An army of monsters walks among us, hidden in plain sight. They're fast. They're strong. They're unrelenting. And they only want one thing: the gas station at the edge of town. Coming as a surprise to absolutely no one, Jack—night-shift clerk and local crazy person—has found himself neck-deep in the middle of yet another world-ending terror. And this time around, nobody can be trusted. Not that tough-as-nails cop who probably knows a lot more than she's letting on. Not the adorkable new employee who might be something far less innocent than she appears. Not even Jack's best friend/emotional support human, whose mysterious past seems to have finally caught up with him. In this latest installment of the Gas Station saga, Jack's world will change forever. Questions will be answered, and answers will be questioned. Friends become enemies. Strangers become enemies. Frenemies become enemies. (You know what? Jack is going to have a lot of new enemies.) Prepare yourself. Things are about to get weird.

Text and illustrations present the physical characteristics, habits, and changing natural environment of the various kinds of dinosaurs that roamed the earth more than sixty-five million years ago.

"Do you ever feel as stubborn as a mule? Or as chicken as a chicken? Of course you do. [This book examines] the normal, natural feelings we all have"--

Walt investigates the death elderly Cheyenne Danny Lone Elk and runs into problems on site of a dinosaur fossil discovery—from the New York Times bestselling author of Land of Wolves When Jen, the largest, most complete Tyrannosaurus rex skeleton ever found surfaces in Sherriff Walt Longmire's jurisdiction, it appears to be a windfall for the High Plains Dinosaur Museum—until Danny Lone Elk, the Cheyenne rancher on whose property the remains were discovered, turns up dead, floating face down in a turtle pond. With millions of dollars at stake, a number of groups step forward to claim her, including Danny's family, the tribe, and the federal government. As Wyoming's Acting Deputy Attorney and a cadre of FBI officers descend on the town, Walt is determined to find out who would benefit from Danny's death, enlisting old friends Lucian Connolly and Omar Rhoades, along with Dog and best friend Henry Standing Bear, to trawl the vast Lone Elk ranch looking for answers to a sixty-five-million-year-old cold case that's heating up fast.

Maya Angelou’s brave, defiant poem celebrates the courage within each of us, young and old. From the scary thought of panthers in the park to the unsettling scene of a new classroom, fearsome images are summoned and dispelled by the power of faith in ourselves. Angelou’s strong verse is matched by the daring vision of artist Jean-Michel Basquiat, whose childlike style reveals the powerful emotions and fanciful imaginings of youth. Together, Angelou’s words and Basquiat’s paintings create a place where every child--indeed every person--may experience his or her own fearlessness.

"THE ULTIMATE DINOSAUR BIOGRAPHY," hails Scientific American: "A thrilling new history of the age of dinosaurs, from one of our finest young scientists. "A masterpiece of science writing." —Washington Post A New York Times Bestseller • Goodreads Choice Awards Winner • A BEST BOOK OF THE YEAR: Smithsonian, Science Friday, The Times (London), Popular Mechanics, Science News "This is scientific storytelling at its most visceral, striding with the beasts through their Triassic dawn, Jurassic dominance, and abrupt demise in the Cretaceous." —Nature The dinosaurs. Sixty-six million years ago, the Earth's most fearsome creatures vanished. Today they remain one of our planet's great mysteries. Now The Rise and Fall of the Dinosaurs reveals their extraordinary, 200-million-year-long story as never before. In this captivating narrative (enlivened with more than seventy original illustrations and photographs), Steve Brusatte, a young American paleontologist who has emerged as one of the foremost stars of the field—naming fifteen new species and leading groundbreaking scientific studies and fieldwork—masterfully tells the complete, surprising, and new history of the dinosaurs, drawing on cutting-edge science to dramatically bring to life their lost world and illuminate their enigmatic origins, spectacular flourishing, astonishing diversity, cataclysmic extinction, and startling living legacy. Captivating and revelatory, The Rise and Fall of the Dinosaurs is a book for the ages. Brusatte traces the evolution of dinosaurs from their inauspicious start as small shadow dwellers—themselves the beneficiaries of a mass extinction caused by volcanic eruptions at the beginning of the Triassic period—into the dominant array of species every wide-eyed child memorizes today, T. rex, Triceratops, Brontosaurus, and more. This gifted scientist and writer re-creates the dinosaurs' peak during the Jurassic and Cretaceous, when thousands of species thrived, and winged and feathered dinosaurs, the prehistoric ancestors of modern birds, emerged. The story continues to the end of the Cretaceous period, when a giant asteroid or comet struck the planet and nearly every dinosaur species (but not all) died out, in the most extraordinary extinction event in earth's history, one full of lessons for today as we confront a "sixth extinction." Brusatte also recalls compelling stories from his globe-trotting expeditions during one of the most exciting eras in dinosaur research—which he calls "a new golden age of discovery"—and offers thrilling accounts of some of the remarkable findings he and his colleagues have made, including primitive human-sized tyrannosaurs; monstrous carnivores even larger than T. rex; and paradigm-shifting feathered raptors from China. An electrifying scientific history that unearths the dinosaurs' epic saga, The Rise and Fall of the Dinosaurs will be a definitive and treasured account for decades to come. Includes 75 images, world maps of the prehistoric earth, and a dinosaur family tree.

Through illustrated full-color images, unravels the mystery of how we bring to life creatures that no one has ever seen before.

“Humans say the eyes mirror the soul. I think most of my kind would agree. Our unique natural abilities enable us to sense what is true in humans when we look deep into their eyes. Almost instantly we see what lives in their souls. We smell it. Either fear and darkness, or courage and light. But humans also say, ‘Never look a dog in the eye.’ Do you know why? Because you will see yourself. What you feel. Your fears. And who you truly are. We saw darkness in T-Rex’s eyes, and when he looked into our eyes, he saw his own reflection. Darkness and death. Because over the centuries—measured in human years, not our years- that was what his kind had bred in us. The dark seed of their own souls. And a willingness to kill.We heard his car and the three that followed, each bringing death. T-Rex was moving fast, anxious to return to Hell. And he had a new killer with him. One of our kind. But special. Very special. And as T-Rex arrived in Hell, followed by the three cars, the smell of dust, dirt, gasoline, and death filling our nostrils, I, for one, sensed his new killer was young. Very young. I smelled his innocence. His rotting, dying innocence. He was no trained killer...yet. But he soon would be. And with a soul nearly as dark as his master’s. I had no choice. I had to escape...” Alejandro’s journey to Paradise City - to both its darkest and most mystical places - will soon begin. And once there, he will encounter all that is good and all that is evil in his search for human love. But the beast, the man known as T-Rex, will also be searching for him.

On a dark cold night, when wind whips the trees A hero will fall, and lose in the fight Danger will then close in Darkness will seem to prevail and win And when all hope is lost When the hero fought and paid the cost Twelve full moons from tonight, on the planet from which they came Two will ride as one and win the fight One side will fall and the other lives It is up to the two to see what side gives. This prophecy swirls over the heads of Violet, Skye, Vicky, and Marilyn in The Triangular Universe, tangling them in its various possible meanings. As they travel through the lands of NarSchophia, Orpha, and Zarpb, meeting exotic creatures they never dreamed existed, they know it is looming ever closer: the battle of the prophecy speaks, and inevitably, the loss of a life. Triumph is around the corner, but for which side?

What could be more fun than a camping trip with a good friend? When that friend is T. Rex! It’s important to set a few wilderness safety guidelines first. . . like making sure he stays on the trail. And does not disturb the local wildlife. And knows how to build a safe campfire. But sometimes dinosaurs have a different way of doing things, and that’s why it’s best to be prepared . . . for anything! Following in the extremely large and funny footsteps of Tea Rex, Camp Rex is for anyone who loves to roast a marshmallow or two around the campfire . . . or the whole bag at once!
