

The Cruise Of The Rolling Junk

Offers an overview of American environmental literature across genres and time periods, introducing readers to a range of ecocritical methodologies.

Captivating tale of true adventures recounts, with wry good humor, the hardships of a two-year voyage aboard a diminutive and leaky craft. Enhanced with 119 original photographs.

Part noir, part psychedelic romp, all Thomas Pynchon—Private eye Doc Sportello surfaces, occasionally, out of a marijuana haze to watch the end of an era In this lively yarn, Thomas Pynchon, working in an unaccustomed genre that is at once exciting and accessible, provides a classic illustration of the principle that if you can remember the sixties, you weren't there. It's been a while since Doc Sportello has seen his ex- girlfriend. Suddenly she shows up with a story about a plot to kidnap a billionaire land developer whom she just happens to be in love with. It's the tail end of the psychedelic sixties in L.A., and Doc knows that "love" is another of those words going around at the moment, like "trip" or "groovy," except that this one usually leads to trouble. Undeniably one of the most influential writers at work today, Pynchon has penned another unforgettable book.

Beaumonster

A BEHIND-THE-SCENES LOOK AT THE ADVENTURES OF FIRST-RATE STORYTELLER, GUITARIST, AND RELENTLESS ROAD WARRIOR JESSE DAYTON Jesse Dayton's story reads like a who's who of American music. In his debut memoir *Beaumonster*, Dayton reveals the stranger-than-fiction encounters and outlandish experiences that have ensued across his wide-ranging career. After sneaking into night clubs to play gigs in his youth, eighteen-year-old Dayton and his trio began packing clubs and theaters across Houston, Dallas, and Austin. His first solo record which featured great luminaries like Doug Sahm, Flaco Jiménez, and Johnny Gimble, hit number one on the Americana radio charts and then he was off to the races—touring the world solo and with punk legends Social Distortion and the Supersuckers. While doing press in Nashville, he caught the attention of Waylon Jennings and was whisked off to Woodland Studios, where he was greeted by none other than Johnny Cash, who told Dayton, "We've been waiting for you." Since then, Dayton's ride across the entertainment industry, traversing genres and formats, has only gotten wilder. Whether it's playing guitar on records and film with the likes of Cash, Ray Price, Willie Nelson, Johnny Bush, Glen Campbell and Duff McKagan; writing and recording soundtracks for horror director/rockstar Rob Zombie; directing Malcolm McDowell and Sid Haig in his own horror movie; filling in for the iconic punk band X's guitarist; joining Ryan Bingham on tour; or the many solo and guest projects he continues to work on, Dayton is down to leave his mark, making *Beaumonster* a uniquely entertaining tale that will impress new and old fans alike.

The Cruise of the Rolling Junk

With the prominence of one-name couples (Brangelina, Kimye) and famous families (the Smiths, the Beckhams), it is becoming increasingly clear that celebrity is no longer an individual pursuit—if it ever was. Accordingly, *First Comes Love* explores celebrity kinship and the phenomenon of the power couple: those relationships where two stars come together and where their individual identities as celebrities become inseparable from their status as a famous twosome. Taken together, the chapters in this volume interrogate the ways these alliances are bound up in wider cultural debates about marriage, love, intimacy, family, parenthood, sexuality, and gender, in their particular historical contexts, from the 1920s to the present day. Interdisciplinary in scope, *First Comes Love* seeks to establish how celebrity relationships play particular roles in dramatizing, disrupting, and reconciling often-contradictory ideas about coupledness and kinship formations.

The essential introduction to the principles and applications of feedback systems—now fully revised and expanded This textbook covers the mathematics needed to model, analyze, and design feedback systems. Now more user-friendly than ever, this revised and expanded edition of Feedback Systems is a one-volume resource for students and researchers in mathematics and engineering. It has applications across a range of disciplines that utilize feedback in physical, biological, information, and economic systems. Karl Åström and Richard Murray use techniques from physics, computer science, and operations research to introduce control-oriented modeling. They begin with state space tools for analysis and design, including stability of solutions, Lyapunov functions, reachability, state feedback observability, and estimators. The matrix exponential plays a central role in the analysis of linear control systems, allowing a concise development of many of the key concepts for this class of models. Åström and Murray then develop and explain tools in the frequency domain, including transfer functions, Nyquist analysis, PID control, frequency domain design, and robustness. Features a new chapter on design principles and tools, illustrating the types of problems that can be solved using feedback Includes a new chapter on fundamental limits and new material on the Routh-Hurwitz criterion and root locus plots Provides exercises at the end of every chapter Comes with an electronic solutions manual An ideal textbook for undergraduate and graduate students Indispensable for researchers seeking a self-contained resource on control theory

Jim Croce, singer-songwriter of the #1 hits Bad Bad Leroy Brown and Time in a Bottle, was at the height of his career when his life was cut short in a plane crash while on tour. Just 30 years old on September 20, 1973, Jim was revered by an adoring audience for his gentle melodies and everyman demeanor. Now, for the first time, this memoir reveals the man behind the denim jackets and signature mustache, a hard-working, wry charmer who was also beset with exhaustion at the sheer magnitude of his own success. I Got a Name, told with full access to everyone who knew and loved Jim Croce, is at once a revealing portrait of a great artist and a moving love story.

Black Crowes drummer and cofounder Steve Gorman shares the band's inside story in this behind-the-scenes biography, from their supernova stardom in the '90s to exhilarating encounters with industry legends. For more than two decades, the Black Crowes topped the charts and reigned supreme over the radio waves, even as hair bands, grunge, and hip-hop threatened to dethrone them. With hits like "Hard

to Handle," "She Talks to Angels," and "Remedy," their massive success launched them to stardom in the early '90s, earning them a place among rock royalty. They were on the cover of *Rolling Stone*, MTV played their videos 24/7, and *Generation X* rediscovered the power of classic rock and blues by digging into multi-platinum classics like *Shake Your Money Maker* and *The Southern Harmony and Musical Companion*. But stardom can be fleeting. For the Black Crowes, success slowly dwindled as the band members got caught up in the rock star world and lost sight of their musical ambition. Despite the drinking, drugs, and incessant fighting between Chris and Rich Robinson -- the angriest brothers in rock and roll, with all due respect to Oasis and the Kinks -- the band continued to tour until 2013. On any given night, they could be the best band you ever saw (or the most combative). Then, one last rift caused by Chris Robinson proved insurmountable for the band to survive. After that, the Black Crowes would fly no more. Founding member Steve Gorman was there for all of it -- the coke- and weed-fueled tours; the tumultuous recording sessions; the backstage hangs with legends like Robert Plant, Jimmy Page, and the Rolling Stones. As the band's drummer and voice of reason, he tried to keep the Black Crowes together musically and emotionally. In *Hard To Handle* -- the first account of this great American rock band's beginning, middle, and end -- Gorman explains just how impossible that job was with great insight, candor, and humor. They don't make bands like the Black Crowes anymore: crazy, brilliant, self-destructive, inspiring, and, ultimately, not built to last. But, man, what a ride it was while it lasted.

"The definitive firsthand account of California's Camp Fire—the nation's deadliest wildfire in a century—and a riveting examination of what went wrong and how to avert future tragedies as the climate crisis unfolds. On November 8, 2018, the people of Paradise, California, awoke to a mottled gray sky and gusty winds. Soon the Camp Fire was upon them, gobbling an acre a second. Less than two hours after the fire ignited, the town was engulfed in flames, the residents trapped in their homes and cars. By the next morning, eighty-five people were dead. San Francisco Chronicle reporter Lizzie Johnson was there as the town of Paradise burned. She saw the smoldering rubble of a historic covered bridge and the beloved Black Bear Diner and she stayed long afterward, visiting shelters, hotels, and makeshift camps. Drawing on years of on-the-ground reporting and reams of public records, including 911 calls and testimony from a grand jury investigation, Johnson provides a minute-by-minute account of the Camp Fire, following residents and first responders as they fight to save themselves and their town. We see a young mother fleeing with her newborn; a school bus full of children in search of an escape route; and a group of paramedics, patients, and nurses trapped in a cul-de-sac, fending off the fire with rakes and hoses. Johnson documents the unfolding tragedy with empathy and nuance. But she also investigates the root causes, from runaway climate change to a deeply flawed alert system to Pacific Gas and Electric's decades-long neglect

of critical infrastructure. A cautionary tale for a new era of megafires, Paradise is the gripping story of a town wiped off the map and the determination of its people to rise again" --

The Story of America's Most Secretive Religion

The Cruise of the Rolling Junk

These Broken Stars

Based on five years of research, access to confidential documents, and extensive interviews with current and former Scientologists, Janet Reitman sheds some long-awaited light on the ever-elusive religion of the Church of Scientology. Scientology, created in 1954 by pulp science fiction writer L. Ron Hubbard, claims to be the world's fastest growing religion, with millions of members and huge financial holdings. Celebrity believers keep its profile high. Teams of volunteer ministers offer aid at disaster sites like Haiti and the World Trade Center. But Scientology is also a very closed faith, harassing journalists and others through litigation and intimidation, even infiltrating high levels of the government to further its goals. Its attacks on psychiatry and its requirement that believers pay as much as tens or even hundreds of thousands of dollars for salvation have drawn scrutiny and skepticism. Ex-members use the internet to share stories of harassment and abuse. Reitman offers the first full journalistic history of the Church of Scientology in an even-handed account that establishes the truth about the controversial religion. She traces Scientology's development from the birth of Dianetics to today, following its metamorphosis from a pseudoscientific self-help group to a global spiritual corporation with profound control over its followers and ex-followers. This is a defining book about a little-known world.

#1 NEW YORK TIMES BESTSELLER • OPRAH'S BOOK CLUB PICK • ONE OF GQ's TOP 50 BOOKS OF LITERARY JOURNALISM IN THE 21st CENTURY • The heartrending story of a midcentury American family with twelve children, six of them diagnosed with schizophrenia, that became science's great hope in the quest to understand the disease. "Reads like a medical detective journey and sheds light on a topic so many of us face: mental illness." —Oprah Winfrey Don and Mimi Galvin seemed to be living the American dream. After World War II, Don's work with the Air Force brought them to Colorado, where their twelve children perfectly spanned the baby boom: the oldest born in 1945, the youngest in 1965. In those years, there was an established script for a family like the Galvins--aspiration, hard work, upward mobility, domestic harmony--and they worked hard to play their parts. But behind the scenes was a different story: psychological breakdown, sudden shocking violence, hidden abuse. By the mid-1970s, six of the ten Galvin boys, one after another, were diagnosed as schizophrenic. How could all this happen to one family? What took place inside the house on Hidden Valley Road was so extraordinary that the Galvins became one of the first families to be studied by the National Institute of Mental Health. Their story offers a shadow history of the science of schizophrenia, from the era of institutionalization, lobotomy, and the schizophrenogenic mother to the search for genetic markers for the disease, always amid profound disagreements about the nature of the illness itself. And unbeknownst to the Galvins, samples of their DNA informed decades of genetic research that continues today, offering paths to treatment, prediction, and even eradication of the disease for future generations. With clarity and compassion, bestselling and award-winning author Robert Kolker uncovers one family's unforgettable legacy of suffering, love, and hope.

Readers will discover the power of music in the lives of figures such as Harriet Tubman, Franklin Roosevelt, Eleanor Roosevelt, and Martin Luther King, Jr., and will learn more about some of our most beloved musicians and performers, including Marian Anderson, Elvis Presley, Sam Cooke, Aretha Franklin, Bob Dylan, Duke Ellington, Carole King, Bruce Springsteen, and more. *Songs of America* explores both famous songs and lesser-known ones, expanding our understanding of the scope of American music and lending deeper meaning to the historical context of such songs as "My Country, 'Tis of Thee," "God Bless America," "Over There," "We Shall Overcome," and "Blowin' in the Wind."
