We live in a world of words. The way we interact with our fellow humans is very often based on the language that always surrounds us, whether it be the messages we send, the news we read, or the assignments we complete in classes that give us the education intended to lead us to success. What might be the best way to navigate the complexity of language, especially in a first-year composition course? This book addresses these issues by presenting lessons, examples, and student samples through an approach that is friendly, conversational,

and realistic. Created by actual instructors of composition at HCC, this book includes many resources to guide composition students of different skill levels: • In-depth overviews of reading, writing, and revising • Engaging exercises that anticipate and address the most common errors of writers • Actual student samples that provide the basis of class discussions and analysis With guidance that includes both theory and practice, Composition and Grammar for HCC by HCC provides students with the skills they need for their educational goals, their careers, and their lives. Legends, Lore, and Lies presents critical readings in five

sections—urban legends, alternative medicine, the media's role in public gullibility, psychics and the paranormal, and pseudo science—to demonstrate the importance of critical examination and the differences between an opinion or assertion and a supported claim. One of the most successful writing texts on the market, this "all-in-one" rhetoric, reader, and handbook contains everything students need for courses in freshman composition. Created by the authors of the best-selling The Longman Reader, the text draws on more than 60 years of combined teaching experience to integrate the best of the "product" and "process"

approaches to writing. Its particular strengths include an emphasis on the reading-writing connection, a focus on invention and revision, more attention to the fact that patterns blend in actual writing, and an abundance of class-tested activities and assignments over 300 in all. The lowest level book in McWhorter's best-selling, three-book reading series, Guide to College Reading is a practical, highly accessible text designed to improve vocabulary and comprehension skills. Numerous critical thinking and self-evaluation strategies reinforce the book's emphasis on reading as thinking. In addition, ten additional reading selections provide students with

opportunities for practice. The book's streamlined approach focuses on the most important skills at this basic reading level (vocabulary, main idea, supporting detail, and patterns of organization, with some coverage of inference and critical reading).

the wider world by reading actively as well as critically and responding to the ideas of others. After more than twenty-five years of teaching composition, the authors have come to see reading and writing as interrelated activities: To write effectively, one must also read actively and critically. The authors have found and strongly believe that a reader is enriched and engaged when he/she view the reading and writing they do as a way of participating. From the beginning, the goal in The Blair Reader has always been to encourage these discussions in the wider world by responding to the ideas of others.
