

The Casework Relationship

Melanie Klein has been one of the most important contributors to our thinking about human development and human personality. In this classic text, Isca Salzberger-Wittenberg demonstrates through theoretical exposition and the use of case material the ways in which Melanie Klein's main concepts and theories illuminate the practice of social casework. These theories are often complex and controversial, but this concise and lucid account continues to enable social workers and others in helping professions to judge the relevance of the Kleinian approach for themselves.

Altro health and rehabilitation services, Inc., is a comprehensive rehabilitation agency which provides medical, psycho-social and vocational services to help persons limited in their functioning return to the world of work, family and community. From 1961 through 1966 Altro pioneered in a cooperative venue to study the needs of the mentally ill older adolescent and young adult in a rehabilitation setting. I have been working with emotionally and intellectually handicapped adolescents who are participating in a vocational training program in a sheltered workshop. As a result of my casework practice at Altro, I have found that by helping an adolescent gain some sense of mastery in a vital life role -- by helping him to discover that he is capable of successfully working, learning a trade and establishing an occupational identity - you have markedly helped him to establish a more positive ego-identity.

Authority in Social Casework reviews the various settings in which social work is practiced. This book describes the presence of some component of authority in all casework situations while distinguishing the modes suitable to each setting and to the various needs of clients. Organized into three parts encompassing 10 chapters, this book begins with an overview of the practice of social casework in an authority setting. This text then examines the different concepts of authority as they affect the casework process. Other chapters consider the ways in which authority inheres in the role and function of workers in various casework settings. This book discusses as well the ways in which the nature of the setting determines the types of authority its workers possess. The final chapter deals with the use of a more assertive casework methods of support, which depends on the accurate assessment of the degree of maturity indicated by the client. Caseworkers will find this book useful.

The Casework Relationship ... With an Introduction by Eileen Younghusband

This is a basic book in social casework. Its thesis is that among all the complexities within the subject matter and operations of casework there are certain constant elements, forces, and processes which give coherence and unity to its practice. Mrs. Perlman identifies and analyzes these constants and views them within the logical framework of problem-solving. In turn, problem-solving as a casework process is examined in its likeness to normal human problem-solving efforts. The result is an approach to learning and thinking about casework which is at once organized, synthesized, and imaginative. The book's usefulness is enhanced by the author's lucid and pointed style. Solution-based casework is an approach to assessment, case planning, and case management that combines what we know from clinical social work with what we value about sound social work practice. It is grounded in family-centered social work and draws from clinical approaches within social work and mental health. By integrating problem- and solution-focused approaches that form the clinical and social work traditions, treatment partnerships are more easily formed between family, caseworker, and service provider. Solution-Based Casework is a skill-based, practice-oriented text that provides the specific guidance that students and new practitioners need in order to make sense quickly of the complex tasks of assessment and case planning in child welfare. The book flows out of a long practice experience, and was developed in consultation with workers and supervisors who were attempting to remedy problems viewed as contributing to recurrent abuse and neglect. It seeks to end adversarial relationships in casework and advocates case plans based on specific outcome skills rather than on those written with vague outcome goals measuring attendance in counseling. It serves as a common conceptual framework for

integrating disparate segments of a response network, thereby allowing all providers in a therapeutic system to work toward common goals. The text is divided into three sections. In Section I the conceptual history and theoretical foundations of solution-based casework are presented so that the reader can place this approach to casework within the ongoing professional conversation about what constitutes sound practice. Section II addresses issues of assessment and case planning. Section III focuses on case management issues and how treatment team members experience a solution-based casework approach.

A Therapeutic Tool in Working with Problems of Identity in Adolescence

Originally published in 1982 *Social Work and Ethnicity* was the first purpose-written text for social work students, administrators and practitioners designed to prepare them conceptually and practically for work in Britain's established ethnic minority communities. Much more than the vicissitudes of immigration now had to be considered: this book discusses social work's response to chronic racial discrimination and disadvantage and the hazards and advantages of taking ethnicity into account in service delivery. Emphasised throughout is the role of the social services in promoting good race relations and a better deal for black people. *Social Work and Ethnicity* is based on research carried out by Mrs Cheetham and sponsored by the DHSS to identify the major concerns of social workers with ethnic minority clients and to study the development of relevant services in Britain and the USA. The contributing authors are mainly practitioners and come from a wide variety of ethnic backgrounds; in fact, this is the first book on social work to be published in Britain to which a substantial contribution has been made by black writers. The specially commissioned contributions discuss the fundamental questions of principle in giving special consideration to ethnicity and underline the implications for practice. In particular, the lessons which Britain can learn from American experience are reviewed. The book opens with a discussion of political and ethical questions; the problems of assessing need and monitoring services are then examined. This is followed by several chapters on the special needs of various ethnic minority client groups, particularly children and young people, who now deserve priority attention. The tricky issue of ethnic matching is discussed, so too are the different methods of developing services which are appropriate to ethnic minority needs and aspirations. Recruitment, training and education for work in a multi-racial society are subjects for several chapters and the book concludes with the experiences of two ethnic minority social workers. This book is a re-issue originally published in 1982. The language used and assumptions made
