Your Moment-to-Moment Decision-Making Guide

The Best American Infographics 2016

Contents

Get close to different types of tractor in this fun sticker activity book. A fun, tractor-themed book packed with puzzles, quizzes, and, of course, lots and lots of stickers! This colorful children's activity book contains more than 250 stickers. The stickers are reusable and easy-to-peel-perfect for little fingers to add to pages again and again! Kids will love this journey into the world of tractors, learning about different types of tractor, and the important jobs that they do. Fascinating facts accompany simple, fun activities such as follow-the-trail, puzzles to complete the images, and a tractors quiz. Children will learn about the vehicles themselves, but also about what they do in the wider world. Children are challenged to find the correct stickers to fill in the blanks in the images, and are encouraged to be creative and create their own scene out of stickers. The combination of fun activities and information means that kids can learn as they play. Discover tons of tractors, trucks, and trailers!

Fun pictograms and infographics about the oceans make learning about math topics easy and fun. In this book, readers go on a mission deep underwater and use their mathematical skills while learning about scuba diving and submarines, and exploring life in coral reefs, deep ocean waters, and underwater volcanoes. Math puzzles and exercises help children build confidence in their math skills.

It's time to go to the School of Roars! Join the monsters for some roarsome sticker-time fun. Featuring themes of first experiences, sharing, friendship and problem-solving, and packed with fun sticker scenes to complete, loads of brilliant activities, games and over 150 stickers to stick, this Mega Monster Sticker Book is perfect for little monsters everywhere! Also available: School of Roars: Bestest Friends, School of Roars: Show and Tell: Icky Sticky Stickers, Busy Day Activity Book.

Unleash the power of infographics - the super-smart artwork trend that communicates big ideas in a simple and striking way. This innovative book brings surprising facts and stats to life, with vibrant visuals that will transform your understanding of the human body. Take a new look at the human body-from the simple elements that make it up, to the fascinating workings of the brain and senses! Every fact in this book has been meticulously researched and thoroughly cross-checked by experts. An exciting, eye-opening new angle on

popular topics for readers aged 8+.

My Human Body Infographic Sticker Activity BookWayland

"A fresh, new approach to anatomy and science about the human body. Pictorial info-graphics style illustrations provide easily digestible facts in bite-size chunks."

Impossible ideas, invisible patterns, hidden connections—visualized Deepen your understanding of the world with these mind-blowing infographics from the bestselling author of The Visual Miscellaneum

Unlike any time before in our lives, we have access to vast amounts of free information. With the right tools, we can start to make sense of all this data to see patterns and trends that would otherwise be invisible to us. By transforming numbers into graphical shapes, we allow readers to understand the stories those numbers hide. In this practical introduction to understanding and using information graphics, you'll learn how to use data visualizations as tools to see beyond lists of numbers and variables and achieve new insights into the complex world around us. Regardless of the kind of data you're working with—business, science, politics, sports, or even your own personal finances—this book will show you how to use statistical charts, maps, and explanation diagrams to spot the stories in the data and learn new things from it. You'll also get to peek into the creative process of some of the world's most talented designers and visual journalists, including Condé Nast Traveler's John Grimwade, National Geographic Magazine's Fernando Baptista, The New York Times' Steve Duenes, The Washington Post's Hannah Fairfield, Hans Rosling of the Gampinder Foundation, Stanford's Geoff McGhee, and European superstars Moritz Stefaner, Jan Willem Tulp, Stefanie Posavec, and Gregor Aisch. The book also includes a DVD-ROM containing over 90 minutes of video lessons that expand on core concepts explained within the book and includes even more inspirational information graphics from the world's leading designers. The first book to offer a broad, hands-on introduction to information graphics and visualization, The Functional Art reveals:
• Why data visualization should be thought of as "functional art" rather than fine art
• How to use color, type, and other graphic tools to make your information graphics more effective, not just better looking
• The science of how our brains perceive and remember information
• Best practices for creating interactive information graphics
• A comprehensive look at the creative process behind successful information graphics
• An extensive gallery of inspirational work from the world's top designers and visual artists
On the DVD-ROM: In this introductory video course on information graphics, Alberto Cairo goes into greater detail with even more visual examples of how to create effective information graphics that function as practical tools for aiding perception. You'll learn how to: incorporate basic design principles in your visualizations, create simple interfaces for interactive graphics, and choose the appropriate type of graphic forms for your data. Cairo also deconstructs successful information graphics from The New York Times and National Geographic magazine with sketches and images not shown in the book. All of Peachpit's eBooks contain the same content as the print edition. You will find a link in the last few pages of your eBook that directs you to the media files. Helpful tips: If you are able to search the book, search for "Where are the lesson files?" Go to the very last page of the book and scroll backwards. You will need a web-enabled device or computer in order to access the media files that accompany this eBook. Entering the URL, supplied into a computer with web access will allow you to get to the files. Depending on your device, it is possible that your display settings will cut off part of the URL. To make sure this is not the case, try reducing your font size and turning your device to a landscape view. This should cause the full URL to appear.

The Practical Neuroscience of Happiness, Love, and Wisdom

Beautiful News: Positive Trends, Uplifting Stats, Creative Solutions

Color photographs and computer imaging provide a portrait of the growth of a baby from conception to birth, tracing the development of individual body parts and systems and celebrating each milestone along the way.

Jesus, Moses, Mohammed, Gandhi, and the Buddha all had brains built essentially like anyone else's, yet they were able to harness their thoughts and shape their patterns of thinking in ways that changed history. With new breakthroughs in modern neuroscience and the wisdom of thousands of years of contemplative practice, it is possible for us to shape our own thoughts in a similar way for greater happiness, love, compassion, and wisdom. Buddha's Brain joins the forces of modern neuroscience with ancient contemplative teachings to show readers how they can work toward greater emotional well-being, healthier relationships, more effective actions, and deepened religious and spiritual understanding. This book will explain how the core elements of both psychological well-being and religious or spiritual life-virtue, mindfulness, and wisdom-are based in the core functions of the brain: regulating, learning, and valuing. Readers will also learn practical ways to apply this information, as the book offers many exercises they can do to tap the unused potential of the brain and rewire it over time for greater peace and well-being. How many species are there around the globe? How much do all of the insects in the world collectively weigh? How far can animals travel? Steve Jenkins answers these questions and many more with numbers, images, innovation, and authoritative science in his latest work of illustrated nonfiction. Jenkins layers his signature cut-paper illustrations alongside computer graphics and a text that is teeming with fresh, unexpected, and accurate zoological information ready for readers to easily devour. The level of scientific research paired with Jenkins' creativity and accessible infographics is unmatched and sure to wow fans old and new.

My Planet Earth Infographic Sticker Activity Book is an interactive journey across our amazing planet. This book includes more than 200 stickers and is printed on high-quality paper that's perfect to color in with felt-tips or crayons. It's ideal for environment-conscious children, long journeys, rainy days and a great gift for curious kids. Children can build a barrier reef with stickers, discover which animals travel the furthest, and compare the tallest mountain with the deepest ocean trench. Packed with fact-based stickering, coloring and searching activities to help you remember all of the interesting information, My Planet Earth Infographic Sticker Activity Book is a bold, bright and beautiful book that will take children's imagination on an exciting journey.

A Book of Infographics

An Infographic Exploration

“When it comes to infographics... the best work in this field grabs those eyes, keeps them glued, and the grip is sensual—and often immediate. A good graphic says ‘See what I see!’ and either you do or you don’t. The best ones...pull you right in, and won’t let you go.” —From the introduction by Robert Krulwich

The year’s most ‘awesome’ (RedOrbit) infographics reveal aspects of our world in often startling ways—from a haunting graphic mapping the journey of 15,790 slave ships project on postcards that records and cements a trans-Atlantic friendship. The Best American Infographics 2016 covers the realms of social issues, health, sports, arts and culture, and politics—including crisp visual data on the likely Democratic/Republican leanings of an array of professions (proving that your urologist is far more likely to be a Republican than your pediatrician). Here once again are the most innovative print and electronic infographics—the full spectrum of the genre (see Best American Infographics 2016 for more).

ROBERT KRULWICH is the cohost of Radiolab and a science correspondent for NPR. He writes, draws, and cartoons at Curiously Krulwich, where he synthesizes scientific concepts into colorful, one-of-a-kind blog posts. He has won several Emmy awards for his work on television, and has been called ‘the most inventive network reporter in television’ by TV Guide.

In this fascinating follow-up to the bestselling *Information is Beautiful* and *Knowledge is Beautiful*, the king of infographics David McCandless uses spectacular visuals to give us all a bit of good news.

My Human Body Infographic Sticker Activity Book is an interactive journey around your amazing body. Includes more than 200 stickers and printed on high-quality paper that's perfect to color in with felt-tips or crayons. This book is ideal for long journeys, rainy days and a great gift for curious children. You can build a skeleton out of stickers, discover what goes as fast as a high-speed train, and find out how many supertankers your heart could fill with blood. Packed with fact-based illustrations, this book will help children remember all of the incredible information. My Human Body Infographic Sticker Activity Book is a bold, bright and beautiful book that will take your imagination on an exciting journey. Includes over 200 stickers and printed on high-quality paper that's perfect to color in with felt-tips or crayons, this book is ideal for long journeys, rainy days and a great gift for curious children.

Here's the most entertaining way for children to get a good look at the human body and learn how bodies work: 28 fun and instructive, ready-to-color illustrations. Coordinating text explores the muscular, skeletal, nervous, digestive, respiratory, and immune systems, and answers such questions as What is a hiccup? and Where is my DNA?

The Infographic Guide for Entrepreneurs

Natural science buffs, graphics professionals, and anyone interested in the visual expression of ideas will be fascinated by this tribute to Fritz Kahn, the German infographics pioneer who excelled in the demystification of complex scientific ideas and whose inspired creative concepts have influenced generations of artists and communicators...

BODY: The infographic book of us is the ultimate visual guide to the human body broken down into thematic sections of the physical, chemical, genetic, sensitive, coordinated, thinking, growing and medical body. Information fathered together by established author Steve Parker, will be beautifully displayed through the striking and accessible graphics with a similar aesthetic of Taste. Moving away from the tired treatment of an anatomical guide, this is an accessible and beautiful approach to a popular science topic.

Part of Buster's brand-new 'Big Activity Book' series and packed with 70 puzzles and games, The Big Human Body Activity Book is bursting with fun and fact-filled activities for inquisitive kids. This innovative activity book includes brain-training memory games, intestine mazes, spot-the-difference searches, odd-one-out puzzles and so much more. Each puzzle explores a different part of the body and includes lots of fun facts to discover along the way. Children can find out about everything from where to find the smallest bone in the body to when you are most likely to need a poo.Other books in the series:9781780556093 The Big Green Activity Book9781780556314 The Big Animal Activity Book

Hey, You. Self-employed professional. Let me assume you're like most entrepreneurs and rather go to the dentist for a root canal than talk about branding. Or maybe you love the topic, but didn't excel in art class? Heck, maybe you even failed finger painting 101. Whatever your situation is, don't worry. My intention for this book is to make graphic design and branding a tad less chaotic, because as an independent designer, I understand your small business is like your baby. You want to give it the best chance for success you can, without going broke. Now, I can't promise you a magical pill or step-by-step process that will turn your small business into an unstoppable brand. But I've stressed on keeping this book brief and blunt, to provide you direction on how to graphic design your small business the smart way.

"Through the use of stylish, informative graphics, this title explores the science behind continents..."

In this book the author, a Harvard evolutionary biologist presents an account of how the human body has evolved over millions of years, examining how an increasing disparity between the needs of Stone Age bodies and the realities of the modern world are fueling a paradox of greater longevity and chronic disease. It illuminates the major transformations that contributed key adaptations to the body: the rise of bipedalism; the shift to a non-fruit-based diet; the advent of hunting and gathering, leading to our superlative endurance athleticism; the development of a very large brain; and the incipience of cultural proficiencies. The author also elucidates how cultural evolution differs from biological evolution, and how our bodies were further transformed during the Agricultural and Industrial Revolutions. While these ongoing changes have brought about many benefits, they have also created conditions to which our bodies are not entirely adapted, the author argues, resulting in the growing incidence of obesity and new but avoidable diseases, such as type 2 diabetes. The author proposes that many of these chronic illnesses persist and in some cases are intensifying because of "dysolution," a pernicious dynamic whereby only the symptoms rather than the causes of these maladies are treated. And finally, he advocates the use of evolutionary information to help nudge, push, and sometimes even compel us to create a more salubrious environment. -- From publisher's web site.

What is the true human cost of the war in Afghanistan? What are the real effects of the austerity measure? And how did the London riots spread so quickly?Facts are Sacred, the Guardian's award-winning datablog, publishes and analyses seemingly benign data - released under the auspices of transparency - to bring its readers astonishing revelations about the way we live now. It reveals how data has changed our world and what we can learn from it. Now, the most telling findings from the blog are brought together to give us the facts and figures behind the headlines, beautifully illustrated with extensive data visualisations. Ground-breaking and fascinating, it celebrates a resource that has pushed the boundaries of modern journalism and is a manifesto for a new way of seeing things.

The Power of Data

The Power of Now

Fritz Kahn. Infographics Pioneer

Space

W. E. B. Du Bois's Data Portraits

Me and the World is a colorful, eye-popping universe of infographics about global communities. This content-rich book teaches about other kids and cultures around the world, all while stepping back and really seeing the big picture. Me and the World is the perfect introduction for a generation entering an increasingly digitized, data-driven world.
• Packed with dynamic illustrated spreads about customs of other countries
• Invites readers to see themselves in its pages through a data lens
• Guided by a reliable, school-aged narrator Me and the World pairs visual literacy with data literacy, using colorful illustrations and infographics to present information in a way young readers will not only understand, but enjoy. Equal parts educational and entertaining, this makes a great pick for parents and grandparents, as well as librarians, science teachers, and educators.
• Perfect for reluctant readers, especially those who would otherwise gravitate toward numbers-based pursuits like math and science, rather than than reading
• The graphs, infographics, and maps are the perfect resource for educators looking for engaging content for children to understand data.
• Ideal for children ages 8 to 12 years old
• Add it to the shelf with books like The Wondrous Workings of Planet Earth: Understanding Our World and Its Ecosystems by Rachel Ignotofsky, The History Book: Big Ideas Simply Explained by DK, and The Science Book: Big Ideas Simply Explained by DK.

To make the journey into the Now we will need to leave our analytical mind and its false created self, the ego, behind. From the very first page of Eckhart Tolle's extraordinary book, we move rapidly into a significantly higher altitude where we breathe a lighter air. We become connected to the indestructible essence of our Being. "The eternal, ever present One Life beyond the myriad forms of life that are subject to birth and death." Although the journey is challenging, Eckhart Tolle uses simple language and an easy question and answer format to guide us. A word of mouth phenomenon since its first publication, The Power of Now is one of those rare books with the mind to create an experience in readers, one that can radically change their lives for the better.

The chapters of this book are nothing but mirrors for seeing your "self" from different angles. And though the journey we are about to embark on is an inner one, it will draw upon every aspect of your life. The only requirement asked of you is the willingness to honestly look at yourself in the most natural, intuitive manner. Remember, if we are seeking the root of "self," what we are actually seeking is you. As you read through these pages, you will find that you know much more than you thought you did about some very deep subjects. The fact is, you already know how to find yourself; you have just gotten distracted and disoriented. Once refocused, you will realize that you not only have the ability to find yourself, you have the ability to free yourself. Whether you choose to do so or not is entirely up to you. But upon completion of your journey through these chapters, there will be no more confusion, no more lack of empowerment, and no more blaming others. You will know exactly what must be done. And should you choose to devote yourself to the ongoing journey of self-realization, you will develop a tremendous sense of respect for who you really are. It is only then that you will come to appreciate the full depth of meaning in the advice: "This above all: to thine own self be true." --- Introduction

We are living in a golden age of data visualization, in which designers are responding to the information overload of our digital era with astonishing feats of visual thinking. Using a wide variety of techniques, they transform complex ideas into clear, engaging, and memorable infographics. In recent years, books and websites have been collecting the field's best. While stimulating, these finished projects offer little insight into how visual solutions were reached, making them of limited use to designers wanting to produce work of their own. In Infographic Designers' Sketchbooks, more than fifty of the world's leading graphic designers and illustrators open up their private sketchbooks to offer a rare glimpse of their creative processes. Emphasizing idea-generating methods—from doodles and drawings to three-dimensional and digital mock-ups—this revelatory collection is the first to go inside designers' studios to reveal the art and craft behind infographic design.

Graphic Designing Your Small Business the Smart Way

Flip Flop Fly Ball!

This illustrated beginner's guide to the Bible features essential information on the Old Testament in a straightforward and easy-to-read format. Brush up on the Bible with this full-color guide to the most important ideas and figures of the Old Testament. Featuring fully illustrated infographics of key events such as the story of creation, the exodus from Egypt, the wisdom of King Solomon, and much more, The Infographic Guide to the Bible will entertain and educate all readers!

The colorful charts, graphs, and maps presented at the 1900 Paris Exposition by famed sociologist and black rights activist W. E. B. Du Bois offered a view into the lives of black Americans, conveying a literal and figurative representation of "the color line." From advances in education to the lingering effects of slavery, these prophetic infographics –beautiful in design and powerful in content–make visible a wide spectrum of black experience. W. E. B. Du Bois's Data Portraits collects the complete set of graphics in full color for the first time, making their insights and innovations available to a contemporary imagination. As Maria Popova wrote, these data portraits shaped how "Du Bois himself thought about sociology, informing the ideas with which he set the world ablaze three years later in The Souls of Black Folk."

"Sleep is one of the most important but least understood aspects of our life, wellness, and longevity ... An explosion of scientific discoveries in the last twenty years has shed new light on this fundamental aspect of our lives. Now ... neuroscientist and sleep expert Matthew Walker gives us a new understanding of the vital importance of sleep and dreaming"--Amazon.com.
