psychoanalysis as well as the

How do psychoanalysts explain human

Psychoanalytic Reflections on Morality focuses on the way Melanie Klein and successive generations of her followers pursued and deepened Freud's project of explaining man's moral sense as a wholly natural phenomenon. With the introduction of the superego, Freud laid claim to the study of moral development

And Joan Riviere Collected

Papers 1920 58

as part of the psychoanalytic enterprise. At the same time he reconceptualized guilt: he thought of it not only as conscious, but as unconscious as well, and it was the unconscious sense of guilt that became a particular concern of the discipline he was founding. As Klein saw it, his work merely pointed the way. Judith M. Hughes

argues that Klein and contemporary  
Kleinians went on to provide a more  
consistent and comprehensive  
psychological account of moral  
development. Hughes shows how Klein  
and her followers came to appreciate that  
moral and cognitive questions are  
complexly interwoven and makes clear

Papers 1929 58  
how this complexity prompted them to extend the range of their theory. Hughes demonstrates both a detailed knowledge of the major figures in post-war British psychoanalysis, and a keen sensitivity to the way clinical experience informed theory-building. She writes with vigor and grace, not only about Freud and Klein, but

also about such key thinkers as Riviere,  
Isaacs, Heimann, Segal, Bion and Joseph.  
Guilt and Its Vicissitudes speaks to those  
concerned with the clinical application of  
psychoanalytic theory and to those  
interested in the contribution  
psychoanalysis makes to understanding  
questions of human morality.

This book provides a critical reappraisal of Barbara Creed's ground-breaking work of feminist psychoanalytic film scholarship, *The Monstrous-Feminine*, which was first published in 1993. *The Monstrous-Feminine* married psychoanalytic thinking with film analysis in radically new ways to provide an invaluable corrective to

conventional approaches to the study of women in horror films, with their narrow emphasis on woman's victimhood. This volume, which will mark 25 years since the publication of *The Monstrous-Feminine*, brings together essays by international scholars working across a variety of disciplines who take up Creed's

From Obstacle to Ally explores the  
evolution of the theory and practice of  
psychoanalysis through an investigation of  
historical examples of clinical practice.

Beginning with Freud's experience of the

problem of transference, this book is shaped around a series of encounters in which psychoanalysts have managed effectively to negotiate such obstacles and on occasion, convert them into allies. Judith Hughes succeeds in bringing alive the ideas, clinical struggles and evolving practices of some of the most influential

psychanalysts of the last century  
including Sandor Ferenczi, Anna Freud,  
Melanie Klein, Wilfred Bion, Betty Joseph

of the specific obstacles posed by  
particular diagnostic categories, it  
becomes evident that it is often when  
treatment fails or encounters problems that

For some years, there has  
been an unfortunate tendency  
in the UK for psychiatry and  
psychoanalysis to be  
perceived as in opposition  
to one another, to the  
detriment of both  
disciplines. Rather than see

American social critics in

paper. This may be due to its not being published in English until 1924, well after Freud introduced the term 'masculinity complex' into his own writings. However, Van Ophuijsen's

year. The term  
'masculinity complex' is  
in fact van Ophugsen's  
invention and Freud  
acknowledges his debt in  
his 1919 paper, 'A Child  
is Being Beaten'. It is

also in the present paper

in the 'virile' erogenous  
zone is linked to the  
attachment to the mother.  
This last point is  
particularly important,  
and Freud will later  
appeal to it in explaining

the phallicism of the

van Ophuijsen draws on  
derives from five case  
studies of obsessional  
women. One of the cases,  
who is here simply

analysand was referred to  
Lampl de Groot because of  
difficulties encountered  
in the transference to a

worth noting that van

Ophuijsen takes her to be  
an obsessional, while  
Lampl de Groot diagnoses  
hysteria. Van Ophuijsen's  
starting point concerns  
one aspect of the theory  
of penis envy; namely,

that it derives from the  
sense a woman has of

having brought her into

this world as a woman  
instead of a man. This  
matches some character  
types encountered in  
analysis, van Ophuijsen  
conjectures. He also  
points out that this

selection of papers, it describes the  
development and rich diversity of this

tradition over recent decades, showing how theory and practice are inseparable in the psychoanalytic treatment of children, adolescents and adults. The book is organized around four major concerns in the Contemporary Freudian Tradition: the nature of the Unconscious and the

ways that it manifests itself; the extension of Freud's theories of development through the work of Anna Freud and later theorists; the body and psychosexuality, including the centrality of bodily experience as it is elaborated over time in the life of the individual; and aggression. It also

illustrates how within the Tradition different exponents have been influenced by psychoanalytic thinking outside it, whether from the Kleinian and Independent Groups, or from French Freudian thinking. Throughout the book there is strong emphasis on the clinical setting, in, for example, the

value of the Tradition's approach to the complex interrelationship of body and mind in promoting a deeper understanding of somatic symptoms and illnesses and working with them. There are four papers on the subject of dreams within the Contemporary Freudian Tradition, illustrating the
