"It's a tough world out there for graduates--and students definitely know it. As a result, we're seeing more and more that they're preparing for post-graduation life early. The Student Book and The Graduate Book are invaluable resources, showing them exactly how to get ahead of the game whilst still at uni, and what to do if they've left their career planning until the very last minute! From a real-life success story, it offers crucial advice in an engaging and light-hearted way. An essential wherever you are in your university career or graduate job search!" Lucy Miller, Senior Editor - The National Student "We talk and interview with literally thousands of students every year and less than 5% of them really know what they need to do to land that vital first job. These books should be compulsory reading for every student and new graduate. We highly recommend it." Jack Catherall, Managing Director Wiser Elite and Wiser Digital.

The Take-Charge Career Guide for Scientists

*Is a career as a professor the right choice for you? If you are a graduate student, how can you clear the hurdles successfully and position yourself for academic employment? What's the best way to prepare for a job interview, and how can you maximize your chances of landing a job that suits you? What happens if you don't receive an offer? How does the tenure process work, and how do faculty members cope with the multiple and conflicting day-to-day demands? With a perpetually tight job market in the traditional academic fields, the road to an academic career for many aspiring scholars will often be a rocky and frustrating one. Where can they turn for good, frank answers to their questions? Here, three distinguished scholars—with more than 75 years of combined experience—talk openly about what's good and what's not so good about academia, as a place to work and a way of life. Written as an informal conversation among colleagues, the book is packed with inside information—about finding a mentor, avoiding pitfalls when writing a dissertation, negotiating the job listings, and much more. The three authors' distinctive opinions and strategies offer the reader multiple perspectives on typical problems. With rare candor and insight, they talk about such tough issues as departmental politics, dual-career marriages, and sexual harassment. Rounding out the discussion are short essays that offer the "inside track" on financing graduate education, publishing the first book, and leaving academia for the corporate world. This helpful guide is for anyone who has ever wondered what the fascinating and challenging world of academia might hold in store. Part I - Becoming a Scholar * Deciding on an Academic Career * Entering Graduate School * The Mentor * Writing a Dissertation * Landing an Academic Job Part II - The Academic Profession * The Life of the Assistant Professor * Teaching and Research * Tenure * Competition in the University System and Outside Offers * The Personal Side of Academic Life This book provides students and graduates with a concise guide to work experience, placements and internships. It explores the full range of opportunities in key graduate sectors and offers support for each stage of the journey, from finding appropriate opportunities and applying for posts to developing a strategy and making the most of a placement. This is an indispensable resource for anyone applying for placements, internships and graduate jobs. It will also be a valuable resource for careers advisors and staff on employability, personal development and career planning modules.*

Success in academia requires more than an understanding of discipline-specific literature and an ability to teach and do research. It is also necessary to develop an understanding of a range of professionally-oriented skills such as how to identify and apply to doctoral programs, how to make the most of conferences, how to achieve a semblance of work-life balance, and how to land a job. Unfortunately, however, training on such professional matters is often inconsistent and/or idiosyncratic. This book seeks to consolidate and demystify these critical and often-misunderstood aspects of professional development in the context of applied linguistics. Put another way, this book is an attempt at the text many of us wish we had as we began our graduate studies. Throughout the book, readers will find anecdotes and insights informed by individual authors' first-hand experiences. The resulting tone across the volume is that of a meet-up with a trusted and thoughtful mentor. As readers "meet" with these mentors, it is the hope of this volume that their guidance will help move readers closer to realizing their professional goals in applied linguistics.

What makes you stand out in the market for that great graduate job? In the competitive market for graduate jobs, securing a good degree no longer sets you apart from other candidates – this book will provide you with the tools and techniques to allow you to gain and communicate the range of employability skills and behaviours that will make you stand out from the crowd and get the job that you want.

The Unspoken Rules

Everything you ever need to know about making it as a scientist. Despite your graduate education, brainpower, and technical prowess, your career in scientific research is far from assured. Permanent positions are scarce, science survival is rarely part of formal graduate training, and a good mentor is hard to find. In A Ph.D. Is Not Enough!, physicist Peter J. Feibelman lays out a rational path to a fulfilling long-term research career. He offers sound advice on selecting a thesis or postdoctoral adviser; choosing among research jobs in academia, government laboratories, and industry; preparing for an employment interview; and defining a research program. The guidance offered in A Ph.D. Is Not Enough! will help you make your oral presentations more effective, your journal articles more compelling, and your grant proposals more successful. A classic guide for recent and soon-to-be graduates, A Ph.D. Is Not Enough! remains required reading for anyone on the threshold of a career in science. This new edition includes two new chapters and is revised and updated throughout to reflect how the revolution in electronic communication has transformed the field.

Graduate schools churn out tens of thousands of Ph.D.'s and M.A.'s every year. Half of all college courses are taught by adjunct faculty. The chances of an academic landing a tenure-track job seem only to shrink as student loan and credit card debts grow. What's a frustrated would-be scholar to do? Can he really leave academia? Can a non-academic job really be rewarding—and will anyone want to hire a grad-school refugee? With “So What Are You Going to Do with That?” Susan Basalla and Maggie Debelius—Ph.D.'s themselves—answer all those questions with a resounding “Yes!” A witty, accessible guide full of concrete advice for anyone contemplating the jump from scholarship to the outside world, “So What Are You Going to Do with That?” covers topics ranging from career counseling to interview etiquette to translating skills learned in the academy into terms an employer can understand and appreciate. Packed with examples and stories from real people who have successfully made this daunting—but potentially rewarding— transition, and written with a deep understanding of both the joys and difficulties of the academic life, this fully revised and up-to-date edition will be indispensable for any graduate student or professor who has ever glanced at her CV, flipped through the want ads, and wondered, “What if?” “I will absolutely be recommending this book to our graduate students exploring their career options—I’d love to see it on the coffee tables in department lounges!”—Robin B. Wagner, former associate director for graduate career services, University of Chicago

A growing number of people completing or holding graduate degrees now seek non-faculty positions—also called alternative academic, or “alt-ac” positions—at different stages in their careers. While an increasing number of people with doctoral degrees are hunting for a diminishing pool of tenure-track faculty jobs, most degree-granting institutions do not adequately prepare their graduate students to enter the new reality of the alt-ac job market. Yet the administrative ranks in higher education institutions are growing, as colleges and universities are creating a diverse range of positions that support teaching and learning efforts. Focusing on the range of potential alternative career choices, this highly practical book offers tools and prompts for readers who are: Considering whether to choose an alt-ac career path Seeking specific alt-ac positions Advising graduate students or mentoring recent professional graduates Encountering alt-ac career challenges The authors offer case stories—their own and those of colleagues across North America in alt-ac roles—with concrete examples designed to help readers pursue, obtain, and excel in a wide variety of alt-ac positions. The book can equally be used as a resource for graduate courses on professional development and job-market preparation.

Published by the American Geophysical Union as part of the Special Publications Series. Graduate school can be an exciting, challenging time for students, but it can be scary and intimidating at the same time. Navigating Graduate School and Beyond: A Career Guide for Graduate Students and a Must Read for Every Advisor outlines the steps and skills necessary to succeed in graduate school and in your career. "Insider tips" help students better understand their advisors, leading to more productive advisor/student relationships. The importance of sowing well now with good habits and management techniques in order to reap big later is the central focus of the volume.

The definitive career guide for grad students, adjuncts, post-docs and anyone else eager to get tenure or turn their Ph.D. into their ideal job Each year tens of thousands of students will, after years of hard work and enormous amounts of money, earn their Ph.D. And each year only a small percentage of them will land a job that justifies and rewards their investment. For every comfortably tenured professor or well-paid former academic, there are countless underpaid and overworked adjuncts, and many more who simply give up in frustration. Those who do make it share an important asset that separates them from the pack: they have a plan. They understand exactly what they need to do to set themselves up for success. They know what really moves the needle in academic job searches, how to avoid the all-too-common mistakes that sink so many of their peers, and how to decide when to point their Ph.D. toward other, non-academic options. Karen Kelsky has made it her mission to help readers join the select few who get the most out of their Ph.D. As a former tenured professor and department head who oversaw numerous academic job searches, she knows from experience exactly what gets an academic applicant a job. And as the creator of the popular and widely respected advice site The Professor Is In, she has helped countless Ph.D. 's turn themselves into stronger applicants and land their dream careers. Now, for the first time ever, Karen has poured all her best advice into a single handy guide that addresses the most important issues facing any Ph.D., including: -When, where, and what to publish -Writing a foolproof grant application -Cultivating references and crafting the perfect CV -Acing the job talk and campus interview -Avoiding the adjunct trap -Making the leap to nonacademic work, when the time is right The Professor Is In addresses all of these issues, and many more.

Packed with top tips and helpful examples, this concise book takes students through the process of preparing and making successful applications for work placements, internships and graduate jobs. It encourages students to think about what they want from their career and to identify roles which match with their personality, strengths and experiences. Chapters provide practical guidance on researching opportunities, crafting CVs and cover letters and preparing for interviews and assessment centres. This handy guide will be an invaluable resource for all students looking to secure work experience, placements or internships whilst at university, and land the job they want after graduation.

This book is more than a prescription for success in developing employability skills and provides guidance on topics of relevancy to the employment environment. This book is unique and distinguished from similar books in that it provides a hand-holding approach which is complemented by solid case studies emphasizing the perspectives of employers. In addition, the book focuses on a broad-based audience, starting from the grassroots audience of graduates. However, as the book progresses, the techniques provided address issues that relate to any job seeker, be it jobless or merely seeking change of employment. The audience will benefit from models such as Skills Audit, Interview techniques and the whole employment process from pre-interview preliminaries to completing a successful probationary period.

Want to maximise your employability? Are you worried about your job prospects after graduation? Did you know there are 80 graduates fighting for every graduate job? Teaching Gradually is a guide for anyone new to teaching and learning in higher education. Written for graduate student instructors, by graduate students with substantive teaching experience, this resource is among the first of its kind to speak to graduate students as comrades-in-arms with voices from alongside them in the trenches, rather than from far behind the lines. Each author featured a contribution. Consequently, the following chapters give scope to a newer, diverse generation of educators who are closer in experience and professional age to the book's intended audience. The tools, methods, and ideas discussed here are ones that the authors have found most useful in teaching today's students. Each chapter offers a variety of strategies for successful classroom practices that the book consists of 42 chapters written by 51 authors who speak from a vast array of backgrounds and viewpoints, and who represent a broad spectrum of experience spanning small, large, public, and private institutions of higher education. Each chapter offers targeted advice that speaks to the learning curve inherent to early-career teaching, while presenting tangible strategies that readers can use. The contributors' stories and reflections provide the context to build the reader's confidence in trying new approaches in their his or her teaching. This book covers a wide range of topics designed to appeal to graduate student instructors across disciplines, from those teaching discussion sections, to those managing studio classes and lab sessions, to those serving as the instructor of record for large lecture sections. The book also runs throughout this volume: a strong focus on diversity and inclusion, and an acknowledgment of the increasing shift to online teaching. As a result of engaging with Teaching Gradually, readers will be able to: Identify best teaching practices to enhance student learning Develop a plan to implement these strategies in their teaching Expand their conception of contexts in which teaching and learning can occur Foster inclusion in and out of the classroom Assess student learning and the efficacy of their own teaching practices Practice professional self-reflection

In a world where there are increasing concerns about graduate underemployment and likely career trajectories, it is not surprising that there is a significant body of literature examining graduate careers in post-industrial societies. However, it has become increasingly evident in recent years that there is a stark disconnect between academics who research employment and education, and careers researchers who bring these two separate groups together for the first time in order to provide a better understanding of graduate careers. The book addresses the problems surrounding the graduate labour market and its relationship to higher education and public policy. Drawing on varied perspectives, the contributors provide a comprehensive examination of issues such as geography, mobility and employability, the collaboration between practitioners and academic researchers. The interdisciplinary focus of this book will make it of great interest to academics, researchers and postgraduate students in the areas of education, sociology, social policy, business studies and career guidance and coaching. It should also be essential reading for practitioners who wish to consider their role and responsibilities within the workplace.
