

The Hal Saflieni Hypogeum Insight Heritage Guides

Lonely Planet's Malta & Gozo is your passport to the most relevant, up-to-date advice on what to see and skip, and what hidden discoveries await you. Wander prehistoric temples, fossil-studded cliffs and hidden coves; explore an underwater world with a scuba diving or snorkelling trip; and discover a history of remarkable intensity. All with your trusted travel companion.

The large stone temple structures on Malta are amongst the earliest such constructions in the world, long before the pyramids were built in Egypt. This super book forms a pictorial record of all the temples on Malta, whilst also providing background information on the social and cultural history of the period. Built between c.3500 and 2500 BC, the temples reflect, and were part of, a period of great development on Malta and Gozo, especially in artistic and architectural terms. This is a clear, well illustrated account of the temple-building period, as well as of what went before and what came after. The chronological disjuncture, LBK longhouses have widely been considered to provide ancestral influence for both rectangular and trapezoidal long barrows and cairns, but with the discovery and excavation of more houses in recent times it is possible to observe evidence of more contemporary inspiration. What do the features found beneath long mounds tell us about this and to what extent do they represent domestic structures. Indeed, how can we distinguish between domestic houses or halls and those that may have been constructed for ritual purposes or ended up beneath mounds? Do so called 'mortuary enclosures' reflect ritual or domestic architecture and did side ditches always provide material for a mound or for building construction? This collection of papers seeks to explore the interface between structures often considered to be those of the living with those for the dead.

When the plane barked over Dingli Cliffs, on Malta's coastline, Ruth saw the contours formed by the Neolithic temples she had read about in the in-flight magazine – in the shape of a woman's arms and tucked-in legs. Distance allowed her to see these female curves, as distance might help her to make sense of her life with Paul; and she thought – 'I was right to come on holiday by myself.' To his parents – Paul, a classics professor, and interior designer mother Morgana – Lucien was an averagely difficult young man, who turned his back on the adults who did their best for him. To his schoolteacher stepmother, Ruth, he was a disaffected character – and his death in a caravan fire was the culmination of a pattern of disturbed behaviour. Ruth, sole witness to the tragedy, keeps quiet, afraid of association and possible blame, but Lucien, a destructive ghost, becomes a bigger presence in death than he was in life, with his legacy of blame and retribution. Ruth can neither live with this, nor hope for it to change; she can only try to escape the downward spiral that is affecting her family. Escaping for a few days to Malta, Ruth is distracted by a spiritual presence in the neolithic temples and finds herself in an agitated state of reflection. On meeting Frank, a documentary film maker, she questions her part in the tragedy. With new insight, Ruth seems likely to redeem her marriage but during her absence, shared grief has brought back together her husband and his ex-wife Morgana. Morgana is intent on winning back Paul and taking over Ruth's son, Max, in a vendetta... Following the break-up of her marriage, Ruth hopes to find happiness with Frank, but when he visits her home town with its complex family relationships, she realises that this won't be so simple... Caravan is a gripping novel that will take the reader on many twists and turns as it reaches its compelling conclusion.

An Overview of Current Research
Present-day Challenges for the Preservation of the Past

Caravan Der F hrer beschreibt auf 96 Seiten unter dem speziellen Aspekt Mensch & H hle die Vielfalt der unterirdischen Welt des Staates Malta. Neunzehn Wege geleiten den Leser zu insgesamt etwa 50 Objekten, alle bedeutenden werden aufsr hrlisch beschrieben, angereichert mit zahlreichen Fotos und Pl nen. Die Hauptinsel weist eine erstaunliche F ile an arch ologisch bedeutsamen H hlen wie die Ghar Dalam heute genutzt. Viele H hlenkirchen, -gr ber und die Katakomben von Rabat bilden ein weitere Besonderheit Maltas. Das Hypog um von Hal Saflieni ist einer der bedeutendsten unterirdischen Kultur ume der Welt. Einige (zug ngliche) Bunker, Relikte des Zweiten Weltkrieges, bleiben nicht unerw hnt. Die Nachbarinsel Gozo besitzt mit zwei Schau hlen sowie der H hle der Calypso, pr historischen Wert Window und anderen kleineren Objekten ein berraschendes Potenzial. Das Buch ist eine erg nzende Lekt re nicht nur f r den H hnspezialisten, sondern auch f r den landeskundlich und arch ologisch Interessierten sowie den Reisenden, der unge-w mliche Ziele sch tzet.

A gripping conspiracy thriller that takes archaeologist Tom Kettering on a journey of discovery from his home on the sweltering island of Malta to the dreaming spires of Oxford and the burning sands of the Egyptian desert. Tom has unearthed a bizarre shaped skull, similar to those previously exhibited in Valletta's Archaeological museum, until 1985, when suddenly and without explanation, they determined his skull will not face the same fate and seeks advice from Alessandro Tiepolo, a renowned expert and a Jesuit priest with a private agenda and a mysterious past of his own. Guided by Tiepolo, Tom delves into Malta's megalithic past and uncovers a surprising connection with the ancient pharaohs. The mystery is compounded by startling revelations found in the Ethioplian Book of En

someone does not want him to make. Around him people are dying in suspicious circumstances and Tom fears he could be next but why? Who is behind the plot to silence him before his research is published? Does Father Alessandro Tiepolo hold the answers?

The origins of religion and ritual in humans have been the focus of centuries of thought in archaeology, anthropology, theology, evolutionary psychology and more. Play and ritual have many aspects in common, and ritual is a key component of the early cult practices that underlie the religious systems of the first complex societies in all parts of the world. This book examines the formative cults

development of early religion in the Near East, in China, in Peru, in Mesoamerica and beyond. Here, leading prehistorians and other specialists bring a fresh approach to the early practices that underlie the faiths and religions of the world. They demonstrate the profound role of play ritual and belief systems and offer powerful new insights into the emergence of early civilization.

'Ritual Failure' is a new concept in archaeology adopted from the discipline of anthropology. Resilient religious systems disappearing, strict believers and faithful practitioners not performing their rites, entire societies changing their customs: how does a religious ritual system transform, change or disappear, leaving only traces of its past glory? Do societies change and then their ritual? Or do cult societies' archaeology possesses a range of methods and methodologies to explore these questions over the long term: from the emergence of a system, to its peak, and then its decay and disappearance, and in relation to wider social and chronological developments. The collected papers in this book introduce the concept of 'ritual failure' to archaeology. The analysis explores ways in which ritual may have

demanding social conditions, or how its functionality might have failed - resulting in discontinuity, change or collapse. The collected papers draw attention to those turbulent social times of change for which ritual practices are a sensitive indicator within the archaeological record. The book reviews archaeological evidence and theoretical approaches, and suggests models which could explain social

failure' is also often used to better understand other themes, such as identity and wider social, economic and political transformations, shedding light on the social conditions that forced or introduced change. This book will engage those interested in ritual theory and practices, but will also appeal to those interested in exploring new avenues to understanding cultural change. From transformatio

ritual, from ritual continuity in customs to sudden and profound change, from the Neolithic Near East to Roman Europe and Iron Age Africa, this book explores what happens when ritual fails.

Thinking Through Tourism
Sacred Travels
UNTERIRDISCHES MALTA
The Living Goddesses

Prehistoric Malta
For most of Europe's long past we have no writing, no named individuals, no recorded deeds. This means that its history is almost entirely that of the ordinary individual--the hunger-gatherer, farmer, or metallurgist--rather than the king. Evidence of privileged elites and material splendor is not lacking, however. The skills and expertise of prehistoric Europeans were often employed in the production of exquisite jewelry, elaborately woven cloth, beautifully made tools, and finely wrought weapons. Though the palaces that have attracted excavators in other lands are absent, there are few monuments elsewhere in the world to rival Europe's massive megalithic tombs or great stone circles. And though individuals preserve their anonymity and many of their secrets, modern technology has made it possible to reveal parts of their life history in astonishing detail. Handbook to Life in Prehistoric Europe gathers the results of recent archaeological discoveries and scholarly research into a single accessible volume. Organized thematically, the handbook covers all aspects of life in prehistoric Europe, including the geography of the continent, settlement, trade and transport, industry and crafts, religion, death and burial, warfare, language, the arts, and more. Complemented with more than 75 illustrations and maps, the result is a fascinating introduction to the 7,000-year period that immediately preceded the Roman Empire.

Summarizing current debates and offering new approaches for this expanding field of study, Thinking Through Tourism will appeal to students across a range of disciplines.

All roads lead to enlightenment--but the choice of which to travel is yours. From Sedona to Lourdes to Mecca, there are certain divinely blessed places that can inspire you to renew your sense of wonder, revitalize your spirit, and restore your faith. In this book, you'll explore the most illuminating sites around the globe including The Taj Mahal in India, a stunning palace designed for mourning a lost love--or celebrating a triumph; the Shrine of Rumi in Turkey, a monument to the power of passion and poetry; The Walling Wall in Israel, where it is believed you have God's ear when you visit Mount Olympus in Greece, a snow-capped peak that offers serenity and strength with special prayers, meditations, and devotions for each sacred site, this guide is the perfect companion if you are seeking a true journey of the soul.

What constitutes an island and the archaeology contained within? Is it the physicality of its boundary (between shoreline and sea)? Does this physical barrier extend further into a watery zone? Archaeologically, can islands be defined by cultural heritage and influence? Clearly, and based on these few probing questions, islands are more than just lumps of rock and earth sitting in the middle of a sea or ocean. An island is a space which, when described in terms of topography, landscape form and resources, becomes a place. A place can sometimes be delineated with barriers and boundaries; it may also have a perimeter and can be distinguished from the space that surrounds it. The 16 papers presented here explore the physicality, and levels of insularity of individual islands and island groups during prehistory through a series of case studies on Neolithic island archaeology in the Atlantic and Mediterranean regions. For the eastern Atlantic (the Atlantic Archipelago) papers discuss the sacred geographies and material culture of Neolithic Gotland, Orkney, and Anglesey and the architecture of and ritual behavior associated with megalithic monuments in the Channel Islands and the Scilly Isles. The Mediterranean region is represented by a different type of Neolithic, both in terms of architecture and material culture. Papers discuss theoretical constructs and ritual deposition, cave sites, ritualized and religious aspects of Neolithic death and burial, metaphysical journeys associated with the underworld in late Neolithic Malta and the possible role of its

Temple Period art in ritual activities; and palaeoenvironmental evidence from the Neolithic monuments of Corsica. The cases examined illustrate the diversity of the evidence available that affords a better understanding of the European-Mediterranean Neolithic 'island society', not least the effects of interaction/contact and/or geographical insularity/isolation, all factors that are considered to have consequences for the establishment and modification of cultures in island settings.

A New Inquiry Into the Existence of Ancient Cities, Cultures, and Peoples Who Pre-Date Recorded History
The Tarxien Temples

How we experience space by listening; the concepts of aural architecture, with examples ranging from Gothic cathedrals to surround sound home theater. We experience spaces not only by seeing but also by listening. We can navigate a room in the dark, and "hear" the emptiness of a house without furniture. Our experience of music in a concert hall depends on whether we sit in the front row or under the balcony. The unique acoustics of religious spaces acquire symbolic meaning. Social relationships are strongly influenced by the way that space changes sound. In Spaces Speak, Are You Listening?, Barry Blesser and Linda-Ruth Saltier examine auditory spatial awareness: experiencing space by attentive listening. Every environment has an aural architecture. The audible attributes of physical space have always contributed to the fabric of human culture, as demonstrated by prehistoric multimedia cave paintings, classical Greek open-air theaters, Gothic cathedrals, acoustic geography of French villages, modern music reproduction, and virtual spaces in home theaters. Auditory spatial awareness is a prism that reveals a culture's attitudes toward hearing and

space. Some listeners can learn to "see" objects with their ears, but even without training, we can all hear spatial geometry such as an open door or low ceiling. Integrating contributions from a wide range of disciplines—including architecture, music, acoustics, evolution, anthropology, cognitive psychology, audio engineering, and many others—Spaces Speak, Are You Listening? Drawing together psychology, science and mysticism into the same river of human experience, "Godhead" throws new light on the questions that mankind has pondered for centuries.

First published in 1996, this volume has been substantially updated to reflect new research in the conservation of stone monuments, sculpture, and archaeological sites. Presents evidence to support the author's woman-centered interpretation of prehistoric civilizations, considering the prehistoric goddesses, gods and religion, and discussing the living goddesses--deities which have continued to be venerated through the modern era.

Originally thought to be a Christian catacomb when it was first discovered in 1902, the Hal Saflieni Hypogeum turned out to be a cemetery many centuries older. This book offers a concise history of the discovery and excavation of the site near Casal Paola on Malta, set within the context of prehistoric death cults and collective burial practices on this and neighbouring islands. Now a UNESCO World Heritage site, the site is know to date back to at least 4000BC, probably earlier, and was in use over many centuries with various phases of elaboration and expansion. The many colour photographs present a vivid picture of the interior entranceways and underground caves, as well as finds from the excavations

including pottery, figurine and red ochre wall paintings.
A new edition of the most comprehensive guide to Malta in English.

Taking a global and multidisciplinary approach, The SAGE International Encyclopedia of Travel and Tourism brings together a team of international scholars to examine the travel and tourism industry, which is expected to grow at an annual rate of four percent for the next decade. In more than 500 entries spanning four comprehensive volumes, the Encyclopedia examines the business of tourism around the world paying particular attention to the social, economic, environmental, and policy issues at play. The book examines global, regional, national, and local issues including transportation, infrastructure, the environment, and business promotion. By looking at travel trends and countries large and small, the Encyclopedia analyses a wide variety of challenges and opportunities facing the industry. In taking a comprehensive and global approach, the Encyclopedia approaches the field of travel and tourism through the numerous disciplines it reaches, including the traditional tourism administration curriculum within schools of business and management,

economics, public policy, as well as social science disciplines such as the anthropology and sociology. Key features include: More than 500 entries authored and signed by key academics in the field Entries on individual countries that details the health of the tourism industry, policy and planning approaches, promotion efforts, and primary tourism draws. Additional entries look at major cities and popular destinations Coverage of travel trends such as culinary tourism, wine tourism, agritourism, ecotourism, geotourism, slow tourism, heritage and cultural-based tourism, sustainable tourism, and recreation-based tourism Cross-references and further readings A Reader 's Guide grouping articles by disciplinary areas and broad themes

Deborah Manley' s selection of extracts reveals how generations of writers have viewed the landscapes of Malta and Gozo, the people of the islands, the splendours of Valletta and its famous harbour, and the celebrated festas, the village festivals that celebrate the island ' s Catholic identity. An introduction places these extracts in context, while the anthology also considers how Maltese writers have imagined and depicted their homeland.

Houses of the Dead

"Without acoustics, archaeology is deaf . . ." This generously illustrated collection of presentations and reports presents a fascinating multidimensional perspective on ancient cultures, including some that have not been widely known.Ancient civilizations developed far more than fine artwork and magnificent monuments. In songs to their gods, laments for their dead, and the universal human quest for the supernatural, people also made some very strange noise. Scholars from around the world explore man's early use of sound and music, revealing both ancient knowledge and the potential for new learning. "Archaeoaoustics is at this 'pre-paradigmatic stage,'" writes anthropologist Dr. Ezra Zubrow. "This book will help that synthesizing, theorizing pioneer of the future. Looking back there will be new

scholarship who will wonder how present scholars could have been so wrong. They will smile and yet they will remember this book. For in some sense, they will say "this is where it began."Features Editor for 'New Scientist' Magazine Kate Douglas explains: "Where the rest of us see stones, bones, rubble and shards, they (archaeologists) see the tell-tale remains of past lives. With careful scrutiny they are able to use this material to build up a picture of a culture, its technological know-how, trade in commodities and ideas, diet, lifestyle and even beliefs. Until recently, however, almost all archaeological insights have been gleaned by looking at ancient remains. Now archaeologists are starting to think beyond the visual. One of the most exciting branches of the new multi-sensory archaeology is archaeoaoustics, the archaeology of sound. In February 2014, the pioneers of this field met on the island of Malta for their first international conference. It was truly extraordinary."Our goal for the conference was to focus in a responsible way on the behavior of sound

in important ancient spaces, and the way that people may have used it." says conference organizer Linda Enxvi. "We sought hints for the way sound may have impacted on early human development. We intended to bring together a broad base of expertise, science, and objective observation toward a multi-faceted understanding of human ingenuity."Contributors include: Alejandro Ramos-Amezquita, Panagiota Avgerinou, Ros Bandt, Anna Borg Cardona, Emma Brambilla, Fernando Coimbra, Stef Conner, Paolo Debertolis, Stella Dreni, Richard England, Mairi Gkikaki, Annie Goh, Anne Habermehl, Wouter F. M. Henkelman, Sepideh Khaksar, David J. Knight, Glenn Kreisberg, Selin Kucuk, Esthir Lemi, Torill Christine Lindstrom, Maria Cristina Pascual Noguero!, Rita Rainio, Igeor Reznikoff, Mustafa Sahin, Diya Shrivastava, Katya Stroud, Rupert Till, Steven J. Waller, Nektarios Peter Yioutsos, Ezra Zubrow. -- A full list of titles is available at www.archaeoaoustics.org. --NOTE: This volume also contains preliminary reports from the Hal Saflieni Hypogeum (ca. 3600 BCE) acoustics project conducted on-site.

The flap of a butterfly's wing in one part of the world can cause devastating storms on the other side, just as the word "lesbian"—a force full of vitality and world-changing creativity—can destroy families and bring down governments. Evoking the ancient worlds of pre-Vedic and Sapphic lovers, medieval jonglaresas, and nuns "fingering petals and hips," as well as the contemporary world of circuses, global politics, friendship, betrayal, and death, the poems in this collection fold in on themselves, exploding into concentric rings of meaning, rich in symbol and metaphor.

Insight Explore Guides: pocket-sized books to inspire your on-foot exploration of top international destinations. Experience the best of Malta with this indispensably practical Insight Explore Guide. From making sure you don't miss out on must-see attractions such as Valletta, to discovering hidden gems, including the Blue Lagoon, the easy-to-follow, ready-made walking routes will help you plan your trip, save you time, and enhance your exploration of this fascinating country. - Practical, pocket-sized and packed with inspirational insider information, this will make the ideal on-the-move companion to your trip to Malta - Enjoy over 12 Irresistible Best Routes to walk, from the Three Cities to Comino - Features concise insider information about landscape, history, food and drink, and entertainment options - Invaluable maps: each Best Route is accompanied by a detailed full-colour map, while the large pull-out map provides an essential overview of the area - Discover your destination's must-see sights and hand-picked hidden gems - Directory section provides invaluable insight into top accommodation, restaurant and nightlife options by area, along with an overview of language, books and films - Includes an innovative extra that's unique in the market - all Insight Explore Guides come with a free eBook - Inspirational colour photography throughout About Insight Guides: Insight Guides is a pioneer of full-colour guide books, with almost 50 years' experience of publishing high-quality, visual travel guides with user-friendly, modern design. We produce around 400 full-colour print guide books and maps as well as phrase books, picture-packed eBooks and apps to meet different travellers' needs. Insight Guides' unique combination of beautiful travel photography and focus on history and culture create a unique visual reference and planning tool to inspire your next adventure.

Ghar Dalam: The Cave, the Museum, and the Garden is a guidebook about what is considered one of Malta's most important national monuments, as it contributed a great deal to our knowledge on life on the Maltese islands in the remote and in the more recent past. Ghar Dalam is the only cave in Malta where one can study the Pleistocene or the Ice Age fauna in an uninterrupted sequence dating back to 180,000 years ago while having the latter all in one place.

This book is a toolkit for young academic physicians and researchers to learn the behaviors and steps necessary for achieving success in academia. Written by a successful academic clinician, the book shares his personal experience alongside his years of successfully teaching and mentoring young medical professionals. The author ' s main aim is to provide insightful tips and tricks that will hopefully not only motivate the reader to persevere through difficult competitive periods in his or her life, but also provide him or her with a strategic behavioral plan that will solidify his or her work habits and ensure success. This book begins with a chapter about why knowledge and learning should be communicated, and then expands on that mindset through both general behavioral changes and those specific to the life of an academic researcher, like writing articles. Some key topics covered in the text include: The importance of sharing knowledge and the associated public and personal benefits Taking one step at a time and planning out work into small, attainable goals Developing a growth mindset The importance of collaboration and successful mentors This is an ideal guide for young academic physicians and researchers working in universities, academic health sciences centers, and research institutes hoping to learn how to achieve success in academia. It could also prove useful to more established academics that need a refresher or a new perspective on their work and goals.

Are history books giving us the whole story? Or is civilization far more complex and far older than we have been taught? Our school textbooks barely mention the 6,000-year-old Sumerian civilization, yet the latest archaeological findings at sites such as Jericho and, most recently, Gobekli Tepe in Turkey have been dated to 10,000 BC. Civilization goes back at least another 10,000 years, if we are willing to believe what our ancestors themselves claimed. The Lost Civilization Enigma reveals the truth about. Lost magnitudes to known cultures, such as the Bosnian Pyramids and the civilization of " Old Europe " : The fabled lost " golden " cities of South America and the Amazon, which are slowly being rediscovered; Fascinating examples of lost technology, such as the Antikythera Device; Atlantis and the fact that it was a real civilization. Analyzing the historical and archaeological record, best-selling author Philip Coppens demonstrates that there is substantial evidence that civilization is far older, far more advanced, and far more special than is currently accepted. Clearly, our history books have left out a great deal!

This third edition of Historical Dictionary of Malta contains a chronology, an introduction, and an extensive bibliography. The dictionary section has over 300 cross-referenced entries on important personalities, politics, economy, foreign relations, religion, and culture.

The perceived quality of a destination ' s cultural offering has long been a significant factor in determining tourist choices of destination. More recently, the need to present tourist offerings that include cultural experiences and heritage has become widely recognised, that this aspect of the tourism experience is an important differentiator of destinations, as well as being amongst the most manageable. This has also led to an increase in the management of such experiences through special exhibitions, events and festivals, as well as through ensuring more routine and controlled access to heritage sites. Reflecting the increasing application of cultural heritage as a driver for tourism and development, this book provides for the first time a cohesive volume on the subject that is theoretically rich, practically applied and empirically grounded. Written by expert scholars and practitioners in the field, the book covers a broad range of theoretical perspectives of cultural heritage tourism; regeneration, policy, stakeholders, marketing, socio-economic development, impacts, sustainability, volunteering and ICT. It takes a broad view, integrating international examples of sites, monuments as well as intangible cultural heritage, motor vehicle heritage events and modern art museums. This significant book furthers knowledge of the theory and application of tourism within the context of cultural heritage and will be of interest to students, researchers and practitioners in a range of disciplines.

Reconsidering Ritual in Archaeology

Gods, deities, symbolism, deposition, cosmology and intentionality are all features of the study of early ritual and cult. Archaeology has great difficulties in providing satisfactory interpretation or recognition of these elusive but important parts of ancient society, and methodologies are often poorly equipped to explore the evidence. This collection of papers explores a wide range of prehistoric and early historic archaeological contexts from Britain, Europe and beyond, where monuments, architectural structures, megaliths, art, caves, ritual activity and symbolic remains offer exciting glimpses into ancient belief systems and cult behaviour. Different theoretical and practical approaches are demonstrated, offering both new directions and considered conclusions to the many problems of studying the archaeology of cult and ritual. Central to the volume is an exploration of early Malta and its intriguing Temple Culture, set in a broad perspective by the discussion and theoretical approaches presented in different geographical and chronological contexts.

Limestone is a highly successful and widely used building material, found in many important historic buildings and new monuments around the world. Whilst its success reflects its durability under a wide range of environmental conditions, there are still important questions surrounding the selection, use and conservation of build-ing limestones. In order to make best use of new limestone today, and to conserve old limestone most effectively, we need to bring modern research methods to bear on understanding the characteristics of different limestones, what mortars to use, and how key lime-stones have responded to polluted atmospheres. This volume brings together recent inter-disciplinary research on these issues, illustrating the diversity of innovative techniques that are now be-ing applied to furthering our understanding of building limestones.

There's so much to see and do in Malta: from the Unesco World Heritage Site of Valetta; to the deep blue lagoon on the uninhabited island of Comino; to the ancient Ggantija temples, which date back to 3,600BC. Get inspired to visit Malta with the new edition of Insight Guide Malta, a comprehensive full-colour guide to this historic country. Inside Insight Guide Malta: ♦ A fully overhauled edition by our expert Malta author. ♦ Highlights of the country's top attractions, including the lively city of Valetta on the main island, to the cultural hub that is Victoria, located on the island of Gozo. ♦ Descriptive region-by-region accounts that cover the two islands that make up Malta, together with all the main sights and attractions. ♦ Detailed, high-quality maps throughout will help you get around and travel tips give you all the essential information for planning a memorable trip to Malta, including our independent selection of the best hotels and restaurants. About Insight Guides: Insight Guides has over 40 years' experience of publishing high-quality, visual travel guides. We produce around 400 full-colour print guidebooks and maps as well as picture-packed eBooks to meet different travellers' needs. Insight Guides' unique combination of beautiful travel photography and focus on history and culture together create a unique visual reference and planning tool to inspire your next adventure.
