The Etruscan Brontosopic Calendar is a rare document of omens foretold by thunder. It long lay hidden, embedded in a Greek translation within a Byzantine treatise from the age of Justinian. The first complete English translation of the Brontosopic Calendar, this book provides an understanding of Etruscan Iron Age society as revealed through the ancient text, especially the Etruscans' concerns regarding the environment, food, health and disease. Jean MacIntosh Turfa also analyzes the ancient Near Eastern sources of the Calendar and the subjects of its predictions, thereby creating a picture of the complexity of Etruscan society reaching back before the advent of writing and the recording of the calendar.

The definitive history of the military's decades-long investigation into mental powers and phenomena, from the author of Pulitzer Prize finalist The Pentagon's Brain and international bestseller Area 51. This is a book about a team of scientists and psychics with top secret clearances. For more than forty years, the U.S. government has researched extrasensory perception, using it in attempts to locate hostages, fugitives, secret bases, and downed fighter jets, to divine other nations' secrets, and even to predict future threats to national security. The intelligence agencies and military services involved include CIA, DIA, NSA, DEA, the Navy, Air Force, and Army-and even the Joint Chiefs of Staff. Now, for the first time, New York Times bestselling author Annie Jacobsen tells the story of these radical, controversial programs, using never before seen declassified documents as well as exclusive interviews with, and unprecedented access to, more than fifty of the individuals involved. Speaking on the record, many for the first time, are former CIA and Defense Department scientists, analysts, and program managers, as well as the government psychics themselves. Who did the U.S. government hire for these top secret programs, and how do they explain their military and intelligence work? How do scientists approach such enigmatic subject matter? What interested the government in these supposed powers and does the research continue? Phenomena is a riveting investigation into how far governments will go in the name of national security.

Many people have experienced such unusual phenomena as dreams that later seem to correspond with unforeseeable events, thinking of a long-lost friend just before he or she unexpectedly calls, or the ability to "feel" the presence of deceased loved ones. What many do not realize is that these types of experiences have been researched for more than a century by eminent scientists, including Nobel laureates. Most of these researchers have concluded that some of these phenomena do occur, although we are far from explaining them to everyone's satisfaction. This book is the first in almost 40 years to provide a comprehensive scientific overview of research in the field of parapsychology, explaining what we know and don't know about so-called psi phenomena, such as "telepathy," "precognition" or "psychokinesis." Contributors evaluate the evidence for these phenomena, accounting for factors such as selective memory, wish fulfillment and incorrect methods or analyses, in some cases offering psychological, physical and biological theories. Instructors considering this book for use in a course may request an examination copy [here](#).

The Divining Hand The 500 Year-Old Mystery of Dowsing Red Feather

"To dowse," says the author of this definitive study of the divining art, "is to search with the aid of a handheld instrument such as a forked stick or a pendular bob on the end of a string - for anything: subterranean water flowing in a narrow underground fissure, a pool of oil or a vein of mineral ore, a buried sewer pipe or electrical cable, an airplane downed in a mountain wilderness, a disabled ship helplessly adrift in a gale, a lost wallet or dog, a missing person, perhaps a buried treasure." Co-author of The Secret Life of Plants, Christopher Bird has filled this book with exciting, documented stories, most of them illustrated with photographs and diagrams. It provides a complete history of the art of dowsing around the world and discusses in detail the various existing theories attempting to explain this extraordinary phenomenon.

Decoration Day is a late spring or summer tradition that involves cleaning a community cemetery, decorating it with flowers, holding a religious service in the cemetery, and having dinner on the ground. These commemorations seem to predate the post-Civil War celebrations that ultimately gave us our national Memorial Day. Little has been written about this tradition, but it is still observed widely throughout the Upland South, from North Carolina to the Ozarks. Written by internationally recognized folklorist Alan Jabbour and illustrated with more than a hundred photographs taken by Karen Singer Jabbour, Decoration Day in the Mountains is an in-depth exploration of this little-known cultural tradition. The Jabbours illuminate the meanings behind the rituals and reveal how the tradition fostered a grassroots movement to hold the federal government to its promises about cemeteries left behind when families were removed to make way for Fontana Dam and Great Smoky Mountains National Park. Richly illustrated and vividly written, Decoration Day in the Mountains presents a compelling account of a widespread and long-standing Southern cultural practice.

Despite what we may sometimes imagine, popular mathematics writing didn't begin with Martin Gardner. In fact, it has a rich tradition stretching back hundreds of years. Featuring many tricks, games, problems, and puzzles, as well as much history and trivia, the selections include a sixteenth-century guide to making a horizontal sundial; "Newton for the Ladies" (1739); Leonhard Euler on the idea of velocity (1760); "Mathematical Toys" (1785); a poetic version of the rule of three (1792); "Lotteries and Mountebanks" (1801); Lewis Carroll on the game of logic (1887); "Maps and Mazes" (1892); "Einstein's Real Achievement" (1921); "Riddles in Mathematics" (1945); "New Math for Parents" (1966); and "PC Astronomy" (1997). Organized by thematic chapters, each selection is placed in context by a brief introduction. A unique window into the hidden history of popular mathematics, A Wealth of Numbers will provide many hours of fun and learning to anyone who loves popular mathematics and science.

Explores the future predictions of cutting-edge scientists, spiritual teachers, and other visionaries and how we can affect the future • Shares insights from the author's discussions with Dr. Mehmet Oz, Raymond Moody, Larry Dossey, John Perkins, Michael Cremo, Gay Bradshaw, Ray Kurzweil, and many others • Examines what these visionary thinkers foresee for humanity based on current trends in medicine, science, agriculture, history, and other disciplines • Reveals how consciousness affects evolution and Earth's future For almost three decades Zohara Hieronimus has interviewed spiritual teachers, cutting-edge scientists, ancient wisdom keepers, laboratory-tested psychics, and other visionaries on their predictions for the near and far future. While the methods they use are significantly diverse, the similarities in their forecasts are striking. And, as Hieronimus reveals, one common theme resonates through them all: the power of human consciousness. Sharing insights from her discussions with Dr. Mehmet Oz, Raymond Moody, Larry Dossey, John Perkins, Michael Cremo, Gay Bradshaw, Ray Kurzweil, and many others, Hieronimus explores what these visionary thinkers foresee for humanity based on current trends in medicine, science, agriculture, Earth history, robotics, and spirituality. She examines natural, extraterrestrial, and man-made events that dramatically altered humanity's course in the past or might in the future, revealing a recurring cycle of catastrophic Earth changes and rebirths of civilization over billions of years. The author explains that, as part of the energetic expression of Divinity, we can influence the impact of Earth changes through our actions and intentions. She shows that the consciousness of humanity has the power to affect evolution, enact healing on personal and global levels, and alter even natural systems such as the weather. By studying predictions across a broad range of disciplines--from nano-technology to plant intelligence--from today's great minds and from ancient spiritual traditions, Hieronimus shows that we can significantly improve the long-term welfare of the Earth by unfolding our nonlocal consciousness, adopting a reverent attitude toward all life, and realizing how we do things is as vital as what we do.

A comprehensive guide to the inner psychology revealed by the hand • Details how to interpret the entire hand--the shape of the palm and fingers, mounts, lines, fingerprints, flexibility, nails, and skin texture • Reveals the personality archetypes, strengths, and weaknesses connected with each of the seven mounts and how the rest of the hand modifies these traits • Explains how lines change and the decisive influence of the person's own mind in healing defects found on the lines Palmistry is a science and a universal language. The hand tells a story about your talents, relationships, health, and how you feel about yourself. It reveals periods of ease or challenge in your life, and it speaks about your weaknesses and the traits you need to develop. As you change, so do your hands, reflecting the progress you have made. In this comprehensive guide to hand reading, based on Ellen Goldberg's 40 years of teaching palmistry and the Western Mystery tradition, the authors make the powerful insights of the hand accessible in an inviting and user-friendly manner. The book presents the character traits and personality archetypes associated with each of the seven mounts of the palm and shows how to determine which are most influential in the nature of the individual. The mount archetypes reveal the lifestyle, love, sex, and marriage preferences; the best career choices; and the unique strengths and weaknesses for each person. The book also examines other factors that enhance the qualities revealed by the mount types, including the flexibility of the hand, texture of the skin, and the shapes of the fingers, fingertips, and nails. The meaning of each major and minor line is described in detail as well as the influence the person's own mind has in healing defects and obstacles found on their lines. The authors also provide accurate timing guides for each line, making it possible to locate specific events and to see how your lines change over time. Presenting the hand as a guide to self-fulfillment, The Art and Science of Hand Reading incorporates correspondences to other mystical sciences such as astrology, Kabbalah, the Hermetic teachings, and archetypal psychology. It also includes practical examples and more than 600 illustrations to show how to integrate the meanings of each part of the hand to form a complete picture of your inner psychology and your ever-changing destiny.

An exploration of the influence of secret societies on the formative documents and symbols of the United States • Reveals the Founding Fathers' spiritual vision for America as encoded in the Great Seal • Traces the influence of the Iroquois League of Nations upon the Constitution • Exposes the deep connections the Founding Fathers had with the Freemasons and other secret societies All children growing up in America learn who the Founding Fathers were. Most, however, never learn of the founders' connections

to the Freemasons, the Rosicrucians, and other esoteric orders. In *Founding Fathers, Secret Societies* Robert Hieronimus investigates these important connections and how their influence can be traced throughout our most significant national documents and symbols, especially the Great Seal. He reveals in detail how the reverse of the Great Seal--which appears on the back of the one-dollar bill--is a blueprint that conveys the secret destiny of America. By understanding the kabbalistic meaning of the Great Seal's reverse, he shows how our current era presents unique opportunities for the fulfillment of our Founding Fathers' spiritual vision.

Building on the principles and practices presented in *The Divining Mind* (Richard Wright's first book on dowsing, coauthored by T. Edward Ross II), authors Richard and Pat Wright define dowsing as the "process of uncovering information through the medium of the self." The Wrights believe, as do many dowsers, that the ability to dowse is innate, but they also feel that its proper development is contingent upon the parallel unfoldment of the spiritual qualities in our nature. Through this process, the dowser becomes increasingly cognizant of the interconnectedness of all aspects of life and begins to play his or her part as an agent of healing and positive change. Includes detailed information on: • Responsibility in dowsing • Practical dowsing • Earth energies • Planetary stewardship • Healing and prayer • The supersensory worlds An indispensable guide for the advanced dowser as well as a beginner's sourcebook.

Explores the powers and wisdom of sacred White Spirit Animals • Looks in-depth at the lessons of the major White Spirit Animals: the White Bear, White Lion, White Elephant, White Wolf, and White Buffalo • Explains how to use shamanic dreaming and trans-species telepathy to communicate with these great spiritual teachers • Reveals how White Spirit Animals are calling humanity to restore balance, respect, reverence, and honor to protect our animal kin, ourselves, and the earth Beautiful rarities of nature, all-white animals are held sacred by many indigenous cultures and offer deep wisdom to all who will listen. In addition to the White Buffalo, there are other revered white animals, such as the White Wolf, White Lion, White Elephant, and White Bear. Each of these White Spirit Animals belongs to a species at the apex of their ecosystem, meaning the environment in which they live will unravel without them. Speaking through ancient and modern prophecy and the many humans who communicate with them, these White Spirit Animals are urgently calling to humanity to restore balance and protect our animal kin, ourselves, and the earth. Combining sacred elder lore, science, and her own telepathic dreams, Zohara Hieronimus looks at the special role played by White Spirit Animals in spiritual traditions and prophecy around the globe, where they are seen as guardians of animal wisdom, each with a special purpose and gift. She reveals how they have collaborated with humanity since the last ice age, inspiring spiritual practices and conferring shamanistic powers, and are considered the stewards of the great spiritual transformations that occur during transitional times. Sharing the waking vision of White Spirit Animals that called her to write this book, and their message of CPR for the earth--conservation, preservation, and restoration--she explains how to use shamanic dreaming and trans-species telepathy to communicate with these great spiritual teachers. Exploring each one of the major White Spirit Animals--White Buffalo, White Lion, White Elephant, White Wolf, and White Spirit Bear--and the cultures in which they are honored, the author shows, for example, how the White Buffalo is called a harbinger of peace and abundance by many Native American tribes and the White Bear, the great earth healer, teaches us about nurturance and patience. As a bridge between the spiritual and physical worlds, between humans and animals, White Spirit Animals are calling us to open our hearts to the wild, to the sacredness of the wind, the water, the earth, and dream a new world into being to heal our own personal and collective wounds and restore the earth to balance.

The mystery of how migrating animals find their way over unfamiliar terrain has intrigued people for centuries, and has been the focus of productive research in the biological sciences for several decades. Whether or not the earth's magnetic field had anything to do with their navigational abilities has surfaced and been dismissed several times, beginning at least in the mid to late 1800s. This topic generally remained out of the mainstream of scientific research for two reasons: (1) The apparent irreproducibility of many of the behavioral experiments which were supposed to demonstrate the existence of the magnetic sense; and (2) Perceived theoretical difficulties which were encountered when biophysicists tried to understand how such a sensory system might operate. However, during the mid to late 1960s as the science of ethology (animal behavior) grew, it became clear from studies on bees and birds that the geomagnetic field is used under a variety of conditions. As more and more organisms were found to have similar abilities, the problem shifted back to the question as to the basis of this perception. Of the various schemes for transducing the geomagnetic field to the nervous system which have been proposed, the hypothesis of magnetite-based magnetoreception discussed at length in this volume has perhaps the best potential for explaining a wide range of these effects, even though this link is as yet clear only in the case of magnetotactic bacteria.

There is no more important substance on earth than water: it is the source of life, one of the four classic elements and makes up over 70% of our bodies and our planet. This

remarkable new book allows us to discover and understand more about this most common of molecules. Water is the most common, and also the most important substance on Earth. We are hypnotically attracted to its simplicity, purity and transparency, as well as its astonishing physical behaviour, structural vibrations and ordered flow, not to mention its amazing therapeutic virtues. Despite its prevalence, however, this astonishing molecule still harbours many mysteries. Through the ages, not only scientists but also philosophers and mystics have sought to interpret the fact that our lives are completely dependent on water. They have drawn parallels with spiritual growth: water is always ready to change, to adapt itself, to create and transform; it could be seen as nature's guide to improving and renewing ourselves in wisdom and serenity. By going further than just describing its attributes and celebrating its physical properties, *The Hidden Secrets of Water* seeks to uncover and understand the true depths of this most enigmatic of elements, taking the reader on a journey of discovery that covers the whole spectrum of water's influence, traversing scientific, social and spiritual planes. From the Ancient Chinese concept of Yin and Yang to numerical and literary symbolism in the Torah, the Fibonacci sequence to string theory, this innovative, intelligent and far-reaching exploration seamlessly brings together modern science and ancient wisdom, technology and humanism, logic and mysticism in a way that will inspire and stimulate all.

*How our collective intelligence has helped us to evolve and prosper Humans are a puzzling species. On the one hand, we struggle to survive on our own in the wild, often failing to overcome even basic challenges, like obtaining food, building shelters, or avoiding predators. On the other hand, human groups have produced ingenious technologies, sophisticated languages, and complex institutions that have permitted us to successfully expand into a vast range of diverse environments. What has enabled us to dominate the globe, more than any other species, while remaining virtually helpless as lone individuals? This book shows that the secret of our success lies not in our innate intelligence, but in our collective brains—on the ability of human groups to socially interconnect and learn from one another over generations. Drawing insights from lost European explorers, clever chimpanzees, mobile hunter-gatherers, neuroscientific findings, ancient bones, and the human genome, Joseph Henrich demonstrates how our collective brains have propelled our species' genetic evolution and shaped our biology. Our early capacities for learning from others produced many cultural innovations, such as fire, cooking, water containers, plant knowledge, and projectile weapons, which in turn drove the expansion of our brains and altered our physiology, anatomy, and psychology in crucial ways. Later on, some collective brains generated and recombined powerful concepts, such as the lever, wheel, screw, and writing, while also creating the institutions that continue to alter our motivations and perceptions. Henrich shows how our genetics and biology are inextricably interwoven with cultural evolution, and how culture-gene interactions launched our species on an extraordinary evolutionary trajectory. Tracking clues from our ancient past to the present, *The Secret of Our Success* explores how the evolution of both our cultural and social natures produce a collective intelligence that explains both our species' immense success and the origins of human uniqueness.*

Classical Methods for Self-Discovery through Palmistry

I loved the book, *The Secret*. I realized pieces were left out. So I tracked down the missing pieces. This book contains what I found. This book describes how to have fun using the Law of Attraction, or really Resonant Attraction, Manifestation, and adjustment of energies, to benefit yourself and others. It contains the essence of over 200 books, and numerous seminars, on the subject. This book is written along the lines of the Tao Te Ching, Sun Tzu's Art of War, Richard Bach's book *Illusions*, or *Journey to the Ancestral Self*, where one can go back to it many times, and get something new and fascinating, each time. One reviewer said this book could be a playbook for life. All reviewers said it was the most complete book they had ever seen, on the subject. The editors of *Think and Grow Rich* left out a lot of material they felt people weren't ready for. This book fills in most of those gaps, also. We seek out problems for their gifts, because we grow as we solve those problems. You cannot solve a problem out of the same place it was created. You must go to a new level of order. Everything you see in this

book, and every human creation, was sought out to solve some problem, by someone in a state of confusion, who didn't have the answer at first, and asked new questions. The Universe has benevolent intentions for you, if you choose to let it work that way. Your default setting is peace, love, joy, healing beauty, happiness, satisfaction, comfort, contentment, and everything that makes life worthwhile. Only you can change the default settings. You change them by invoking the Law of Attraction, with intent. You already have and are everything you could ever need, want, be, do, or have, inside, in the field of possibility. Energy flows where attention goes. What you concentrate on grows. You can create anything you want. You already create your world, perhaps unconsciously. This book is about becoming a conscious creator, so you consciously choose what you will create, and then becoming an effortless creator. The Law of Attraction is very simple. It is really a Law of Resonant Attraction. Stop believing, feeling, and thinking about what you don't want, and start believing, feeling, and thinking what supports you, and what would support your growth. You never want things as things; you seek the feelings having the things will bring to you. You can create those feelings right now. What would it feel like, if your dream was real, right now? What would you see, hear, and feel if you already had whatever you seek? Spend as much time as you can, in that state of being. 90% of success is having a clear intent. Take action as you feel guided to do so. The intent of this book is to guide you into experiencing and realizing your dreams. This book is very similar to Dowsing and Manifesting— though it doesn't use dowsing language— and Redneck Shaman— though it isn't specifically shamanic. The three authors differed on what the final product should look like, so they each went in their own direction.

Practical and authoritative, this book is a comprehensive manual of operations for using psychics in criminal investigations. The authors base the material on several decades of personal experience and on other first-person accounts from law enforcement personnel. After establishing the need for such an operations manual, the text presents a short history of psychic criminology, outlines the different types of psychic ability pertinent to the investigator, then reviews the evidence and theories for paranormal phenomena. It then details the identification, recruitment, testing and use of psychics, with close coverage afforded methods and procedures for efficient and successful investigative work with psychics. The important role of extrasensory perception in the everyday life of the investigator also is examined. Throughout the book, the authors intersperse summaries of actual cases involving psychics to illustrate and support the topics under discussion. Following the text is a sample Intuitive Investigation Report Form useful in psychic criminology, a glossary of parapsychological terms, and a bibliography of pertinent readings. This second edition has been edited and rewritten extensively with much new and significant material added, including a section on remote viewing, a new chapter of documented case histories, and a cogent critique of the critics of paranormal functioning. The primary purpose of this second edition is the same as the first: to promote the professional use of psychics as investigative aides in criminal investigations.

This third A-Z directory by the author of The Crystal Bibles explores the effects of electromagnetic field (EMF) pollution and geopathic stress (GS) on health and well-being, and the dis-eases and healing crystals associated with them. Including 20 crystal portraits, the directory assists in identifying the right crystal for your needs whether it is for personal energetic support and healing for EMF and GS effects, or environmental protection against electromagnetic and geopathic stress. With practical applications, the directory also includes essential information on keeping your crystals working for you.

Is consciousness actually the Life Force, the animating principle which underlies and unifies mind, body, and spirit in all living things, and which philosopher Henri Bergson termed the *élan vital*? This book offers a compendium of empirical evidence and theoretical perspectives from a broad range of scholarly disciplines, which suggest that there is an unbroken, non-local, collective aspect of consciousness that links distant individuals and events—a kind of resonant connectedness that defies separation in space and time.

According to a 2005 Gallup poll, 75 percent of Americans believe in some form of paranormal activity. The United States has had a collective fascination with the paranormal since the mid-1800s of our culture. Haunted Ground: Journeys through a Paranormal America examines three of the most vibrant paranormal gatherings in the United States—Lily Dale, a Spiritualist summer camp; the American Society of Dowsers' annual convention of "water witches"—to explore and explain the reasons for our obsession with the paranormal. Both academically informed and thoroughly engaging, the book takes readers on a "road trip" through our nation, guided by professor of American religion Darryl V. Caterine, PhD. The author interprets seemingly unrelated case studies of phantasmagoria collectively

modern discourse about "nature" as ultimate reality. Along the way, Dr. Caterine reveals how Americans' interest in the paranormal is rooted in their anxieties about cultural, political, and economic sense of alienation and homelessness.

Teaching the I Ching (Book of Changes) is a comprehensive and authoritative source for understanding the 3,000-year-old Book of Changes, arguably the most influential Chinese classical text. Because of the renewed interest in Asian philosophy and the availability of a readable English translation, the I Ching (Pinyin Yijing) became a countercultural classic and attracted scholarly interest. It was alternately condemned and praised during the Mao era - though the Great Helmsman was rumored to consult the Changes himself. It is now widely read in China, and scholarship on the Changes in China and the West, stimulated by advances in reconstructing the ancient Chinese language and by the recent discovery of previously lost versions of the text. Chinese traditional culture cannot be understood without familiarity with the Yijing, but it is one of the most difficult of the world's ancient classics. The text is fragmentary with many obscure allusions and conflicting interpretive traditions spanning more than 2,000 years. The associated diagrams have complex interpretative schemes. Geoffrey Redmond and Tze-Ki Hon provide the necessary background for teachers at the university level to cover the Yijing even if they have never read it. The book also serves as an introduction for students beginning the study of the Changes and presents an up-to-date survey of recent scholarship.
