni B. Cole comes the revised and expanded edition of her popular writing guide *Good Naked*. Once again, Cole's humor and wisdom shine through as she debunks long-held misconceptions of how we're supposed to write, replacing them with advice that works. Feeling overwhelmed? Having trouble getting started or staying motivated? In this edition, Cole offers more stories, strategies, tips on craft, and exercises to serve new and seasoned writers from the first draft to the final edit. Writers will even find help making peace with rejection. Admirers as well as newcomers to Cole's work appreciate her uniquely cheerful approach, time tested to foster creativity and productivity. Keeping this generous and essential guide close by will provide a jump start to inspiration and a daily reminder of the meaning, humor, and happiness that can be discovered in your own writing life.

INSTANT NEW YORK TIMES BESTSELLER From decorated Green Beret sniper, UFC headliner, and all around badass, Tim Kennedy, a rollicking, inspirational memoir offering lessons in how to embrace failure and weather storms, in order to unlock the strongest version of yourself. Tim Kennedy has a problem; he only feels alive right before he's about to die. Kennedy, a Green Beret, decorated Army sniper, and UFC headliner, has tackled a bull with his bare hands, jumped out of airplanes, dove to the depths of the ocean, and traveled the world hunting poachers, human traffickers, and the Taliban. But he's also the same man who got kicked out of the police department, fire department, and as an EMT, before getting two women pregnant four days apart, and finally, been beaten up by his Special Forces colleagues for, quite simply, "being a selfish asshole." In *Scars and Stripes*, Kennedy describes how these failures shaped him into the successful businessman and devoted husband and father he is today. Through unbelievably vivid, wild anecdotes Kennedy reveals all the dumb, violent, embarrassing, and undeniably heroic things he's done in his life, including multiple combat missions in Afghanistan, building a school in Texas for elementary kids, and creating two-multimillion-dollar businesses. You will learn that failure isn't the end--rather it's the first step towards unearthing the best version of yourself and finding success, no matter how overwhelming the setbacks may feel.

Turning Point

"This book offers the reader genuine hope that civility has not been lost to blind, dogmatic beliefs in personal or political ideology and that we can regain our sense of fairness and continue to have discussions about important matters, disagree entirely, but still be able to get along and appreciate discourse over hatred, dialogue over violence, and most importantly, fairness and understanding in our disagreements on important issues"---

This distinctive volume explores how romantic coupleship is represented in books, magazines, popular music, movies, television, and the Internet within entertainment, advertising, and news/information. This reader offers diverse theoretical perspectives and methodological approaches on the representation of romantic relationships across the media spectrum. Filling a void in existing media scholarship, this collection explores the media's influence on perceptions and expectations in relationships, including the myths, stereotypes, and prescriptions manifested throughout the press. Featuring fresh voices, as well as the perspectives of seasoned veterans, contributions include quantitative and qualitative studies along with cultural/critical, feminist, and descriptive analyses. This anthology has been developed for use in courses on mass media and society, media studies, and media literacy. In addition to its use in coursework, it is highly relevant for scholars, researchers, and others interested in how the media influence the personal lives of individuals.

A doctor's revelatory account of pregnancy and the complexity of reproductive life—and everything we lose when we don't speak honestly about women's health. "My work offers a window into the darkest and lightest corners of people's lives, into the extremes of human experience," writes Dr. Chavi Eve Karkowsky in High Risk, her timely and unflinching account of working in maternal–fetal medicine—that branch of medicine that concerns high-risk pregnancies. Whether offering insight into the rise in home births, the alarming rise in America's maternal mortality rate, or the history of involuntary sterilization, Karkowsky offers a window into all that pregnancy, labor, and birth can entail—birth and joy, but also challenge and loss—illustrating the complexity of reproductive life and the systems that surround it. With historical insight and journalistic verve, Karkowsky unpacks what is involved for women, for a family, and for us as a society; and explores what's at risk when these aspects of medicine remain clouded in mystery and misinformation.

Dwyer's book is unique and distinctive as it presents and discusses a modern conceptualisation of critical thinking – one that is commensurate with the exponential increase in the annual output of knowledge. The abilities of navigating new knowledge outputs, engaging in enquiry and constructively solving problems are not only important in academic contexts, but are also essential life skills. Specifically, the book provides a modern, detailed, accessible and integrative model of critical thinking that accounts for critical thinking sub-skills and real-world applications, and is commensurate with the standards of twenty-first century knowledge. It also provides both opportunities to learn and apply these skills through a series of exercises, as well as guidelines on how critical thinking can be developed and practised, in light of existing psychological research, which can be used to enhance the experience of critical thinking training and facilitate gains in critical thinking ability.

'This book rewarded me with dark, dry chuckles on every page' Reni Eddo-Lodge 'Hilarious . . . This original approach to discussing race is funny, intellectual and timely' Independent 'The work of a true mastermind' Benjamin Zephaniah I learned early on that, for me as a black professional, to rise through the ranks and really attain power, I needed to adopt the most ruthless of mindsets possible: the mindset of the White Man who would tear your cheek from your face before he even considered turning his one first.

In this new book, you 'll learn how to teach evidence-based writing using a variety of tools, activities, and sample literary texts. Showing elementary and middle school students how to think critically about what they 're reading can be a challenge, but author C. Brian Taylor makes it easy by presenting twelve critical thinking tools along with step-by-step instructions for implementing each one effectively in the classroom. You 'll learn how to: Design units and lesson plans that gradually introduce your students to more complex levels of textual analysis; Encourage students to dig deeper by using the 12 Tools for Critical Thinking; Help students identify context and analyze quotes with the Evidence Finder graphic organizer; Use the Secret Recipe strategy to construct persuasive evidence-based responses that analyze a text 's content or technique; Create Cue Cards to teach students how to recognize and define common literary devices. The book also offers a series of extra examples using mentor texts, so you can clearly see how the strategies in this book can be applied to excerpts from popular, canonical, and semi-historical literature. Additionally, a number of the tools and templates in the book are available as free eResources from our website (<http://www.routledge.com/9781138950658>), so you can start using them immediately in your classroom.

Now that the Korean War is over, Dr. David Cabot is one of many doctors drafted by the army who are ready to head home. Unfortunately, due to a freak communication error, Dr. Cabot is now in route to a hillbilly medical practice in Boston Knob, West Virginia, instead of Boston, Massachusetts, where he was looking forward to running a lucrative big-city practice. His acrimony about his unplanned new home is diminished somewhat when he is met at the Bluefield airport by a gorgeous redheaded nurse who immediately captures his interest. As Jenny Stone guides Dr. Cabot through the dichotomous poverty and wealth that surrounds the West Virginia coal culture, he quickly falls for her while attempting to embrace his new practice and the isolated people enslaved by the mountains and absentee coal magnets. But little does he know that his backward journey will soon take him to jail as a moonshiner, and eventually into an old-fashioned church revival, the bowels of a mine disaster, and a murder mystery like no other. In this historical tale, an army doctor drafted in the Korean War inadvertently heads toward a new solo practice in West Virginia where he falls for a beautiful hillbilly and becomes immersed in a battle for coalminers.

In *My Life of Ministry, Writing, Teaching, and Traveling: The Autobiography of an Old Mines Missionary*, I present my life as a child growing up in a French village about sixty miles south of St. Louis in the middle of the twentieth century. After eighteen years of life in Old Mines, the oldest settlement in the state of Missouri, I moved to St. Louis for four years and then to St. Meinrad, Indiana, for four years where education opened my eyes to a world very much larger than my village of origin. Life continued for me after ordination as a priest in the Roman Catholic Church in Springfield and Joplin, Missouri. Because my life is the thread stitching together this book, I have made it manageable by dividing it into four categories: ministry, writing, teaching, and travel. These categories contain the stories of others whose life threads of seventy years are woven into my lifetime tapestry. This is my autobiography—one of a missionary from Old Mines to the thirty-nine counties forming the southern third of the state of Missouri—composed during my seventieth year of life.
