

Each volume of this series of companions to major philosophers contains specially commissioned essays by an international team of scholars, together with a substantial bibliography, and will serve as a reference work for students and non-specialists. One aim of the series is to dispel the intimidation such readers often feel when faced with the work of a difficult and challenging thinker. The essays in this volume provide a systematic survey of Locke's philosophy informed by the most recent scholarship. They cover Locke's theory of ideas, his philosophies of body, mind, language, and religion, his theory of knowledge, his ethics, and his political philosophy. There are also chapters on Locke's life and subsequent influence. New readers and non-specialists will find this the most convenient, accessible guide to Locke currently available.

This book provides the first complete guide for students to the present state of biblical studies. The twenty-one specially commissioned chapters are written by established scholars from North America and Britain, and represent both traditional and contemporary points of view. The chapters in Part One cover all the methods and approaches currently practised in the academic study of the Bible, while those in Part Two examine the major categories of books in the Bible from the perspective of recent scholarship - e.g. historical books of the Old Testament, Gospels, prophetic literature. Major issues raised are: the relation of modern 'critical' study of the Bible to 'pre-critical' and 'post-critical' approaches; the place of history in the study of the Bible; feminist, liberationist and new historicist concerns; the relation of Christian and Jewish scholarship; and recent interest in the Bible as literature.
