Supply and demand trading is not rocket science and no one owns it or has a patent on it. The good news is that anyone can learn it, it is a simple market principle that has been in existence since there was a market and it will always be the same principle till there is no more market which will be the end of days. The even better news is that you don't need an MBA or even a high school diploma to learn it and use it to make an unlimited income from trading. Using supply and

¶ If my present reader happens to be a Boy Scout or a scout-master who wants the scouts to build a tower for exhibition purposes, he can do so by following the directions here given, but if there is real necessity for haste in the erection of this tower, of course we cannot build one as tall as we might where we have more time. With a small tower all the joints may be quickly lashed together with strong, heavy twine, rope, or even wire; and in the wilderness it will probably be necessary to

bind the joints with pliable roots, or cordage made of bark or withes; but as this is not a book on woodcraft we will suppose that the reader has secured the proper material for fastening the joints of the frame of this signal-tower and he must now shoulder his axe and go to the woods in order to secure the necessary timber. First let him cut eight straight poles—that is, as straight as he can find them. These poles should be about four and one half inches in diameter at their base and

After all the branches are trimmed off the poles, cut four more sticks each nine feet long and two and a half or three inches in diameter at the base; when these are trimmed into shape one will need twenty six or seven more stout sticks each four and one half feet long for braces and for flooring for the platform.

investing real estate options. WHO really makes money in Real Estate? Realtors, sellers, appraisers, the bank, brokers, mortgage brokers, closing companies, attorneys, taxing authorities, and lastly perhaps you the investor who takes all the risk and does all the work, while having to evict tenants and clean up their mess after they've left. But there is a new, unique and innovative method of investing in real estate. A Real Estate Option gives you control of a piece of

real estate without actually purchasing it. By having an option on a piece of property, you have the exclusive right to buy that property or not. A real estate option is simply a contract between the seller and buyer giving you the legal right not obligation to buy the property at a set price for a predetermined time. When you find a buyer for the property, you cash in your option and deposit a large check. Most real estate investment methods require you to sink a lot of your

money, time, and effort into your investments. And it is a slow process, usually one property at a time, often part-time. Using an option instead of purchasing means you do not have to deal with rental property, tenants, maintenance and repairs, taxes, mortgage payments, commissions, or closing costs. In this new book you will learn how to control a vast real estate portfolio without ever buying the property. Let the owner keep paying the mortgage, dealing with tenants and all of the

On Day 60, you find a buyer who will pay the full \$400,000., you activate the option, pay the seller \$340,000, and pocket \$60,000. This is a simplified example, but this new book details how to become a highly successful real estate option buyer, and it demonstrates step-by-step how to get started in this
