the twentieth century. Associated in the public mind with his dystopian satire, *Brave New World*, and experimentation with drugs that preceded the psychedelic, a term he invented, era of the 1960s, Huxley seemed to embody the condition of twentieth-century man in his restless curiosity, his search for meaning in a post-religious age, and his concern about the misuses of science and the future of the planet. But Huxley was born when Queen Victoria was on the British throne. He was the grandson of the great Victorian scientist Thomas Henry Huxley "Darwin's bulldog," and the great-nephew of the great poet and critic Matthew Arnold. Exiled in the Californian sun, he never ceased to think of himself as part of a tradition that could be traced back to the Victorian public intellectuals. This biography of Huxley---the first in thirty years---draws on a substantial amount of unpublished material, as

well as numerous interviews with his family and friends. It is a portrait of a daring and iconoclastic novelist; a man hampered by semi-blindness, who spent a restless life in search of personal enlightenment. Nicholas Murray charts Huxley's Bloomsbury years, his surprising and complex relationship with D. H. Lawrence, and his emigration to America in the late 1930s, where he pursued a career as a screenwriter while continuing his fascination with mysticism and religion. Huxley's private life was also unconventional, and this book reveals for the first time the extraordinary story of the *m é nage à trois* including Huxley, his remarkable wife, Maria, and the Bloomsbury socialite and mistress of Clive Bell, Mary Hutchinson. Huxley emerges from this new biography as one of the most intriguing and complex figures of twentieth-century English writing---novelist, poet, biographer,

Huston Smith, the man who brought the world's religions to the West, was born almost a century ago to missionary parents in China during the perilous rise of the Communist Party. Smith's lifelong spiritual journey brought him face-to-face with many of the people who shaped the twentieth century. His extraordinary travels around the globe have taken him to the world's holiest places, where he has practiced religion with many of the great spiritual leaders of our time. Smith's life is a story of uncanny synchronicity. He was there for pivotal moments in human history such as the founding of the United Nations and the student uprising at Tiananmen Square. As he traveled the world he encountered thinkers who shaped the

Weiner, a longtime "spiritual voyeur" and inveterate traveler, realizes that while he has been privy to a wide range of religious practices, he's never seriously considered these concepts in his own life. Face to face with his own mortality, and spurred on by the question of what spiritual principles to impart to his young daughter, he decides to correct this omission, undertaking a worldwide exploration of religions and hoping to come, if he can, to a personal understanding of the divine. The journey that results is rich in insight, humor, and heart. Willing to do anything to better understand faith, and to

because his breadth of knowledge spanned not only philosophy and theology but all the natural sciences. He was a dedicated student of nature, and although he argued that the physical world can only be known reliably through observation and comparison, Albert distinguished between truths, which are naturally knowable, and mysteries, which cannot be known without revelation. People can only reach God through Himself - that is, by leaving behind the entanglements of earthly things and contemplating Him exclusively. The image and reality of God's incarnation in Jesus gives human beings the opportunity to attain a more perfect knowledge God through contemplation. Albert refers to the teaching of St. Peter, "Cast all your anxiety on him, because he cares for you."

A seminal figure in the philosophy of history, culture, and language, Johann Gottfried Herder (1744-1803) also produced some of the most important and original works in the history of aesthetic theory. A student of Kant, he spent much of his life striving to reconcile the opposing poles of Enlightenment thought represented by his early mentors. His ideas influenced Hegel, Schleiermacher, Nietzsche, Dilthey, J. S. Mill, and Goethe. This book presents most of Herder's important writings on aesthetics, including the main sections of one of his major untranslated works, *Kritische Wälder* (Critical Forests). These

notes, essays, and treatises, the majority of which appear here in English for the first time, show this idiosyncratic thinker both deeply rooted in the controversies of his day and pointing the way to future developments in aesthetics. Chosen to reflect the extent and diversity of Herder's concerns, the texts cover such topics as the psychology and physiology of aesthetic perception, the classification of the arts, taste, Shakespeare, the classical tradition, and the relationship between art and morality. Few thinkers have reflected so sensitively and productively on the cultural, historical, anthropological, ethical, and theological dimensions of art and the creative process. With this book, the importance of aesthetics to the evolution and texture of Herder's own thought, as well as his profound contribution to that discipline, comes fully into view.

In this groundbreaking anthology, leading authors from the perennialist school, including Huston Smith, Seyyed Hossein Nasr, and Frithjof Schuon, draw on the age-old insights of the world's wisdom traditions to argue that modern psychology—behaviorism, psychoanalysis, humanistic and transpersonal psychology—overlooks the specifically spiritual factors contributing to mental health and illness.

a revolutionary body of work about the inner reaches of the human mind. Huxley was decades ahead of his time in his anticipation of the dangers modern culture was creating through explosive population increase, headlong technological advance, and militant nationalism, and he saw psychedelics as the greatest means at our disposal to "remind adults that the real world is very different from the misshapen universe they have created for themselves by means of their culture-conditioned prejudices." Much of Huxley's writings following his 1953 mescaline experiment can be seen as his attempt to reveal the power of these substances to awaken a sense of the sacred in people living in a technological society hostile to mystical revelations. Transcendentalism was the name given to the New England movement of the 1830s and 1840s that brought together Romanticism in literature and social reform in politics. Its partisans argued for the rights of women, the abolition of slavery, and, in some cases, the socialization of labor and equal distribution of profits. They were America's first avant-garde. This volume presents substantial selections from the writings of key American Transcendentalists, such as George
