But first, let's look at the definition of affiliate marketing. To put it plainly, affiliate marketing is cycle of getting commissions or a cut for promoting a product or service that is

not owned or produced by you.

This person can be a company, organization, or a sole entrepreneur.

You find a product that you know and like, promote it to your channels and audience, and accrue

profit for every sale made.

Affiliate marketing is the arrangement whereby an affiliate earns a commission for completing an agreed-upon marketing objective. Commonly, the affiliate

markets products and services belonging to a third party, and they earn a commission for each customer they bring on board. This economic arrangement has existed for as long as businesses have

There are many affiliate

marketers who earn six and seven figures.

secondary tier of players, including affiliate management agencies, super-affiliates and specialized third party vendors. Affiliate marketing overlaps with other Internet
