Courtney Wesley and her lover, Dr. Josh Ledbetter, are working as medical missionaries in the Congo when Ledbetter falls victim to a mysterious and violent disease. They return home, and medical specialists in America are initially stumped. Doctors are then shocked to discover Ledbetter suffers from a new form of a devastating disease previously known to afflict only the cannibalistic people of Papua New Guinea. In order to avoid a Federal

Isolation Order, Ledbetter flees, and Courtney vows to heal her lover and save his life -- but is she already too late? His strange illness manifests itself in violent ways. Ledbetter's mind and body are both affected as he develops the unquenchable hunger for human flesh. He becomes a walking zombie, his murderous rampage infecting others with the disease from Dallas to the French Quarter of New Orleans. Courtney is on his tail, but so are the authorities who want him dead. Driven by concern, she returns to Africa with her father, where they set out to find a cure for Ledbetter's mysterious disease. There, she makes the acquaintance of a witchdoctor by the name of L'ombo. He is the keeper of ancient secrets and holds the key to healing Dr. Ledbetter. They must work together before the disease spreads further and America is infested with mindless cannibals.

Celebrated American Indian thinker Jack D. Forbes's *Columbus and Other Cannibals* was one of the founding texts of the anticivilization movement when it was first published in 1978. His history of terrorism, genocide, and ecocide told from a Native American point of view has inspired America's most influential activists for decades. Frighteningly, his radical critique of the modern "civilized" lifestyle is more relevant now than ever before. Identifying the Western compulsion to consume the earth as a sickness, Forbes writes: "Brutality knows no boundaries. Greed knows no limits. Perversion knows no borders. . . . These characteristics all push towards an extreme, always moving forward once the initial infection sets in. . . . This is the disease of the consuming of other creatures' lives and possessions. I call it cannibalism." This updated edition

includes a new chapter by the author. Cannibalism and the Common Law is an enthralling classic of legal history. It tells the tragic story of the yacht Mignonette, which foundered on its way from England to Australia in 1884. The killing and eating of one of the crew, Richard Parker, led to the leading case in the defence of necessity, R. v. Dudley and Stephens. It resulted in their being convicted and sentenced to death, a sentence subsequently commuted. In this tour de force Brian Simpson sets the legal proceedings in their broadest historical context, providing a detailed account of the events and characters involved and of life at sea in the time of sail. Cannibalism and the Common Law is a demonstration that legal history can be written in human terms and can be compulsive reading. This brilliant and fascinating book, a marvelous example of

in nature was dismissed as a desperate response to starvation or other life-threatening circumstances, and few spent time studying it. A taboo subject in our culture, the behavior was portrayed mostly through horror movies or tabloids sensationalizing the crimes of real-life flesh-eaters. But the true nature of cannibalism--the role it plays in evolution as well as human history--is even more intriguing (and more normal) than the misconceptions we've come to accept as fact. In *Cannibalism: A Perfectly Natural History*, zoologist Bill Schutt sets the record

The workers who migrate from Lesotho to the mines and cities of neighboring South Africa have developed a rich genre of sung oral poetry—word music—that focuses on the experiences of migrant life. This music provides a culturally reflexive and

consciously artistic account of what it is to be a migrant or part of a migrant's life. It reveals the relationship between these Basotho workers and the local and South African powers that be, the "cannibals" who live off of the workers' labor. David Coplan presents a moving collection of material that for the first time reveals the expressive genius of these tenacious but disenfranchised people. Coplan discusses every aspect of the Basotho musical literature, taking into account historical conditions, political dynamics, and social forces as well as the styles, artistry, and occasions of performance. He engages the

postmodern challenge to decolonize our representation of the ethnographic subject and demonstrates how performance formulates local knowledge and communicates its shared understandings. Complete with transcriptions of full male and female performances, this book develops a theoretical and methodological framework crucial to anyone seeking to understand the relationship between orality and literacy in the context of performance. This work is an important contribution to South African studies, to ethnomusicology and anthropology, and to performance studies in general.

A revealing memoir of how Washington is changing---and not for the better During a storied thirty-year career in the U.S. Senate, Arlen Specter rose to Judiciary Committee chairman, saved and defeated Supreme Court nominees, championed NIH funding, wrote watershed crime laws, always staying defiantly independent, "The Contrarian," as Time magazine billed him in a package of the nation's ten-best Senators. ended with one vote, for President Obama's stimulus, when Specter broke with Republicans to provide the margin of victory to prevent another Depression. Shunned by the GOP faithful, Specter changed parties, giving Democrats a sixty-vote supermajority and throwing Washington into a tailspin. He kept charging, taking the first bursts of Tea Party fire at public meetings on Obama's health care--reform plan. Undaunted, Specter cast the key vote for the health plan. In *Life Among the Cannibals*, Specter candidly describes the battles that led to his party switch, his tough transition, the unexpected struggles and duplicity that he faced, and his tumultuous campaign and eventual

defeat in the 2010 Pennsylvania Democratic primary. Taking us behind the scenes in the Capitol, the White House, and on the campaign trail, he shows how the rise of extremists---in both parties---has displaced tolerance with purity tests, purging centrists, and precluding moderate, bipartisan consensus. Caleb Calder is a cartographer at a time when the discipline is refocusing from paper to pixels. He is a man whose search for meaning centers on the idea of belonging to a place that nourishes him. Thus, after his accident, he discovers--borrowing from Descarte's dictum: I map, therefore I am--that mapping has become perception itself captured like an eddy in a stream in which each and every perception is a map of yet another map. It is on his journey to seek a place of safety and succor for his young family that Caleb becomes enmeshed in a web of internecine intrigue that threatens to destroy everything he has worked for.
