

The Hole In The Dike A Blue Ribbon Book

When a dike breaks during a violent storm, flooding a little Dutch town, Nico's baby is saved by his heroic cat.

"Produced to wide acclaim on Broadway, and made into a movie. The plot concerns a man waiting in prison for execution. Nothing is known about him except that he killed a man. On his execution day, a girl comes to see him, thinking he may be her long-lost brother. The prisoner recognizes her, but the sister is not sure of him. He sends her back to her mother happy in the belief that her brother died a hero in the war. Then, head up, he walks to the execution chamber."-- from publisher Samuel French, accessed 1-22-15.

Landscapes of the past have always held an inherent fascination for geologists because, like terrestrial sediments, they formed in our environment, not offshore on the sea floor and not deep in the subsurface. So, a walk across an ancient karst surface is truly a step back in time on a surface formed open to the air, long before humans populated the globe. Ancient karst, with its associated subterranean features, is also of great scientific interest because it not only records past exposure of parts of the earth's crust, but preserves information about ancient climate and the movement of waters in paleoaquifers. Because some paleokarst terranes are locally hosts for hydrocarbons and base metals in amounts large enough to be economic, buried and exhumed paleokarst is also of inordinate practical importance. This volume had its origins in a symposium entitled "Paleokarst Systems and Unconformities-Characteristics and Significance," which was organized and convened by us at the 1985 midyear meeting of the Society of Economic Paleontologists and Mineralogists on the campus of the Colorado School of Mines in Golden, Colorado. The symposium had its roots in our studies over the last decade, both separately and jointly, of a number of major and minor unconformities and of the diverse, and often spectacular paleokarst features associated with these unconformities.

It includes hundreds of tips, pictures, diagrams and tables that every excavation contractor and supervisor can use This revised edition explains how to handle all types of excavation, grading, paving, pipeline and compaction jobs -- whether it's a highway, subdivision, commercial, or trenching job. This edition has been completely rewritten to cover new materials, equipment and techniques. It includes hundreds of tips, pictures, diagrams and tables.

The Hole in the Dike and Other Plays

Hello, Red Fox

This book presents selected articles from the International Conference on Asian and Pacific Coasts (APAC 2019), an event intended to promote academic and technical exchange on coastal related studies, including coastal engineering and coastal environmental problems, among Asian and Pacific countries/regions. APAC is jointly supported by the Chinese Ocean Engineering Society (COES), the Coastal Engineering Committee of the Japan Society of Civil Engineers (JSCE), and the Korean Society of Coastal and Ocean Engineers (KSCOE). APAC is jointly supported by the Chinese Ocean Engineering Society (COES), the Coastal Engineering Committee of the Japan Society of Civil Engineers (JSCE), and the Korean Society of Coastal and Ocean Engineers (KSCOE).

Completely updated and with three new chapters, this analysis of river dynamics is invaluable for advanced students, researchers and practitioners.

By blocking a leaking hole in the dike, a young boy saves his town from destruction

Despite his perfect scores on his spelling tests, Spider is frightened to enter the spelling bee contest and stand up on stage in front of people, but when Mom, Dad, and big brother Will remind him that even they get scared, Spider finds the confidence to conquer his fear.

"The Awakening of Europe" covers the reformation in Germany, the Netherlands, France, and England, as well as the settlement of colonies in America. The rise of England and the Netherlands as sea powers, and the corresponding fall of Spain, as well as the rise of Russia, Austria, and the German states are also presented.

The author recalls experiences from his childhood in Germany and his later life in the United States, all in some way connected with various animals. When his stepfather moves them to Taper, Florida, in the Everglades, twelve-year-old Charlie discovers a secret world hidden within the sugar cane fields, as well as new family connections and friendships.

A collection of stories and poems presented to teach virtues, including compassion, courage, honesty, friendship, and faith.

It's Little Frog's birthday, and Mama Frog gets a big surprise when the guests show up for his party -- all the animals are the wrong color! Little Frog tells her she's not looking long enough, and he's right.

A beautifully illustrated reference providing fascinating insights into the hidden world of the seafloor using the latest deep-sea imaging.

Examines interrelations between flood management, flooding, and environmental change, for advanced students, researchers, and practitioners.

Through intertwined threads of autofiction, lyric science writing, and the tale of a newly queer Hawaiian volcano, Sabrina Imbler delivers a coming out story on a geological time scale. This is a small book that tackles large, wholly human questions--what it means to live and date under white supremacy, to never know if one is loved or fetishized, how to navigate fierce desires and tectonic heartbreak through the rise and eventual eruption of a first queer love. "When two galaxies stray too near each other, the attraction between them can be so strong that the galaxies latch on and never let go. Sometimes the pull triggers head-on wrecks between stars--galactic collisions--throwing bodies out of orbit, seamlessly into space. Sometimes the attraction only creates a giant black hole, making something whole into a kind of missing." In vivid, tensile prose, Dyke (geology) subverts the flat, neutral language of scientific journals to explore what it means to understand the Earth as something queer, volatile, and disruptive.

Stop Physician Burnout

A comprehensive guide for students and researchers to the physical processes inside volcanoes that control eruption frequency, duration, and size. Continuing the tradition of International Dyke Conference, this book is largely based on contributions from the IDC7 but also includes some chapters by invitation. It focuses on mafic dyke swarms and related associations: e.g. links with sills, kimberlites, syenites, carbonatites, and volcanics, discussing the following themes: (i) regional maps/reviews of dyke swarms and related units, (ii) the role of giant dyke swarms in the reconstruction of supercontinents/paleocontinents, (iii) mapping of dykes using remote sensing techniques, (iv) geochronology of dyke swarms, (v) petrology, geochemistry and petrogenesis of dykes, (vi) emplacement mechanism of dykes, (vii) dyke swarms and planetary bodies, and (viii) links to mineralization and resources.

For use in schools and libraries only. Akiak the sled dog refuses to give up after being injured during the Iditarod sled dog race.

"A vivid, haunting mix of horror and fantasy woven together through a complex fugue of short stories" from the award-winning author of *Kissing Carrion* (Entertainment Weekly). One of Canada's most acclaimed horror writers, Gemma Files presents a mosaic of interconnected stories about interconnected families. After fleeing Scotland, five clans settled in the fictional town of Dourvale in northern Ontario. Known as the Five-Family Coven, they are the descendants of witches and witch-children, none of whom were spared persecution in their native country. Now shamans, spellcasters, singers, and thieves, the members of the Devize, Druir, Glouwer, Roke, and Rusk families survive by trading their occult powers and talents--though few can really afford their price . . . "What makes *We Will All Go Down Together* so riveting isn't its ideas or imagery, as richly atmospheric and detailed as they are. It's the author's voice. Colorful, powerful, and charismatic, her characters are rendered in bold strokes and poignant nuances. . . . Her book is a short-story collection, true, but it also works as a dark, fractured mosaic of a novel. Across continents and centuries, the ghost-magic of Dourvale still cuts and pastes the fabric of reality. With her ghostly, magical storytelling, Files does the same." --NPR.org Praise for Gemma Files "Gemma Files's stories are always so smart and humane, and overwhelm the reader with a true sense of wonder, awe, and horror. She is, simply put, one of the most powerful and unique voices in weird fiction today." --Paul Tremblay, award-winning author of *A Head Full of Ghosts* "One of the genre's most original and innovative voices." --Los Angeles Review of Books

A Dutch Folktale

Flooding and Management of Large Fluvial Lowlands

A little girl seeks to regain her father's attention during the tulipomania craze in seventeenth-century Holland.

A recluse has been shot right between the eyes as he stood looking out of his bedroom window. His neighbor, a schoolteacher who is a pistol shot champion, admits she discovered the body and failed to report it. Is she really guilty of murder?

ENERGY: ITS USE AND THE ENVIRONMENT, Fifth Edition, emphasizes the physical principles behind energy and its effects on our environment. The text explains the basic physical principles behind the use of energy, including the study of mechanics, electricity and magnetism, thermodynamics, and atomic and nuclear physics. It also covers crucial environmental questions that currently are receiving much public attention, such as global warming, radioactive waste, municipal solid waste, and nuclear energy production materials. The text can be used in physics, technology, physical science, and environmental science courses for non-science majors. Many of the standard topics found in introductory physics textbooks are included. As a result, this book can be used as the text in a conceptual physics course with energy as the central theme. No math or other science prerequisite is necessary. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Physician Burnout to Your Ideal Practice is possible using this first comprehensive stress-reduction resource for practicing physicians. You can be a modern physician and have an extraordinary life when you learn and practice the tools in this book. Use this book to STOP the downward spiral of physician burnout with field-tested, doctor-approved techniques discovered through thousands of hours of one-on-one coaching with physicians facing career threatening burnout. Dr. Dike Drummond MD, CEO and founder of TheHappyMD.com will show you burnout's symptoms, effects, and complications; burnout's pathophysiology and four main causes; how to bypass the invisible doctor "Mind Trash" that gets in the way of your recovery; 14 proven burnout prevention techniques and FREE access to an additional 15 techniques on our Power Tools web page - a private resource library; and a step-by-step method to build a more Ideal Practice and a more balanced life whether or not you are suffering from burnout at the moment.

Retells the tale of the little boy whose resourcefulness and courage saved his country from being destroyed by the ocean.

Panther Gorge explores the history one of the most remote regions in New York's Adirondack High Peak region. Two thousand feet deep and riddled with sheer cliffs, the chasm lies between Mts. Marcy and Haystack, the state's first and third highest points. A surprisingly rich history begins on a pathless landscape and includes visits by the earliest Adirondack pioneers including surveyor Verplanck Colvin, guides O.S. Phelps and Jim Goodwin, author Alfred B. Street, and a host of others. Panther Gorge also documents the author's explorations into the region during the period from 2009-2018 to pioneer new rock and ice climbs. Detailed narratives, over 170 color photographs, maps, and route plates allow the reader to vicariously experience one of the most mysterious places in the Adirondack high country.

A fireman in charge of burning books meets a revolutionary school teacher who dares to read. Depicts a future world in which all printed reading material is burned.

APAC 2019

A Story of Life in Holland

What to Do When Working Harder Isn't Working

We Will All Go Down Together

The Corpse on the Dike

Told through the harrowing experiences of the Van Rossem family of Kuyfoort, this is the story of the great flood that swept over Holland in January, 1953. The courage and heroism of the people in their fight against the encroaching sea, the search for and rescue of survivors and the reclamation of their homes and land are depicted. "How the wind blows tonight! As if it wants to tear the house up by the roots," says Tante Anna. But the van Rossem family isn't worried. Isn't their house strong and solid? And the dikes that hold back the sea—aren't they strong, too? That very night they waken to the shriek of sirens and the clang of church bells. They hear an even more frightening sound, too—the rush of water flooding the house. And then comes the cry that strikes terror to the heart of every Dutch boy and girl: "Get to your attic. The dike gave way!"

When Peter returns home one night from visiting his friend, he finds a hole in the dike.
